## PREFACE TO THE SECOND EDITION.

The text of this edition is substantially the same as of the previous one with some additions and alterations I have endeavoured to make this edition as error-proof as possible. My thanks are due to Mr. J. P. Desouzi for the proofs and to Mr. Wakauksr of Dhai for preparing the Map.

B G. G.

Bombay, 12th June 1948.

.

THE object of the following pages is to present the ontlines of political and caltarel history of ancient India. They are primarily meant for such readers who desire to have an intimate and comprehensive knowledge of men and events in the ancient days of India. My nim, in writing this book was to make the story as interesting as possible but whether I have succeeded in doing so I leave it to the reader to decide.

In a book of this typa controversies and footnotes are n usual featura, both of which will be couspicuona . by their absence here. The "history of ancient India fa" still in the stage of growth and development and as such is naturally full of controversies. These controversies and footnotes though of absorbing interest to the acholar-for whom, incidentally this book is not meant-ara confusing to the layman and it is confusion I primarily aim at avolding. I am all too conscions of the faults of the book for which no excuse is sought to be made. All tha faults are mina and whataver merit there ha is entirely dna to those many scholars on whose works I baya so fully drawn for the material of this book. Footnotes would have been an adequate means of acknowledging it but for rensons already mentioned they are not to be found in this book. So I take this opportunity of acknowledging my debt of gratituda to all those scholars-and they are many-whosa wurka hava made my affort feel . almost a pleasure.

Finally, I must thank Rev. Fr. H. Hergs, S.J., Director, Indian Historical Research Institute, St. Xavier's College, Bombay for encouraging main helping me in the present attempt. Likawisa my sincere thanks are due to Prof.-G. M. Moraes of St. Xavier'a College for offering ' valuable suggestions.

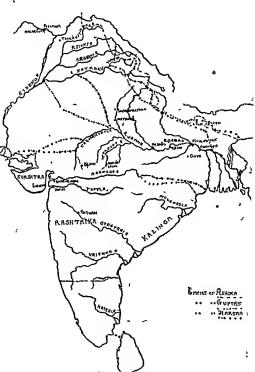

B. G. G.

., 2nd June 1947.

## THE STORY OF THE CAVEMAN

LONG long ago cometime somewhere the first memhers : of this wonderful race of human beings appeared on the surface of this earth. A keen controverey is raging among scholars as to where exactly and when exactly man trod upon this globe of ours for the first time. The controversy is still open and new archaeological finds are constantly forcing us to change our notions regarding the earliest babitat of man. . But certain it is that the forests of pre-historic India must have entertained colouies of men'at a very early date. According to Sir Harry Johnston. India was most prohably the land where the evolution of man took place. The most likely early habitation of man in India must have been the lower fringes of the \*ancient Dandakaranya. The inhospitable mountainous regions of the Himalayas could not have encouraged early - settlemente and the dense tropical jungles would prove equally nuattractive. The broad Gangetic delta, as we know of it to day, could have been the most likely place had it been as it is now. But in the early days the heds of the rivere must have been much broader and higher thau at present and the regions adjoining them too marshy to he inviting, Man, therefore, most probably rose and grew in the comparatively narrow etrip of coast hetween the jungle and the Indian ocean.

The Palaeolithic Period: For the orderly narration of the story of man in pre-historic eges historians divide it into four groups. The first is called the Palaeolithic Age (old stone age) the second Neolithic Age (new stone age), the third Early Iron Age and the fourth the Later Iron Age. Namerons remains of palaeolithic tools and implements bare been found in the (South of India which was very probably the chief region of palaeolithic man to India. The tonls found there are made of quartizita and includa axes, chappers and knives. Pelacolithic man was most probably a cave-dweller, acquainted with the use of fire but ignorant of the use of grioding and polishing hie weapons. His hahits were nomadic for no habitations of the palaeolithic period have been found. The wooden club must have been his principal weapoo and he may have used hnws and arrows, spears and hurling stones. The dress ennsisted mostly of strips of hides and skins worn over the left shoulder and under the right arm so as to leave it free for action. The family organisatioo may have been matriarchal. Their speech was of a holophrastic type, i.e., the whole sentence, unbroken into words, formed one nait of speech. The numeroos dolmena in South India suggest that they may have cerved as grappines or places of burial in Prehistoric times. The rock paintings from Bellary, Edkal and Ghatsila suggest that the helief of palaeolithic Man was of an animistic and matgical kind and the remains in the caves at Soranny in the Dekhan indicate that he believed in and offered human sacrifice.

The Neolithic Age: It is generally believed that there must have been a lung and difficult interval hetween Palacolithic and Noolithic ages but in India there seems to have been no such hiatus and that the transition between the two ages must have been slow and gradoal. The weapons of Neulithic Age are polished, hence the name. Neolithic man need a great variety of weapons and tools. The Neulithio Age saw great advance in civilization "not only in the improved arms had tools, but view in the discovery of the net of firing the vessels

structed by skillful patters ant of plastic clay."

## THE STORY OF THE CAVEMAN

3

Neolithic Man shows a faither advance over his palaeolithic aacestor in the domestication of animals as indicated by the remains of hovine animals in neolithic sites. > Most probably horse, sheep and dog were the first animals to he domesticated and their meat together with corn and milk must have heen the main items of food in the Neolithic age. \_

The houses of Neolithic man must have been made of perishahle material for no remains of anch dwellings are found. The method of the disposal of the dead was cremation hut evidence which has now hecomo availahle points to burial us a more common method. Describingthe harial sites in Pudakottai State, Prof. Ayyangar says, "A carefal examination of the sites shows that dead men were buried in mud pits or placed in pots hefore barial."

"The dead maa was placed in a sitting posture in an eartheaware pot, the pot was thea let into a pit and half filled with sand, and rice and other grains on a tray were placed before the dead man. His stone tools were also inserted at the sides of the pot. The foodstuffs and tools were no doubt intended for the use of the dead person in his post-mortem life for the neofithias helieved in the life of the spirit after death. Then more end was poured iato the pot till it was full and the pot covered with an earthenware lid. The pit was then filled in and a stoue slab placed on it."

The pottery of the Neolithic period with its leaf patterns, lively drawings and painted fillets heare evidence of their artistic colour perceptions. Red, yellow, brown, purplish, grey and orange appear to be the favourite colours. The Iron Age: The Neolithic Age was succeeded by the Iron Age when civilization took a long stride towards protorhistoric times. The discovery of iron must have soon been followed by discovery of gold, silver and copper. The age saw a wider movement of peoples in commercial pursuits than the preceding ones and Prof. Maitra concludes that steel was imported from Iodia into Egypt as object of high value in those early times about 3 to 4 thomsaod years before Christ.

The pottery of the Iron Age in terms of Archaeological evidence is both numerous and varid. It shows a workmanship of a high order nud the painting is executed in a more subtle and artistic manner.

## FROM CAVES TO BUILDINGS

"""Molenjo Daro: Molenjo Daro, the Mound of the Dead, is a patch of barren land some seven miles by road from Dokri on the North-Western Railway and 25 miles from Larkana in Sind. In 1922 the spade of the archaeor logist revealed to an astonished world the remains of a civilization which was as highly developed as it was accient. Before the discovery of this site it was castomary to begin the ancient bistory of India with the invasion of the Aryana. From references in the Rigveda it was suspected that the indigenous population with whom the Vedic Aryanas had to fight was numerons. But nothing complimentary could be learnt from such description by its natural enemies. The archaeological remains not only confirmed the suspicions but revealed a civilization which was the foreramer of the Yedic Aryan

#### FROM CAVES TO BUILDINGS

Who were theso Mohenjo Darian ? That they were non-Aryans is self-evident. Their origin and identity have been a theme of controversy among scholars and consegnently a wide variety of opinions exists. Some have, with transparent serionsness, suggested that they were Vedic Arrans, others argued that they were Sumerisns After having closely examined all such theories Sir John Marshall concludes that the population\_of Mohenjo Daro included at loast four racial types and that civilization was the offspring, not of any one race in particular, but of several-horn perhaps, rather of soil itself and of the rivers than of the varied breeds of men which they sustained. Rev. Fr. H. Heras, after having deciphered the inscriptions from Mohenjo Daro expresses his well considered opinion thus: (1) that the Mohenio Darians formed a part of the great Mediterranean race; (2) their original home was probably Libya, whose people spread over the sonthern countries of Enrope and Egypt in its pre-dynastic days and which seems to have heen an important centre of culture in ancient times ; (3) this culture was brought to India by Libyans who were later called Dravidians and it improved hy their mixture with the Negritoes and Kolarians who wore inhabiting India at the time of their arrival.

There is not such a wide divergence of opinion regarding the age of the eivilization as it exists in the case of the identity of its anthors. "It is not unlikely" says Earnest 'Mackay, "that the site was established as early as the Stone Age". "Sir John Marshall is more precise, He describes the civilization as not earlier than 3250 B.C. According to Rev. Fr. H. Herms the period of the oivilization could hest to doscribed as from 5,000 B.C. to 2,500

The Mohenjo Darian were, in their political composition probably a collection of different tribes and political groups. Rev. Fr. Heras has described several such groups as the Minas, the Parsys, the Kavalas, the Velalir, the Almas, the Kolis etc. These different tribes were often engaged in internacine warfare which may have resulted in a constantly changing political pattern in the fortunes of Mohegio Daro and Harappa.

The city of Mohenjo Daro was carefully divided into wards. Possibly a service of police seems to have been in existence for the purpose of internal security by night if not by day. The City had an efficient Minnicipal organization and an excellent water samply and drainage system. The careful layout of the city roads and the grouping of honses indicate an efficient system of lown planning. The streads ware straight and fairly wide, running from east to west and north to south intersecting at right angles. The dity seems to 'have been planned, on the model of a Swastika and the purpose behind such a layout runts have been dictated by reasons of war strategy. The city was well-walled and the only entrance was through the gates.

The city was peopled by a variety of classes such as priests, physiciana, sstrologers, supervisors of state, municipal authorities, artizans and enlivators.

The existence of roads, atorehonses and granaries at Mohenjo Daro presupposes intense commercial activity. Well populated cities like Mohenjo Daro and Harappa could not have existed without extensive agriculture and *calkingtion of wheat* and further must have been the main . . . . The harvest was carried to the storehouses and saddle quern and Muller still were used for

ł,

## FROM CAVES TO BUILDINGS

grinding purposes. Beef, muttan, pork, poultry, fish and turtles along with milk and vegetables formed the main items of food of the Mohenia Darians. The humped hull, the hnffallo and the horse were the heasts of hurden and . sheep, elephants, camels, pigs and dogs were the other animals known to them. The dress consisted mainly of two long strips of cottan or woollen cloth. one worn round the loine covering the legs and the other thrown over the left shoulder and passiag under the right arm, like a loose shawl. It was fashionable to wear long beards and whiskers hat the upper lip was sometimes shaven. Ornaments were freely and prominently worn by all classes of society. Necklaces, fillets, armlets and finger rings were worn by men and women alike. The . ornaments of the rich were worked in gold and silver; the poor had presumably to be content with those made of oppner, heads, shells and terracota.

Axes, spears, daggers, bows and arrows, clubs and slings comprised the armonry of the Mohenjo Darians. The chariot was the principal means of locomotion on wheele and the walle round the city suggest a state of thorough preparedness for any hostile eventuality.

But it is in their huildiags that the Mohenjo Dariane reveal their sense of heanty and cultural stature.

Walls rising above the ground, exterior as well as interior, were built of burnt briek laid in mud or in mud and grysum-morior combined. The floora were ande of briek "either at flat or on edge the latter method being almost iavariable in the case of bath rooms and commou whereever the flooring was exposed or anbjected to excessive wear and tear." The bouses show a remarkable absence of decoration but it is possible that the decoration being made of perishable material like wood must hava disappeared in course of time.

The bouses were of different sizes according to the parpose for which they were huilt. The houses opened , on the road through a door which appears to he the priacipal means of admitting light, for wiadows are usu-' slly few and small. Practically all honces had adjoining welle sad bathrooms and rubbish chutes formed aa important part of the sanitary system. Private dasthias and public recepticles of rubhish and refuse were also coaveaiently placed at the sides of the streets. The roofs were flat and "were carried like the ceilings below them. on stont timbers covered with planking and heaten earth. with a protective course of brick, matting or other material between. The bonses generally bad two floors with the living and the sleeping rooms on the upper floor, which could he reached hy a ataircase from the coantryvard.

Batbing seems to have been an important part of a Mobenjo Darian's round of daily duties. The namber of bathrooms and the great public bath suggest so. The great bath according to Sir John Marshall appears to . been a vast hydropathic establishment fand the . all the temains uncerthed at Mobenjo

Daro. Its plan is simple; in the centre, an open quadrangle with verandahs an its four sides, and at the hack af the three of the vernndahs varions galleries and rooms; on the south, a long gallery with a small chamher in each corner; on the east a single rauge af small chambers, iacluding one with a well; on the north, a group af several halls and fair sized raams. In the midst of the open quadraugle is a large swimming hath, some 39 feet long hy 23 feet broad and sunk about 8 feet below the paving of the court, with a flight af steps at either cud, and at the faot af each a low platform for the cauvanience of hathers, who might otherwise havs fanad the water too deep". The layont and the construction of the great hath are almost perfect and indicative of the high degree of excellence attained by the Mohenjo Darians in architectural planning and execution ..

The Mohanjo Darian looksd not only earthwards but also heavanwards.

His religions beliefs suggest many similarities with certaia features of popular Hinduism. A large number of terracota tablets and figurines give us ample ovidence is forming a general idea. A figure who is described by Sir John Marshall as the "prato-type of the historic Shiva" tells us that Maheuja Dariaus were devotees af "Shiva". The God is "Three-faced, is seated au a low Indian throne in a typical attitude arf yoga, with legs hent double beneath him, heel ta beel, and toes turned ta front, resting on his knees. Fram wrist to shoulder the arms are covered with hangles, eight smaller and three larger; over his heast is a trianglar pectoral or perhaps a series of ueckless. . . and round his waist a double baad. The lower limbs are hare . . . crowing his heard is a pair of horns meeting in a tall head dress..." Many points from the ahove description are of engrossing interest; the Mohenjo Darian Shiva, for instance, is the direct preenrsor of the histotric Shiva and that asceticism was an accepted method of religious devotion. The existence of objects among the ruins at Mohenjo Daro which may he described as phallns and yoni, shows a wide prevalence of Phallus worship among the Mohenjo Darians.

Cult of the Mother Goddess :- Another important aspect af the religion of the peaple of Mohenjo Davo is their belief in and worship af the Mother Goddess. The Mather Goddess was very widely worshipped in the Near and Middle East in ancient times and fram the nummerans pottery figures found at Mohenjo Daro and Harappa it seems certain that such images were kept for purposes af warship in almost every hause in the Indus valley . cities, probably in a recess ar on a bracket on the wall. The commonest figure is that of a female, almost unde except for a short skirt fastened by a girdle to the loins and decked with much jewellery and a fan-shaped headdress. It is possible that the Mohenjo Darians regarded her as the "guardian of the house and the village". presiding over child hirth and taking a keen interest in the weal and woe of her worshippers.

The Mohenjo Darians. according to Rev. Fr. Heras, helieved in a Snpreme Being who was supposed to he the source of all life, symbalic of oneness and greatness, omnissient, benevolent, endowed with power of destruction and generation. He is epaken of as heing threesyed (i.e. capable of visualizing the past, present and .) and Fish-eyed. Hie emblems are the trident and n snake. The Mohenjo Darians also believed in a Divinė Triad,—An, Anil and Amma. Besides the Divine Triad the pantheon of the Mohenjo Darians included gods presiding over land, thunder, rain, death, the nether-world, the sna and other local and personal gods.

Temples: Relies, of an exclusively religions character at Mohenjo Daro though few, are significant. The picture of the temple carved next to an inscription on a terraceta tablet shows a small and square edifice. The rooting appears to be flat "but in the four corners four spikelike finials hreak the flat line of the edifice. In front of the temple there was an open space over which a double awning proteoted the worshippers from the sun and from the rain". The temple had servants, priests and temple guards. The mode of worship must have been of showing veneration to the tridant which was the emblem of God and spending time in msditation and reflection on his greatness and other attributes. Sprinkling the saared object with water, milk or soms such other object was also considered as an act of worship.

Human sacrifices: It is highly prohable that the Mohenio Durians believed in offering Human sacrifices. The number of persons so sacrificed, according to Rev. Fr. Heras appears always to be seven or twenty one, a multiple of seven. "Those persons" snys Fr. Heras, "who were going to be sacrificed were kept in prison for sometime and were supposed to be temple prisoners, and at least on one necession they were kept in a paine grove. The sacrifice was performed under the sacred-trees, though the netnal way of performing it is fant described. Two bhangis took the eorpses from the place of sacrifice to the hurning grounds." Disposal of the dead : Regarding disposal of the dead the Mohenjo Dariana may have followed one of the three ways (1) complete burials (2) Fractional burials and (3) Post-cremation hariala. In the case of fractional burials only "a portion of the bones was, collected and buried after the body had beeu exposed to beasts and birds. Many a time the remains of the dead were interred in earthen ware jars which were then buried. In the case of post-cremation burials the remains of a cremated body were deposited in burials ners which were afterwards buried. Gremation, however, nppears to be the naval method of disposal of the dead.

The extent of Indus Civilization: The uniformity of culture shown by the remains both at Mohenjo Daro and Harappa inevitably leads us conclude 'that the civilization—aptiy called the Indus Civiliration by Sir John Marshall—mark have beeu 'deeply rooted throughout Sind and the Panjab and nlready consolidated for long ages hefore it first breaks npou our nges.'' This civilization of the chalcolithic periond was indissolubly connected with other civilizationa like the Shammerian by community of idens and inventione. Thus the Indus civilization represents the billowing eddy in India of that mighty wave of civilization which aargod over many of the ancient nations of the world.

## ш

### THE NEW MAN APPEARS

The laborring spade of the patient archaeologist has unfolded before us the glory of Mahenjo Daro but the mystery surrounding its final abandonment and rnin still -zemains nasolved. What led the Mohenjo Darians to 'e their flourishing city t Was it some all envelop-

•

iog flood! Or was it a great natural convulsion like the one that stratified Pompei! Was it an invasion by a hostile horde which forced the natives to flee to no one upparently knows where! These questions cannot he auswered to duy and mnet await a reply till some firmer clue euddenly jumps into existence. For us Mohenjo Daro begins us un urchneological excavation and ends asun enigmu.

The next milestone on the long road of Indian history is the story of the people as told unto us by Rigveda. And what is Rigveda?

To the Hindu tha Rigveda ia a hook of divineorigin, a revelation (Shrati) par excellence, hallowed hy tradition and sanctified hy the unstituted awe of numberless generations. It is the most sacred of the sacred booke of the Hindus, its very name siguifying kuowledge or wisdom and chronologically the most ancient of all ancient Aryan compilations. It is a collection of a thomsand or more hymns and its sanctily and antiquity are as unique as its mode of transmission and preservation. till, comparatively recent times. In it breathes the christion

But who were these Aryans, who have left for the posterity such a unique collection of verses! It is génerally accepted that they were not nutcohthonous or were out originally the inhabitunts of India and there are some sound reasona to persume that they came from outside. The etudy of similarities hetween Sanskrit on the one hand and Greek, Intin, Avesta-Pehlavi on the other reveals a common linguietic substratum suggesting a common ancestral home. But as to where t<sup>erest</sup> original home lay there is no manimity among

13-

As different and widely separated areas as the Arctic, Mesopotamia, Kashmir, Bactria, Central Asia, Northern Enrope, Central and Western Germany and the region covered by Austro-Hnngary and Bohemia are proposed \* 'ns the original home of the Arvans. The most widely held view is that their arginal home must have been somewhere in Central Asia and due to causes natural or otherwise they were forced in migrate en masse in more spacious regions and warmer climes. Somewhere on the ronte they senarated into grans, one wending its way towards Europe and the other branching off in the direc . tion of Persia and India. Of this group some settled in Persia and the others penetrated into India by way of the passes in the North West region. They began to pour · into India at a time when the regions between the Indus and the heart of Persia were fairly well-watered and fertile. Hence it was possible for the early Arvan invaders to come in sufficiently large numbers' They may have entered India in one or several groups but the iontes did not seem to have been different.

The Aryans did not enter n geographical vacam in the Panjab. It was already populated with a people who were the partial of the populated with a people who were all the partial of the population. Naturall, and the population of the laud. In these battles the Aryans with their mobile artillery in the form at howmen driving in awiltly moving charicots emerged triumphant resulting in the part destruction and part subjugation of the original inhabitants who were called Dasyns or daeas by the conquerous.

And who were the Dasymst The Rigvedic descript tions of the people conquered by the invading Arynne suggest that the Dasyns may have heen Dravidians. They called of dark complexion, "nose-less" on fast-nosed.

15

"harsh" or of different speech, not affering the sacrifice or worship of the Aryan type hat phallas worshippers. As the Aryan hordes poored into India the "Dravidians" had to retreat further inland in face of the formidable and irresistible Aryan penetration into their land. They were not barharians for they are described as living in forts and cities with fortifications, and offered tenaciona resistance to the onsinght of the Aryans. Among them were prominent tribes like the Kikaths who contested the advance of the Bharnths towards the East and South-East. But the Aryan with his apperior strength, vigonr and armament enslaved some of them and drove the othera forther inland.

No one conclusive opinion exists about the date of the Aryan invasion, the highest suggested date being 6,000 to 4,000 B. C. (ascrihed to the composition of the earliest portions of the Rigveda on the strength of the astronomical data—Tilak, Artic Home in the Vedas). But 1,500 B. C. is a safer and cantelus date in firing the proper settlement of the Aryans into India.

The geographical horizon of the early Aryans was bounded by the river Rass (Arness or Jazartes) on the West, the Ganges on the East, the Himalayns on the North and the seas on the South. It included the fertile territory drained by the Indus and its tributaries extending as far south as the junction of the main river with its branches corresponding roughly to the present Punjab, the N. W. Province and the Knbul Vally. "We may assume", says Griswold, "that the Vedic settlements occupied the sub-montane region where the water is near the surface all the way from Kabul to Ambala and also followed the banks of the river some distance towards

#### STORY OF ANCIENT INDIA

the sea." The river Ganges is directly mentioned bot occe (R. V. VI. 75, 5) and though the Vedic people had some knowledge of the sea that koowledge was neither intimate nor coostant. The main features of the landscape were the rivers and the seven rivers are a point of very promisent reference in the Rigveda. With their migration into India there was a consequent changes is the climate affecting the Aryans for gooe were the long and dreary winters and the year, now shows three divisions of time or seasons, known as the spring, summer had autume.

Social Organization: The Social Organization of the Rigredic Arganization: The Social Organization of peoples—the Yados, Turvosas, Drohyes, Anna sod Parms are frequently mentioned ond even to have been the maio components of the Vedic Notico. Each tribe had a chieftain and monarchy in aome coses at least, was hereditary. The divisions of society io the main were two: the fair tall Argans on the one hand don't and flat nosed Dasyas on the other. Though costs in the modero seese of the word was yet anknown occopational classes seem to have been existing. They were there, viz., the Kahatriyas, Brahmanas and Vaisbyas.

The Kehatriya was the ruling class and the king was '.'. the Kehatriya par excellence. The Kehatriyas in their person combined the ruling and the warrior classes. They provided the rulers in times of peace and military -leaders in times of war. In short they were the favoured class.

The class which was to dominiate the entire Hindu dy and be the power behind the throne in Ancient

#### THE NEW MAN APPEARS

and Medicaval times was in the Vedic Age, as a class, just below the Kshatriyas. Priesthood was already developed before the Aryans entered India and the Rigveda mentions seven different kinds of priests-the Hotr. the rsciting priest who sang the composed hymns being the most important. The Aryans had a fairly complicated ritual with Soma offering and fire sacrifices and it was the job of the priest to see that the ritaal was properly performed. Apart from these priests, there was the Parchita . who was the domestic chaplaia to the king, as for instance Vishwamitra and Vashistha of Sudas and Devapi of Shantann. The Priests were rewarded in the form of dakshings from the king. The Kshatriyas and Brahmans. were clossly connected by ties of mutual depsadencs. The priest was dependent on the Kshatriya for honorarinm and the Kshatriva needed him for the sacrificial ritnal. \*

Vaishyas: The last and most numerons class was composed of the Vaishyas who were mainly occupied with agricalturs and industry. They had little to do with the political, religious and intellectual life of the age. Last of all cams the Shudras at the bottom of the social scale and differing from the Aryans in blood, colour and religion. They were the traditional workers, whose hounden dath it was to serve the Aryans.

"Religion: The religion of the Vedic Aryans shows the stage just atter the birth of the gods. The Vedic Aryans were keen in their observation of natural phenomena and childlike in their deduction of significance. Beyond every natural phenomena they postulated an agent through whose office the phenomenon made itself manifest. Their gods are in general personifications of

natural phenomena. They are celestial folk, the clan of the shining ones. Their halifant is in the sky and their proper nature, light. They are immortal having the attributes of wisdom, heattry, benevalence, righteonsness, and are the upholders of moral law in the Universe. Though they are many, they have a tendency to coaleste and their diversity, many a times merges into the unity of interdependence.

Moral Order: With the Rigvedic Aryans the conception of *Rita* was very familiar and their very gods are expressions of this Order in name in some form or other. *Rita* is translated as the course of things, nature or cosmic order. It is the uniformity of nature perceived by the first philosophers helpind the hewildering diversity of netaral phenomena and through this great conception of *Rita*, "the multiplicity of nature is reduced to a unity and the multiplicity of the gods (corresponding to the multiplicity of nature) is seen to reflect a single will because all are labourers together in maintaining a single all comprehensive cosmic order."

Rigvedic gods: Generally the Rigvedic Gods are classified into three groups (1) the celestial gods (2) the atmospheric gods (3) the terrestrial gods.

The Celestial Gods: Of the celestial gods, Dyus, which in essence means the eky is one of the oldest and most important gods. He is described as the father and sometimes even the biggest father, heaven and earth being his children.

Varuna : Varnna is the mast impressive and colourful deity of the Rigvedie Aryans. He is the king of all, yet gods and men; the self-dependent monarch, the

ť

Universal Monarch and one possessed of occult power, He rides in a car which shines like the snn and is drawn hy well-voked steeds. He is the all powerful one who inflicts disease as a reminder and pupishment of sin. He is pre-eminently the ethical god whose fellowship is broken by sin for sin is the transgression of the law of Varuna which is nuchanging. He is Omnipresent, and Omniscient, lord of life and death, whose will and ordinances are followed by the gods. But he is also merciful and gracions and grants protection and happiness to his worshippers. He is the Lord of the ethical Order which . is his distinctive province. He is n holv god and none oan share with him the power over moral life and destiny of mankind. He is chief among the group of gods called the Aditvas who may be described as the gods of celestial light. Their number is not definite for they are sometimes 6, 7, 8 and 12,

Mitra: Mitra is another god who is offen associated with Varuna. Mitra's eye is the sun who is another celestial god. Mitra's eye is the sun who is another horses numbering from one to seven. He is the dispeller of darkness, illuminating the whole world, measuring days and prolonging life. He is the soul of all that moves or is stationary.

Savitru: He is the god of splendour who drives in in his golden car with a golden pole drawn by brown white footed horses and raising his two golden arms' alott rousing and blessing all beings. He observes fixed laws while the water and the wind are subject to his ordinances. The most sacred stanza of the Rigveda the *Gayatri* is addressed to him.

Vishnu: Vishnu is subordinate god who came in much prominence in later Hindnism. His main achievements are his three steps or strides, which refer to the three stages of the Sun. He is constantly associated with Indra whom he halped in alying the demon Vritra.

Pushan : Pushan is a god who looks after the cattle and bring them back when gone astray and is essentially a pastoral deity. His cat is drawn hy goats instead of. horses. He is a special guardian of paths and knows the ways of heaven.

Ushas: The only female deity of the Rigvedia Age is Ushas, the Goddess of Dawn, extolled in hymns of unsnrpassed lyrical beanty. She is the daughter horn in the sky, brilliant, ehining, driving in a majestic chariot drawn by ruddy horses. She is the bonnyiful goddess who is often proplitated to grant wealth.

- The Ashvins: The Ashvins are the inseparable twins. They are wondrons, very swift, mighty strong, of great wisdom, and handsome. Their most important characteristic, however, is their power of healing for they are the divine physicians.

Atmospheric Gods:

Аx.

Indra: Indra is the warrior god, the national god of the Vedic Indians, the greatest god of the middle region, pervading the air. His weapon is the thunderbolt. With Vayu as his charioteer, ha drives through the air in a golden chariot. His favonite heverage is the Soma. His greatest heroic deed was the alaying 'of the demon Vritra who obstructed the waters. Indra fonght many other demons and the Vedic Aryans devonly thruned to him to protect them in their times of need. The Marnts, Rudra and Parjanya are the other atmospheric gods.

Terrestrial Gods:

Agni: Agni who is described as hutter-hacked, butter-faced, butter baired with reference to the ohlations which he receives and flame-haired, burning jawed, thousand eyed with reference to his flamee is of a domestic nature and is spoken of as a friend and a kinsman. He is the dispeller of darkness, nightfoes, hostile magic, demone and illnese. He dwells in the Vedi or fire-pit and is strengthened with fuel, ghee and Soma. He is a mediator and a meesenger between gods and men. He is the high priest, the intercessor and the judge, and one who correct mistakes in snorificial rituals. He is the priestly god as Indra is the warrior god.

Rigvedic ethics was essentially tribal ethics. All such behaviour as was conducive to the benefit of the tribe as a whole or would facilitate the regulation of social relations was naturally praised. Rigvedic ethics generally insisted on not to kill within the tribe or curve or deceive, gamble, or at least to cheat at gambling and induge immoderately in wine, anger or dice. The five moral obligations towards the clan or trible formed the pivotsl point in Rigvedic ethics.

Sacrifice : Sacrifice is a rite in which comething is forfeited or destroyed with the object of sconring divine mercy or favour or of establishing relations between a source of epiritual strenth and one in need of it. Sacrifice was a msin form of worship used by the Rigvedic Aryans. The escrificial ritual was already regularised and developed in the Indo-Iranian Period and the Rigvedic period saw further addition and elaboration. It is through sacrifice that an approach to the gods was songht and upon its proper performance depended the nature of the

favour granted. This resulted in the crystalization of a group of specialists employed in the ritual as the priestly class which became increasingly important.

Social Life : The prganisation of Rigvedic society was mainly tribal and within the clan or tribe the was family was the hasic nnit. The father was the head of the family. Women had an important and honoured position and their self development was not fettered by any of the limitations associated with their sex in later times. There was no sigma attached to woman-hood and they enjoyed a status of dignity, independence and conality. Child marriages were unknown and widow marriages common. The sacrifice had a religiona as well as a social significance for it was an occassion for a large gathering. Soma was the popular drink and chariot racing the favonrite sport. The warriors carried hows and arrows with the arrow-heads tipped either with born or metal and sometimes smeared with poison. The bowman wore some kind of protective armonr and heaides his normal equipment carried spears and javelins.

The people lived in houses built of wood with n compound or enclosure ull arnund opening into gates or wickets. The farnitre in such hnuses was simple and was primarily restricted th hedsteade, divans, stools and cots made either of split bambon m grass. The sents had enshions and the beds were made more confortable by using mattresses, pillows and coverlets. The dress of the people was made out of wull, cotton or silk according to the status and the to of the person. The dress of the men consisted of an oblung strip of cloth which covored -the lower portion of the body, an overgarment covering upper holt and a turban. The women also used some form of a turhan and with the addition of a veil their dress was essentially of the same as mens'. Fostwear made of grass or wood or leather was cammon and an umbrella and u stick completed the fashianable man's outfit.

Rigvedia economy was in the main agricultural. The Vaishyas as a class formed the hulk of agriculturists who produced the grain which along with meat and bear formed the diet of the people. Trade and commerce were not very important and harter was the best known methad of economic exchange. Large herds of goats, caws, buffaloes, horses and land canstituted the wealth of the nation. The political history of the Vedic period is almost hapeless in its vagneness. The Bharatas were the mast impartant of the Rigvedic trihes and were settled in the conntry hetween the Saraswati and the Jampna. They fought hath against their Aryan rivals on the west and the nan-Aryan enemies on the east. The Parns-another tribe-lived an the either side of the Saraswati and were neighbours and rivals of the Bharatas. The Anns were their allies against the Bharatas and lived on the Rawi with Drahyns to their west and the Yadus and the Turvashas prohably further santh,

Divodasu was a great king of the Bharata tribe and his descendant was Sudasa, the son of Paijavuna.-Divodasa successfully fanghi aguinst the Purus, Yadus and Turvashas un the one hand and the Dasa chief Shambara, the Pauis, etc. ou the uther. Sadasa had Vishwamitra at first as his chief priest, hut later an Vashishtha heing uppointed in Vishwamitra's place, it | led to a long and bitter rivalry among the two families.' Sudasa is celebrated for his glorions victories over the illegitimate child Vyasa who begot Diritarashtra-who was bora bliod-and Pandu and Vidura. Dhritarashtra was married to Gandharl, the danghter of the King of Gandhars and had 100 sons, the eldest of whom was Durvodhana. Pandu had two wives. Kunti, daughter of a Kine of the Yadavas and Madel, sister of Shalva, king of Madras. Kunti cave birth to Yudisthirs, Arians and Bhima while Nakula and Sahadaya were the sous of Madri. Dhritarashtra being blind, Panda became the king but after his death the former assomed charge of the Government. The five Pandavas along with their 100 cousins were brought up at Dhritarathira's court and edocated and trained in the art of war. The sons of Paodu always excelled the sons of Dheltarashira at displays of sports and games and this naturally made the latter very much jealons of the former. In due course Yndhisthira was appoloted the heir to the throne but scelag the exploits of the Paodyas Dhritarashtra leit appreheosive about the foture of his own soos and agreed to a plot hatched by Dorvodhana with the help of his triend Karna and his maternal uncla Shakuai. The Paodayas were hegolled into a house very skillfally built out of lac which was subsequently set on fire. But the Paodayas escaped and wandering from forest to forest went

## THE NEW MAN APPEARS

attracted the attention of the priestly class who might have been responsible for the addition of the didactio element to it so that finally the Mahabharata hecome not only just another Veda, but so important a Veda that to read it was to dispense with the need of reading any other Veda.

The Actors in the story: The main story of the Mahahharata deals with the deeds of the Kanravaa and the Pandavas.

Is the laad of the Bharatas raled a King named Shaatsnu, of the Honse of the Kurns. He had a soncalled Bhishma begotten by him from the goddess Ganga aad who was appointed as the successor to the throne. Some time later, however, Shantaau met a beautiful fisher girl Satyavati, fell in love with her and desired to marry her. Bat her father agreed to this only if Shantaan would appoint the son horne by Satyavati to the throne to which Shantaau would not consent. 'Bnt neither could he hring himself up to give up Satyavati. Bhishma, in the meanwhile learnt about his father's predilection and going to Satyavati's father not only renonneed his claim to the throne but also declared his intention to observe the vow of chastity so as to make it impossible to constitate any claim to the throne from his side. So finally Shantaan married Satyavati who bore him two sons, Chitrangada and Vichitravirya. Chitrangada was killed , ia n battle with a Gandharys and after Shantann's death Vichitravirys succeeded in the throne. But as Vichitravirya died childless Bhishma was requested to beget descendants hy the anrviving widows of Vichitravirya in - accordance with the ancient enatom of levirate. 'This Bhishma refused to do. Then Satyavati remembered her

ten allied tribes of the Pnrus, Yadns, Tnrvasas, Anus, Drahyus and others. Sndas also defeated the non-Aryan tribes of the Ayns, Sigroa, Yakshas united under a king Bheda who attacked his kingdam from the east bat Sudasa quickly refirred and defeated them on the Jamuna. He was not only a great warrior but a scholar as well and tradition credits him with the composition of the 133rd hymn of Tenth Book. Shantanu is another King mentioned in the Rigveda. His priest Devapi performed a rain-inducing sacrifice for him.

. But the name of the Bharatas is immortalised by the great epic Mahabharata. The position of the epic in onr ancient literature is unique. For it is not only an epic, a work of poetic art hut also a manual of morality, law and philosophy, supparted by the, most heary tradition and as such possessing unimpeachable authority, in a word as the late Dr. V. S. Snkthankar has so aptly put it "the substance of our collective nnconscions." But the Mahabharata has become so with several additions and depositions, alterations and adjustments. Essentially it is a story, story of a great and bloody hattle fonght between the Kauravas and the Pandavas which resulted in the rain of house of the Bharatas. The original Bharata describing and restricted only to these heroic and destructive deeds was but only a quarter of its present size. In the earliest period of its composition the Bharata must have contained both the story in the form of the lays and at later date their nnion was rendered possible as soon as the lay formerly snng was disassociated from music and repeated as a heroic tale of antiquity. This nnion was " foundation of the present spic. The story by its very s must bave proved immensely popular and

attracted the atteotion of the priestly class who might have been responsible for the addition of the didactio element to it so that foally the Mahaharata hecoms not only just aoother Veda, but so important a Veda that to read it was to dispense with the need of reading any other Veda.

The Actors in the story: The main story of the Mababharata deals with the deeds of the Kaoravas and the Pandavas.

In the land of the Bharatas ruled a King named Shantanu, of the Honss of the Knrns. He had a soncalled Bhishma begotten by him from the goddess Ganga and who was appointed as the successor to the throns. Some time later, however, Shantaou met a beautiful fisher girl Satyavati, fell in love with her and desired to marry her. But her father agreed to this only if Shantanu would appoint the son horne by Satyavati to the throns to which Shantanu would not consent. But neither could he bring himself up to give up Satyavati. Bhishma, in the mesowhile learnt about his father's predilection sod going to Satyavati's father not only renounced his claim to the throne but also declared his intention to observe the vow of chastity so as to make it impossible to coostiinte any claim to the throne from his side. So finally Shaataan married Satyavati who bore him two sons, Chitraagada and Vichitravirya. Chitrangada was killed in a battle with a Gandharva aod after Shantann's death Vichitravirys succeeded to the throne. But as Vichitravirya died childless Bhishma was requested to heget descendants hy the surviving widows of Vichitravirya in accordance with the ancient contom of levirate. 'This Bhishma refused to do. Theo Satyavati remembered her

illegitimate child Vyasa who hegot Dhritarashtra-who was bern blind-and Panda and Vidura. Dhritarashtra was married to Gaudharl, the daughter of the King of Gandhara and had 100 sons, the eldest of whom was Daryodhaaa. Panda had two wives, Kunti, daughter of a Kine of the Yadayas and Madri, sister of Shalva, Ling of Madras. Knoti gave birth to Yudisthira, Arjuns and Bhims while Nakula and Saliadeva were the sous of Madri. Dhritarashtra being bllad, Pandu became the king bat after his death the former assumed charge of the Government. The five Pandavas along with their 100 consins were brought up at Dhritarashtra's court and educated and trained in the art of war. The sons of Pandu always excelled the sons of Dhritarashtra at displays of sports and games and this naturally made tho latter very much jealous of the former. In due coarse Yndhisthirs was appointed the helr to the throne hat seeing the exploits of the Pandyas Dhritarashira fell apprehensive about the future of his own sons and acreed to a plot hatched by Durvodhana with the help of his friend Karna and his maternal uncle Shakuni. The Pandayas were begalled into a house very skillfully built out of lac which was sabsequently set an fire. But the Pandayas escaped and wandering from forest to forest went to the Kingdom of Pauchala where Ariana ontdoing all - the other compititors married Dranpadi. This and many other event like the regaining of the Kingdom by the Pandayas, the game of dice, the banishment of Pandayas led finally to a war which was fought very bitterly for 18 days and which practically resulted in mutual destruction. This is brief is the story of the Mahabharata.

The story of Ramayana, the other great epic of dia deals with the life of Rama, bis star in the forest for 14 years, the abdaction of Sita by Ravana who is killed by Rama and their happy return to Ayodhya.

Though many of the epinodes in the Mahabharata may smack of the supernatural and the fantastic, it cannot be guinsaid that the story of the Bharata war has a historical fundation and may be tentativly dated in circa. 1,400 B. C. But what is of interest to us is not so much the historical material in the epic as the social,  $\sim$  economic and religious conditions revealed by it.

Political Conditions; The India of the epic period reveals the existance of a number of peoplee, clans eettled in email patchee of territory. Politically they were independent of each other though ethnically and in matters of religion they were bound by identity or similarities. These clane were often at war with each other which resulted in adjustments in the proportioas of their territories from time to time. Many of them were monarchical in constitution but republican states were not rare. Monarchy, where prevalent was hereditary and in the republican states the councils of tha eldera managed the affairs of the state. Generally the cluns 'living on the borders of the Aryan colouies were republican. The King had an absolute power of punishment and he personified the rule of instice.

The Kuru Kingdom: The kingdom of the Kurus, which was incidentally, the most important aad powerful in the epic times, extended from the Saraswati to the Gauges and was divided into three parts: (1) Kurujangala (2) Kuru, and (3) Kurukshetra. The capital of the kingdom of the Kurus was Asandivant. The Kings of the Kuru race belonged to the Pura-Bharata family aad Parikshita who lived in the 9thcentury B. C. was the first historically important king of Aucient India. Ha is referred to in the Vedas, the Mahabharta and the Puranas. He was learned in the science of the duties of kings and was credited with many nohle qualities. He was a bighly intelligent ruler, a great here, wielding a power in low and never missing his aim. Under him the country was prosperons, tranquil and happy. He was married to a Madras princess and ruled for 24 years, dying at the age of sixty.

Janameiava : Parikahita had four sous (1) Janamejaya (2) Bhimseua (3) Ugrasena, and (4) Shrutasena. Janamejava the aldest, after Parikshita's death succeeded to the throne. He conquered Taxila where hs is supposed to have performed the serpent-sacrifice. The conquest of Taxila must have been preceded by the extension of his sway over the country of the Madras or Cantral Punjah. He is also reported to have performed two horse sacrifices which were the occasions on which he had disputes with the Brahmans. After Janamejaya ruled Satanika, Asyamedhadatta, Adhisima Krishna and Nichakshn in succession. During the reign of Nichakshu the Kaurava capital Haatinapura was carried away by the Gauges and capital was now transferred to Kanshamhi. In the following period through a series of calamities which they enffered the Kapravaa lost their importance and the political centre of gravity was shifted to Videha.

King Janaka of Videha: The most prominent and notable figure of the period was King Janaka, the philosopher King of Videha. Janaka is described as a Samirat (Supreme King) and as anch must have wielded consi-~derable power. The Kingdom of Videha corresponded y by to the modern district of Tirhnt in North Bihar in the 7th century B. C. when Janaka ruled. The capital of Videha was Mithila, identified with the small town of Janakapura just, within the Nepal border. Janaka was famed for his patronage to culture and philosophy. His cont was througed by philosophers from Koshala and the Kuru-Panchala conntries.

With the story of Janaka we have moved on almost to the 7th century B. C. While these tribes were fighting for political supremacy and kings were enthroned and dethroned, in the lonely forests were seen the rethring figures of the hermits and sages who entirely unaffected by the turmoll of political straggle were lost in meditation and stambled apon a unique discovery that almost revolutionized India's thought. About this great discovery more in the next chapter.

# 'IV

### THE GREAT DISCOVERY

THE interval between the nge of the Rigveda and the epic times witnessed the growth and development of political, economic, social and religious conditions. Rigvedic polity shows that Indo-Aryan trihal society was being slowly transformed into the aggregate of trihes or the 'folk'. The tribe, in the Rigvedic period was divided into a number of social groups called the 'vishas' which meant either a territorial division or else a communal group. The government of each tribal unit was usually vested in a monarch whose powers, were regulated by the tribal assembles. The trihal society, as we have already seen, was divided into classes. Gradnally the king emerged as the most impartant personality almost invested with an anno f divinity and this synchronised with

~

The epic also reveals the existence of small states ruled over by kings. The Kshatriya as a class is still the most important element in pulitical life. The classes in Rigvedic society now tend th harden into fixed divi- . sions but such barriers as separate them are neither irrevocable nor constant. The function of racial evuthesis is going on ppace and Aryan snciety shows many a diffe- . reut feature as a result of amendment to etbnic ideas " forced through the passage of time. The geographical horizon has considerably widened and now we see the Bharata kingdom impinging upon almost the very nerve . centres of Madhyadeaha with most interesting consequences. Social enstoms and economic conditions are undsrgoing a constant process of evolution consequent upon the onward infiltration of the Aryans.

In the sphere of religion the intervening period shows a very complicated development in the sacrificial ritual. A new feature is the growing number of hermits frequenting lonely forests either for the regular and uninterrupted performance of sacrificial ceremonies or for the proper performance of meditation and ascetism. This growth of the agerificial ritual is most clearly reflected in the liturgical literature of the Brahmanas and the Atharva Veda mirrors with high fidelity the effects of ideological adjustments due to racial fusion.

. But it was in the philnsuphical sphere that the passage of centuries saw a most significant discovery which can aptly be described as the great discovery. What this great discovery was we ahall now see.

The 27th Hymn of the First Mandala of the Rigveda contains a prayer to Agni (Fire) which reads follows :

"With reverence I shall worship thee who art long tailed like a horee, Agni the king of worship.

May he our son of strength, proceeding on his broad way, the propitious, become bountiful to us.

Thus protect us always, then who hast a full life, from the mortal who seeks to do us harm, whether near or a far.

And mayest thou, O Agni, announce to the gods this our newest efficient Gayatri song.

Let us partake of all booty that is highest and that is middle; belp us to the wealth that is nearest.

-O god with bright splendour, thon art the distributor. Though instantly flowest for the liberal giver in the wave of the river, near at band".

Then the first chapter of the Aitareya Brahmana of the Rigveda declares thns:

"They offer the Agni-Vishnu rice cake which helongs to the Diksbiniya Ishti (and pat its several parts) on eleven potsherds. They offer it really to all the deities of this (Ishti) without foregoing any one. For Agni is all the deities and Vishnu is all the deities. For these two (divine) bodies Agni and Vishnn are the two ends of the sacrifice...Here they gay, if there be eleven potsherds on which portions of the rice-cake are put, and (only) two deities. Agni and Vishnu, what arrangement is there for the two, or what division? of eight syllables and the Gayatri is Agni's metre... The Hotr must recite seventeen verses for the wooden sticks to be thrown into the fire."

Now the following extract is from the Chhandogya Upanishad.

"All this is Brahman. Let a man meditate on that (visible world) as beginning, ending and breathing in it (the Brahman). Now man is a creature of will. According to what his will is in this world, so will be be when he has departed this life. Let him therefore hava his will and belief.

The intelligent, whose body is spirit, whose form is light, whose thoughts are true, whose nature is like ether (omnipresent and invisible), from whom all works, all desiree, all eweet odonrs and tastee proceed; he who embraces all this, who never speaks and is nover emprised.

He is myself whithin the heart, smaller than a corn of rice, smaller than a cora of harley, smaller than a mastard seed, smaller than a canary seed or the kernel of a canary seed. He is also my self within the heart, greater than the earth, greater than the sky, greater than heaven, greater than all these worlds...myself within the heart, that is Brahman."

The three extracts quoted above epitomise, the trends of thought in three distinct epochs. The hymn from the Rigved a hring a out the salient characteristics of the philosophy of the people. It is enlivened with childke simplicity and poetics grasp. The Rigredke rishis observed the natural phenomena like thunder. "toning and rain and the wonderful nature and

# THE GREAT DISCOVERY

brilliance of fire and it is power over darkness. Theypersonified the powere of nature which in virtne of their, greatness and etrength became their gods. We saw earlier how the Rigyedic gods fall into , three regular, and distinct classee. These gods are divinities only in a energine sense for "though called 'gode' they are necessarily conceived in a human mould and are regarded. as being actnated by the same motives and passions as the persons that conceive them." "They are necessarily anthropomorphic and point to a conviction that "the visible world is not in itself final and that there is a reality lying hidden beyond it. Maxmaller describes these ideas as henotheistic meaning thereby that each . god is addressed "ns for the time heing the only god in existence with an entire forgetfulness of all other gods." Another characteristic of the Rigvedio gods is that they are surprisingly close to mainre and are not completely personalised.

The Conception of Rita: The Conception of Rita hee a place of importance and significance in vedic thought. Rita originally meant uniformity of nature or the ordered course of things such as is indicated by regular occurrence of natural phenomena. The vedic gods are essentially the agents who maintain the cosmic order and the order of moral law, the latter sense heing the natural outcome of the former. When once this common truit or tendency in the different gods was observed it was not difficult to nrive at the unity of the godhead and vagne hints of such a conception are already given in the Rigveda.

While vedic thought was developing on : indicated above the religion of the people was ming a more complex nature. Sacrifice was :

### STORY OF ANCIENT INDIA

method of propitiation and in course of time the ritual of sacrifice was characterised by auch complications that it produced a naturally sceptical reaction. Sacrifice, in the heginning, was means to an end but as time passed it threatened to become almost the end in itself. Thinking minds consequently questioned its efficacy and the reaction came in the form of Upanishadic appendations.

The Upanishads :. The Upanishads are a body of texta coutaining ideas ao hold and varied that the age that produced such a literature may justifiabily he desorihed as an age of intellectual revolution. The Upanishads are as many as two hundred in number but hardly more than a dozen are of primary importance. Thesa may generally be regarded as pre-Bnddhistic and ahow a a aimliarity of method and conclusions. So different are tenor and name of these conclusions that we may justify regard with Dr. Daagupta that "the pressage of the Judian mind from the Brahmanie to the Upanishadic thought ia probably the most remarknel event in the history of philosophic thought."

Non-Brahmanic Influence: So different are the Upanishada in their holdness of approach and atarthing nature of conclusions that scholars have not nunaturally taken them to lie the embodiment of Kahatriya thonghit as opposed to Brahmanic speculationa. We read of Brahmanaa going to the Kahatriyas for the highest knowledge and it is probable that the Upanishads incorporate the philosophy of non-Brahmanic achools which has nltimatly found its celumination in the hands of the Brahmans.

Two Central Concepts: "All the thoughts of the "Upanishads", observes Denssen, "move around two fun-

# THE GREAT DISCOVERY

damentel idens. These ere (1) The Brahman nnd (2) the Atman". These two terms are generally so nsed ase to engrest synonymity but instances in which they are fundementally used in contradictinction to each other are eignify the inner essence of the individuel ns well as of the whole world and us each cannot be considered esparate from each other, but whenever the difference is congit to he made Brahman means the eternal principle and Atman the semic principle realized in ourselves.

Atman: The stymology of the word "Atman is douhtful and the development of its meening has gone through three distinct stages—(1) breath. (2) soll (3) self. The origin of the conception, however, could be songht in the later Vedic tendency of viewing the whole world as a cosmic individual. Atman, in the worde of Sir S. Radhakrishnan "is the enhiect which pereists throughout the changee, the common fastor in the states of waking, dream, sleep, denth, rebirth and finel deliverance. It is the simple truth that nothing cen destroy. Death doee not tonch it nor vice discolve it. Permanence, continuity, unity, eternal netivity me its characteristics. It is a world cell complete. There is nothing ontside it to set ngeinst it."

- -

35.

of the universe, the power which presents itself to us materialized in all existing things, which creates, sustains, preserves, and receives back into itself all worlds, the infinite eternal divine power. And this Brahman revealed itself as Sat (being) chit (thought) and Ananda (Bliss).

Atman-Brahman; (1) Thus by un analysis of ull subjective and abjective pheaomena the Upanishadio thinkers arrived at the concepts of Atman and Brahman. To them Atman the self of man consisted "in the traly objective, which can never become an object. It is the person that sees, not the object seen. It is not the knadle of qualities called the "Me"but the I which remains beyond and behind inspecting all these qualities." Then through a supreme and memorable sween of intuition emerged the epoch-making concent that Brahman is Atman. The enqueiation of this doctrine which could be simply expressed by the countion-Brahmaa = Atman was so revolationery that it marks the most important advance in the whole history of philosophy. The hold declaration of these thinkers. that the Individual no well as the world are the manifestation of the same reality and are therefore. essentially one forms the pivotal point of subsequent Indian thought. In this single utterance Tat Tyam Asi (that thon art) are fased two distinct entrepts of thooght the one resulting from the desire to understand the true unture of man and the other, that of the objective world and the fasion of two such ontwardly different but inwardly nimilar conceptions into one is the chief point of Upanishadic thought.

Ethics. The discovery of the identity of the subjective with the objective, Atmau with Brahman had . "natural repercussions on ethical ideas. The basis

.

# THE GREAT DISCOVERY

of Upanishadic ethics is to be found in the conception . of evil, not us transgression of the rule of the gods or negligence of sacrificial ritual ns in the earlier times but as the result of a mstaphysical error which sees variety slone where there is also the unity of Brahman.' Empirical thought, failing to grasp the ultimate reality, distorts it or ents it np into parts and presents them as distinct from one nnother. Evil is due on the practical side to this mistaken view of renlity as finiteness is on the theoretical side. Hence along with this change in the ethical concept was n similar change in behaviour. No longer was sacrificial ritual regarded as the way to the Beyond but the removal of Aliamkara, the inculcation of detachment (Vairaeva) training through Shravana, Manana and the Ninidhyasana resulting in self-realization is the direction given by the Upanishadas in the ethical-sphere. Moral conduct according to the Upanishads is self realized . condact, "if hy the self we mean not the empirical self, with all its weakness and valgarity, selfishness and smallness, but the deeper nature of man; free from all fetters of selfish individuality."

#### STORY OF ANCIENT INDIA

## TOWARDS AN EMPIRE

THE srory which was narrated heretofore was essentially of the tract of land that was, more or less, completely aryanized. But now the scene shifts and we turn towards Madhyadesha, or to be more precise to Magadha.

"Angadha oconpiesa naiqae and proud place in the annals of Ancient India. The land which, schood the spirital wand ethical teaching of Gantama, the Buddha and Mahavira, the Jina, aaw in its passage of time the ilee and fall of mighty monarchies. But more important than these political associations is the Aryan-non-Arayan cultural complex which alwaye permicates the history of Magadha. In its historical, accial, religious and philosophical make-np the land preaents ahsorhing prohlems of primal diversities and ultimate cynthesis. At the time the vedic Aryans were making efforts to penetrate eastwards Magadha prohahly contained a population charactorised hy peculiar ideas and customs of its own.

The land that acquired anch unique fame in later centuries was not looked upon with favour by the vedic Aryans. The Magadha was thonght fit to be a sacrificial victim and fever is wished way to him by a bymn of the Atharva Veda. The Magadha ie regarded as a close friend of the Vratya and a Brahmana living in Magadha is called a Brahmana by courtesy only. All these indications clearly show that vedic times Magadha was inhabited by a people with an unvedic civilazation and an unvedic Aryan-if not non-Aryan-calture. The signifcance of it must be, then, sought in the fact that Magawas not fully Brahmanized then. Thus it is that we find that the teachings of Gantema, the Buddha epread with so much comperative case in Megedha and it is also significant that it was in this land that the final transition from tribe to an empire took place.

The Four Kingdoms: With the passage of time Magadha was slowly becoming the contro of political activity. The Peli Buddhist texts often mention the four kingdoms and the sixteen peoples. The four kingdoms were of Magadha, Koshala, Vatsa and Aventi.

Magadha : The cepital of the kingdom of the Magadhas was Rajagriha. Bimbisra, a contemporery of Gautama the Buddha ruled over it. We know that Bimhisara had at least three wives (1) Kosledevi, sieter of Pasenadi of the Koshalae (2) a Videhan lady from Mithila mother of Ajatashatrn, and (3) a Licehavi princess from Vaishali. He is reported to have ascended the throne at the age of fifteen and rnled for fifty two-yeere. He was a devotee of the Buddha and helped much to further the growth of his creed. His death was a sad one for hie son Ajatashatru, who succeeded him, tortured him to deeth. At Bimhisara's death Kosaladevi died of grief and her hrother confiscated the village of Kasi which was given as pinmony. This enraged Ajateshatra who declared war upon Pesenadi. At first he was victorions hut was later taken captive. Ajatshetrn then geve en underteking not to resort to violence again, was released and in order to seal the new friendship Pesenadi gave him his daughter Vajra in marriage. He also made war on the Licchavis of Vaishali end through the treechery of a Brahmana Vassakara destroyed them. He fortified his capitel Rajagriba apprehending an attack by Pradyota of Avanti but we do not know whether it ever

and a management of the second s

#### TOWARDS AN EMPIRE

wrapped about with strips of cloth and deftly painted, and turned it loose on the bank of a certain lake near the country of his enemy. Within the belly of the elephant sixty men walked hack and forth: every now and then, they loaded their shovels with elephant dung and dumped it out. A certain woodman saw the elephant and thinking to himself, 'inst the thing for our king.' went and told the king, 'Your Majesty, I saw a nohle elephant, pure white even as the peak of Kelasa, just the sort of elephant your Majesty would like.' Udayana set ont after the elephant, recited the spell bnt it failed to work on the wooden elephant. In the meanwhile Pradyota, with his army closed in upon him, had him arrested and thrown into a prison. After this he went and caraonsed for three days. Udayana came to know about the king's caroansal , and expressed contempt at the hehaviour of a king who kept another king in prison and made merry. Pradyota . heard this, came to the prison and agreed to release Udayana on the condition that the charm he revealed to him. After a little hesitation Udayana agreed to teach the charm to Pradyota's daughter. Pradyota told his danghter that the teacher was a leper and to Udayana that his pupil was a hunchback. This was done evidently to prevent them from falling in love with each other. So the tnition started with the teacher separated by a screen. Mispronunciations certain words by Vasavadadatta, the of pnpil, provoked Udayana into saying; 'Dance of a hunchhack,

materialized. Soon after his father's death, we are told, he went to see the Buddha and a long conversation ensued which is recorded in the Digha Nikaya. He built the fortified town of Patliputrs which later on became the capitsl af Magadha. His reign lasted for thirtytwo years.

Koshala: The Kingdom of the Koshalas was ruled over by Pasenadi who was also called 'Agaidatta. He was edacated at Taxiia, the famous scat af learning, and as a ruler gave himself whaleheartedly to his administrative duties and valued the companionship of wise and good men. He was a prominent fallowsr of the Buddha and his close friend. He kneely desired to be matrimonially connected with the Shakyas who, kowever, cheated him by giving a slave girl Vasubhukhuttiya in matriage to him. This so much angered his son and anceessor Vidndabha that he declared u war on the Shakyas and massacred thasm. The capital of the Koshalas was Shravasti.

Udayana: The Kingdam of the Vatsas-was raled over by Udayana, the hero of many heraic and romantic legends. How he caatrived ta marry Vasavadatta the daughter of Pradyota of Avahti is a charming story. King Pradyota, nicknamed the Fierce, of Avanti, we are told, ane day asked his minister whether he knew of any other king who was as mighty and glorians as him. The minister told Pradyota abaut Udayana af Kanshambi. This enraged Pradyota who wanted ta have Udayana arrested. This, the minister pointed aut, was not easy as Udayana kaew an elephant charm by using which he could drive away elephant. Then the king suggested a

# TOWARDS AN EMPIRE

wrapped about with strips of cloth and deftly painted. and turned it loose ou the hank of a certain loke near the country of his enemy. Within the belly of the elephant sixty men wolked hock and forth; every now and then, they loaded their shovels with elephant dnng ond dnmped it ont. A certoin woodman saw the elephant and thinking to himself, 'just the thing for our king.' went \_and told the king, 'Yonr Majesty, I saw a nohle elephant, pure white even as the peok of Keloso - just the cort of elephont your Mejeety would like.' Udoyano set out after the elephant, recited the spell hnt it foiled to work on the wooden elephont. In the meanwhile Prodyota, with his army closed in n pon him, had him arrested ond thrown into a prison. After this he went and carsonsed for three days. Udayana came to know abont the king's caroansal and expressed cootempt at the hebaviour of a king who kept aoother king in prison and made merry. Pradyota ·heard this, came to the prison ond agreed to release Udayana on the condition that the charm he revealed to him. 'After a little besitation Udayana agreed to teach the chorm to Pradyoto's daughter. Pradyota told his donghter that the 'teacher was a leper and to Udayana that his pupil was a hunchhook. This was done evidently to prevent them from folling in love with each other. So the thition etarted ~ with the teocher eeparated by o screen. Mispronunciations of certoin words by Vosavadadatta, the pupil. provoked Udayona into coying; 'Dance of a hunchhock, your lips are too thick and your cheeks too pndgy. I have a miod to beat your face in. Sav it this woy.' Then Vasavadatta replied in onger 'Whet do yon meon by those wordel \_ Do yon call such as I a hnnchheck? Villain of a lepper that yon ore.' At this Udayana lifted the fringe of the curtoin

and behold, instead of an ugly hunchback he eaw the charming and beautiful Vacavadatta. So surprised was he that the worde 'who ara you' could hardly pass his lips. 'I am Vosavadatta, the daughter of Pradyota of Avanti' replied the maiden. Now the trath was out. There was no more learning for her and teaching for him and so madly were they in love with each other that impatiently they made bold plans of running away together. Udayana bid his time and one day mounting a fast elephant escaped with Vasavadatta. The king's guards followed him but he hod token leather hage full of coine with him from which he scattered the coins on the ground. While his pursuers delayed hecause, of their greed for silver. Udayana reached his own stockade, built without the city, and lived happily ever after.

The Sixteen Peoples: Besideo these four great .kingdoms the Fali books mention tweive elans: (1) Amgs, Ksel, Vajji, Mala, Cheti, Kuru, Panchala, Maccha, Saresena, Assaka, Gandhra and Kamboja. The instie more or less tribal and not geographical. Nicet of the kings mentioned in the foregoing peges were devoted followers of Gautama, the Budha who ived and greached in the same age. Numerons are the occasions when the Pali books refer to the visits of these kings and their conversation with the 'Light of Asia'.

Bat first we shall see how he started his life before Gantams became the "Light of Asia".

all tbrough the centuries after his death. Gleanings from the earliest accounts reveal that Shudhodana, a petty Shakyan chieftain with hie enpital at Kapilavaeta, was hie father. Gantama was born in the Lumhini forest and after seven days after his hirth his mother died. After the death of his mother he has brought up by his mother's sister. He was brought up with the same pomp and glory as would any Indian prince be brought up in those days. Three palaces were huilt for his nee: one for summer. the other for the winter and the third for the rainy ecaeon. In these values he event his days surrounded by female dancers and musicians in idle nothings and undisturbed peace. At a young age he was married to Rahnlamata (known as Yashodhara in later accounte). Soon Gantama tired of the melancholy succession of the days of eloying bappiness and was disturbed and restlese. Then on various occasions, while out on pleasure drives, he saw an old man. a eickman, a dead hody and a recluse, eights which he had never eeen hefore. These turned his thoughte from pleaenre to the fundamental problems of here and hereafter. The gentle mumnrings of diesatiefiction assumed in course of time, a definite form in the shape of his resolve to become an ascetic. Then news came that a son was born nuto him, and his resolve became firm. shorn of all traces of hesitation, and looking on his wife and child in their jewelled chamber for the last time be left the limits of the town, shaved off his hair and beard and adopted the life of a wandering religions beggar. Now he wanted to make an anending effort to understand life and its problems for which he had abandoned the trappings of royalty and opulance for a life of few wants and fewer vexations. His. first step in this direction was to apprentice bimself in turn to two teachers Alara Kalama and Uddaka "

#### STORY, OF ANCIENT INDIA

patta, who he thought may provide an answer to the disturbing thoughts of his mind. They did not satisfy him and he turned away from both of them. Then still in the search of the Right and in quest of the excellent road to pence heynnd enmpare, he wended his way to the camp township at Uravela, sat himself ander a under a fig tree in contemption of deliverance. There he reflected nn the cansea leading to this all pervading misery called existence and found a way out of it in the form of his concept of Nirvana. Soon after this event of epoch making significance he went about preaching his doctrine from place to place for 45 years, during - which time he wielded his monastic organisation into a unique force in many respects. Then at the age of eighty he laid down that last hody of his hetwizt the twin shala trees in Kushinarn and passed nway into Parl-Nirvan with his last message to his followers scarcely ont of his lips: "decay is inherent in nll component things work out your salvation with diligence." 21 35511

His personality: The portrait of the Baddka as revealed in the Pali books is that of a towering personality. He was a man af atately build and royal mein. He had a rich and resonant voice and there was always on his face that instre and glory which come of supreme peace. He was affahle and of un equalite temper which he rarely lost even under extreme provocation. He was a master of the art of quick *repartee* and a ready story teller of numsing and sarcastic tales surcharged with obvious moral preaching. He was an excellent diner ont and was always sought by kings and commonera alike. He was n feariess oritie nf the Brahmanas and their iteaching and ridicaled the meaningless pomp of the saclitual of the of the out-moded Vedas. From his inunmerable ntterances we get a picture of a rational thinker and a confident reformer, a prince turned a religions wanderer and a philosopher turned a moraliet. Indeed it was his magnificently unique personality which contributed in no less a measure to the wide spread of his system winning for it royal favour and popular support.

His Teaching : The fundamental basis over which the very super structure of subsequent Buddhist thought is formed is the acceptance of unending misery as a concomitant condition of life. The Buddha presumee that life and all that is associated with it ie nothing bat pain and proceedine from this starting point, he strives to discover nn escane from this all envolping corrow. Having accepted this central fact of sorrow, he inquires into its canse and promptly comes to the conclusion that ignorance-abject ignorance-is the prime cause of it. As an answer to the problem of the starting point of sentient existence he formulates the Four Noble Truths of enffering, its origin. its cessation, and the Noble Eightfold Path, The Buddha's most important contribution to contemporary thought is his formulation of the four noble trnths and the theory of dependent origination. The theory in all probability had been at least, in parts, borrowed from contemporary ideas in the Samkhya system but the originality of it lies in the complete cycle it attempte at present. Ignorance, 'it says, leads to confectione (Samaskaras) which in turn produce concionsness, sense organs, contact, sensation, perception, grasping, existence, births, old age; disease, and misery. To dispel ignorance is to acquire the means to Nirvana. Practically the adherent must

.

# STORY OF ANCIENT INDIA

lead an ideally moral life and intellectually beyond every sentient phenomenon he must perceive impermanence, misery and absence of a lasting entity foonlessness).

Nirvana: The summum bonum of all spiritnal exertion according to Buddhist thought is Nirvana. Nirvana is explained as a complete extiaction of all such causes which make themselves maaifest in existence. It means no more coming back to this world of suffering, a state beyond good md evil, heyond huppiness and pain, beyond proving and quietitnde. It is in fact the state indescribable.

Ethics: Enddhist thought is essentially of an ethical nature and philosophy, at least in the early stages, is bat incidental. Buddhism, as it started, was an ethical monastic movement and the problem of moral living is the central pivet of all Buddhist philosophy. Buddhist conception of moral living is embodied in the Noble Eight-fold Path which isys an overwhelming emphasis on right speech, right action, right livelihood, right exertion, right recollection and right mindfalness. To his disciples the Buddha says, thon shalt not stend, thon shalt not live a life of impurity or lying or driaking intoxicating liquors."

The Sampha: Religious mendicants leading n life of seclusion and picty and wandering from place to place was not an isolated phenomenon in Gantama's daya. The Palisacred texts speak of anoth holden as the Parivarajakas who wandered singly or in groups and took up their temporary abode in houses or thuts set apart by good laymen. Many of them practised their own theories of holy living bat more often than not they followed the

-

#### TOWARDS AN EMPIRE

eachings of a single master and were called Samphas or gangs. We are told of six such teachers who had their own groups. The history of religious mendicancy can be traced to a more remote antiquity than the time immediately preceding the rise of the Buddha and it is more than prohable that the Buddhist monastic order was modelled on the existing systems. But the pecularity of the Buddhist system lay in this that their monastic order had hetter solidarity and regularity and represented the maximum organization in Hindu religions life and "was pervaded by a spirt of intense localisation." As time went the rules of admissioo and initiation were formulated on , a very distinct basis. The Bundhist Samgha had a compiste control over the discipline and conduct not only of the group but also the individual and as such was armed with various rules and regulations designed to meet any contingency. VIt was with the help of such an organization, parhaps the first of its kind in the religions history of the world, that Boddhism contrived to live and spread practically all over India and the far east.

Mahavira, the Jina: The teaching of Mahavira, the Jina are a product of the same intellsctual reaction as Buddhism and the Upfanishadic thought. Another characteristic which Jainism shared with Buddhism was that it was primarily a Kshatziya religions movement and us such was a protest mgainst the senseless sacrificial slanghter and the extravagant pretensions of the Brahmanical priestly class.

Vardhamana Mahavira, the founder of Jainism, according to traditional accounts, was the son of a nohlsman Siddhartha of Knndapara, or Knndagarama, a subarb of Vaishali. Siddhartha was well connected

with the then ruling aristoeracy through ties of marriage and we are told that Trishala his wife was a sister of the king of Vaishnli. Mehnvira seems to have, made good use of his position in the propagation of his creed in Inter years. Vardhnmena' lived in the house of his parents till their death, after which he sucoeeded along with his brother Nandivardhuna to whatever principality they bnd. He was married to Jushoda and hed from her a daughter called Anoja. or Privadnrshena who wus married to Jamali. This Jamali wes, in the enrly year, a prominent disciple of Mahavira but later on ended in heing openly hostile to his father in law. At the age of twenty eight Mahnvira took up the spiritnal life und for twelve yeurs thence practised dire ansterities after which he declared himself as the Kevalis or the Perfect One. The last thirty years of his life he paesed in tenching his religions theory to the people and organising his order of ascetics. For some years he was a close associate of Makkhali Gosala. another religions teacher of the time, but this friendship came to an end on account of certain doctrinel differences between the two philosoners.

Jis Teachings: The Upadishads maintein that Being is one, permanent, without heginning, chenge or end. The Jainns, on the other hand, hold that Being is not of a persistent and unilterable nature and is "joined to production, continuation and destruction". "This theory, call the Indefinitences of Being (Anckanicvada); it comes to this; existing things me permanent only as regards their substance, but their accidents or qualities originete and perish. To explain; a material thing: continues forever to exist as matter. This matter howover, may masume any shape and quality. It is clear that

Brahmanical speculations are concerned with transtcondental Being while the Jain view deals with Being os given in common experience."

"Different from matter and material thinge are the sonls. There is an infinite number of them and they differ in size according as the body they occupy is large or small. Their characteristic mark is intelligence, which may he observed by extrinsic cances, but never destroyed. They are of two kinds; mundane and likerated. The former are the emhodied souls of liviog heings' in the world and who are subject to rehirth, the latter are emhodied no more and they dwell in a state of perfection on top of the niverse. They have reached Nirvana."

<sup>5</sup> The Jalpas regard alimsa as their highest duty. They helieve in Karma which they designate as of eight, types. The highest goal, according to them, is to get rid of all Karma and to acquire no new Karma and finally to pass away into Nirvaoa. To this end their ethics is deeigned and includes' right faith, right knowledge and "right cooduct. They also enjoin apon the followers the observance of the five youre which are very much similar to the Baddhist commandments.

Jainism, like Bnddhism, was in the heginning confined to Magadha. While Bnddhism through a powerful organisation and with the help of royal patronage was able to spread far and wide Jainism did not smoceed in winolog as many followers but anlike Bnddhism even today has many influential votaries in India.

 Udayin: But to return to the story of Magadha The successor of Ajatashatra is mentioned by the Puranas as Darshaka and Naga-Dasaka by the Ceylon chronicles. He was enceeeded hy Udayin, who during his father's reign ruled as a viceroy at Champa. Udayin was snceeeded by Nandivardhana who was followed by Mahanadin. Namea of Munda and Amrındaha are also mentioned but no difinate information is possible today. The kings of Magadha attor Bimbisara, according to the Mahavamisa were all parrieides and the effizens in anger drove them away, banished the dynasty and raised an -official called Shishunaga to the throne.

Shishunaga: Shishunaga, according to the commentary on the Mahavamsa was a son of a Licehavi raja from a courtesan. He reigned for 16 years. His greatest achievement was the destruction of the power of the Pradyota dynasty of Avanti which sebsequently left the power of Magadha without a rival and thus prepared the ground for the beginning of Imperial Magadha.

Kakavarna: Kakavarna who succeeded Shishunaga is described as good to his objects, a hater of Brahmanas and a great non-believer. He was a Buddhist and the second Buddhist Council was held during his reign in the capital, which during his father's rule was at Rajagriha, but was now transformed to Pataliputra. He seems to have suffored a violent nud tragit end.

Successors: Kalashoka nr Kala Varna was snc.. ceeded hy his ten sone who are snpposed to have ruled simultaneously. The Paranas tell us that the Shaishu.' nagr's were supplanted hy the Nandas.

JMahapadmananda: The first Nanda king was Mahapadmananda who is deacribed by the Paranas as born of a Shndra mother. Curtis, the Greek historian. says that the first Nanda was an indigent harher, who heing not uncomely, in uppearance had gained the affections of the queen af the last Shaishnunga. Through her influence he gained the confidence of the reigning monarch. Afterwards he treacherously mundered the king and under the pretence af acting as guardian to the voyal children usurped supreme authority. Bana in his Harshacharita says that Kaka Varna, 'the last Shaishnnaga had his throat cut in the viscinity of the city. Mahapadmanundu was also knuwn as Ugrasena.

The Paranas credit the first Nanda king with the destruction of Kahatriyas and describe him us the sole monarch of the earth, probably meaning thereby, that he had overthrown all the dynasties like the Ikshvakus, Punchalae, Kashi, Haihayus, Ashmakas, Kurus, Maithilas aud Shurasenas. Khuravela in his Hathi Gumpha inscription refers to a Nanda Raja in such therms as to indicate Nanda sovereignty over Kalinga which fact would not entirely rule out Nunda couquest of Ashmaku and other regions lying further south. The first Nanda had not only a big empire under his control but also a a huge army and a full treasury. According to Curtis, he had 20,000 cavalry, 200,000 infantry, 2000 four horsed chariots and 3000 elephants. He seems to have ruled for 25 years.

Mahapadma was encceeded by his eight sous who ruled in auccession. They are assigned only 12 years. The last Dhana Nanda met his death at the bands of Chandragapta Manrya, helped by his famone minister Ohanakya or Kantilya. No detaile of the dynastic revolution are available, but it my be surmised that Kantilya was helped by Brahmanas and the people for,

.

we are told that the Nanda king was detested and held cheap by his subjects.

The Persian Invasions: In the first half of the Gih century B. C. the North West portion of ladis presented a tempting epectacle ton foreign invader. There were various small states which were hostile towards -noth other and <u>Oyrne</u> (522, 436 B. C.) ancceeded in establishing his hold over a considerable part of the North-West territories. Xerros (486-456 B. C.) continued to maintain the hold in the Gandhara region. Politicially the effects of the Persian Invasion where almost negligible, but in the caltaral sphere, the introdention of the Kberoshti alphabet, the Persepolitan capital in Architecture and the format of the Ashokan Edicts hetray Persian influence. pressed the spirits of the Macedonians that they clamoured to go hack home. Thus the only effect of Alexander's raid was the setahlishment of' several Yavana settlements in the North-West Provinces of India. But the indirect effect was not small. Though Alexander's thundering legions had hut scarcely clawed the fringee of Bharata Varsha, they produced one very desirable effect. The petty states, often at cross purposes with one another, had their power destroyed. The logical sequence of which was the glory of the great Manryas and the still greater Guptas.

## VI

# ✓<sub>THE FIRST EMPIRE</sub>

WITH the advent of the Maurya dynasty Ancient Indian history emerges from the ages of legend and eaga and entere an era of sarer historical tradition and known chronology. The Maurya dynasty, unique though it is in many respects; is preeminently remarkable inasmuch as it is the first Magadhen dynasty to establish a evareign Indian empire and give it a strong sense of historical unity and political cohesion.

Chandragupta Manrya: Soon after the retreat of Alexander from the ontermost fringes of India Chandragupta, the Maurya, encompassed the extinction of the then ruling house of the Nandas, nsnrped sovereign power and became the first hietorical emperor of India.

 $\int$  Origin and Early Life: The rise of Chandragnpra was so sudden and dramatic that he has been described as an adventurer, a seeker of political fortune and a man of hase hirth soaring suddeuly into preeminence. A thick growth of insinnation and legendary tales has deepened the mystery surrounding the rise of Chandragnpta. The Commentary on the Pali chronicle Mahavamsa tells us that Chandragupta was n son of a Manrya ohieftain who was killed in a petty war. | Chandragupta'e mother escaped to Fataliputra and when he was born, managed to give him over to some cowherds. One day he was seen playing at dispensing instice with his playmates in a wood by a Brahmana called Chankya who, taking a fancy to him, took him over and gree him an intensive and extensive education at Taxila. After this the Brahmana recruited an army for Chandragupta who started raiding operations and gradually made himself the mater of India.

The Brahmana, Chanakya, alao kuôwn as Kautilya, waa Chandragupta'a mentor and gulde. He ia the reputed anthor of the Arthushastra and haijed from Taxila. He was well versed in the Vedas but was of an humble appearance. When, ozce, be had gone to receive charity instituted by the last Nanda king he was iasulted and aent away on account of his nglineas. He, then swore vengeance on the house of the Nandan and worked ceneelessly to realize his object which he did with the help of Chandragupta.

VThe Arthashastra: The Arthashastra, as its name suggests, is a treatise on the ocience of politics. The treatment of the oubject and its nature indicates a long formative tradition behind it and of which the book evidently is the culmination.

As we have it today the book is divided into fifteenn large sections and one hundred and eight sub-divisions. — After indicating the general lines on which springe a " be educated and trained it describes in detail the vosition of the government with all its attendant

. 1

hranches. Graaf attention is paid to all the implications of military strategy lika the proper employment of espionage and schemes of attack and defence. The hook gives an idea of the high and efficient development of tha Maurya system of administration.

The Pali books tell ns that Chaadragapia came from a Kshatriya nohle family of the Mauryas. The Greek authors say that he was of humbla origin but do not .call him bass-born. The Paranas refer to tha Nandas with feelings of scant conrtesy hat say nothing about his hase birth. The Arthashestra ideal of a king as described by Chanakya is decidadly against a basa-born monarch. It is only the commentator of the Paranic text who insinuates that Chandragapta was low born and the same is repeated by the drama Mudra Rakshasa. But all reliable evidence is not definitaly in favour of dubbing him as base born. The Mahaparinirvanasutra of the Digha Nikaya, one of the most ancient portions of the Pali canon, refers to the Manryas as a Kshatriva clan. "It tharefore practically certain" says Dr. Raychaudhari, "that Chandragnpta heloagad to a Kshatriya community, viz., the Moriya (Manrya) clan,"

Chandragupta mnst have usurped the throne in 322 B. C. For the next few years he was husy spreading his empire to the east and the west. In 304 B. C. he défeated Selencos who made hold to try a raid into India hut was unsuccessful. In exchange for 500 elsphants Chandragupta added four satrapies of Aria, Archosia, Gedrosia and Paropanisadai i. e. Herat, Kandahar, Makran and Kahul to his dominions and thus secured for his empire that usture frontier for which India in future was to sigh in vain. Generally speaking by 320 B.C. he rid India of the Greeks and excepting the attempt hy Selencos he was not hothered by any more Greek adventares.

Chandragnpta's empire included the tract called Madhyadesha and extended as far as Persia in the nonth-west, Kathiawar in the west and Bengal in the east. Tamil tradition gives some indication that his sway also extended in the sonth.

The administration of Manryan India was highly developed and efficient. The king was the sapreme head of the state and wielded, in theory, extensive autocratic powers though in practice his conduct was regulated by the laws, of *Rejadharma*. For the correplence of administration the empire was divided into viceroyalities; that of north-western India with ita capital at Taxila, of western Indis-capital Ujjain, and the aoath with the sent of government at Savarnagiri. These viceroyalities were in the charge of the princea from the ralling family who were assisted hy provincial and district officials.

Gity Administration: The responsibility for the administration of the city rested with a high minister called *Pararaysvaharika*. Then there was the municipal comission consisting of <u>six hoards</u> with five members on each. These boards were as follows: (1) The board\_for\_infarities which mainly dealt with anhipets relating to the industrial nrts. (2) This board was responsible for watching the foreigners and looking atter their needs. (3) The third board was in charge of vital statistics. (4) The fourth was the board of

regulating and supervising all commercial

weights and measures. (5) This board supervised over the trade in manufactured nrticles. (5) The sixth heard collected tithes on sales which amounted to one-tenth of the profit.

✓ Finance heing the mainstay of the government particular attention was paid to the collection of roveuue. There was a special officer oharged with the collection of rovenne called Samainta or the collector-general who was paid a anlary of 24,000 panas per annum. He was responsible for the proper collection of duties from mines, foresta, cattle, roada of traffic and land revenue. To assist him in this task he had many amperiated attest working under him.

We are told by Magnathenes, the Greek Ambassador at the court of Chandragapta, that irrigation was an object of dne government attention. The officer in charge of irrigation had to "superintend the rivers, measure the land and inspect the sluices hy which water is let out from the main canals into their hranches."

Justice was administered by duly constituted courts working under the authority of the government. There were lower and higher courts and a case dealt with by the lower court, if found unsatisfactory to either party, was referred to the higher court. The judges were usually appointed by the king.

· [Military administration : The Manrya army was formidable and constituted a very efficient and ruthless striking force. As in the case of civil matters the administration of the army was very carefully designed. The king was the supreme commander and immediately under him was the commander-in-chief. There was a

regular war office in charge of military administration. Then there was a commission of thirty members divided into six boards, each with five members. Each board was in the charge of an officer known as the Adhyaksha. The six boards were : (1) Navy-The admiral was in charge of naval administration and the fleet included hoth the river borne and sea borne armadas. (2) Board of transport commissariat and army service. (8) Board of Infantry. The normal equipment of a foot soldier was a bow and arrows besides he carried sword, spenr and buckler. (4) Board of cavarly. The cavalry force numbered about 30,000 horses. (5) Board in charge of elephants. The Maurya army had a compliment of 9000 war elephants. Each elephant carried four men incluing the driver and (6) Board of war-chariots. Thus the total strength of the field force of the Mauryas would come to 1,50,000 men.

J Megasthenes: The Greek envoy at the court of Chandragupta, Megasthenea, has left ns a description of Maarya administration. His description of the city of Fntalipntra is especially of inestimable value. Pataliputra, according to him, was the largest city of the empire extending 9½ miles in length and 1¾ miles in breadth. It was surrounded hy a ditch and n wall with 570 towers and 64 gates. The king had a gorgeons and majestic palace with extensive parks and specions conrtyards. The king was always gnarded by specially chosen female gnards and nppeared in public only on four occasions, in time of war, to sit in court as n jndge, to offer sacrifice and to go on hunting expenditions.

According to Jain tradition Chandragapta, in his <sup>3</sup> age, abdicated in favour of his son and, became a moul. He seems to have diad in Mysore. He ruled for 24 years from 323-2 to 299-8 B. C.

Bindusara : After Chandragupta's desth in 299 B. C. his son Biudusara succeeded him to the throue. Compared to Chaudragupta's raigu of 24 years, full of uchla deeds of conquest and empire building. Biudusara's reigu of 25 years is almost a blauk. He must have come to occupy the throne iu 298-7 B. C. and ruled up to 273 B. C. Like his illustrious father, Biudusara maiutained frieudly contacts with the Hellauistic kings and wa have u half himmorous and half revealing enisode which tells as that Bindusars-known to the Greeks as Amitraghatarequested Selencos Nicator to seud him sweet wine, figs, and a philosopher: the philosopher heing politely refused as sophists were not on sale in Greece ! It does not. seem prohable that he made any additions to the empireand the task of maintsiging it jutact in itself must haveheen an ardons one. According to Tarauath, the Tihetan historiau, however, he was a great soldier and congueror and extended his empire to the sonth of India. Chanakya, the same authority tells us, continued to he his advisor and acting under the advice of the "Manrya Bismark" Biudusara 'extended his empire further into the East and the West. He had at his court a Greek envoy called Dsimachos who evidently encceeded Megastheues.

# ASHOKA U. 9.00

It Obundragupta earned for the Maurya dynasty au empire, Aeboka gave it undying fame. The life of Ashoka is indeed antique in many respects and his place in the galaxy of famous emperors is high and almostunrivelled. Early Life: Ashoka succeeded his father Bindusara in 272 B. C. The story of his early life like many an Indian monarch nf abtiquity is vague and indefinite in details for the stone and pillar inscriptions which speak so eloquently about his creed and actions are remarkably reticent with regard to his early life. And hence we have to do what we can and fashim nut a connected narrative of his early years from niten contradictory and stultified legends and tales obvinnely coloured by partisan interests.

The Divyavadana, a Sanskrit Buddhist work which belongs to the northern division of Baddhism, narrates a tradition that a Brahmana woman of Champa was doing the work of a harher for the Manrya king Bindasara who finally married her. She, according to this source, was the mother of Aslioka. According to the tradition preseryed in the commentary on the Pali chronicle Mahavamsa Ashoka's mother was much under the infinence of an , Ajivika teachar called Janaana. If this he helieved then it becomes much easier to explain as to why Ashoka continued to support other creeds like the Ajivika and the Jains even when he was an ardent Buddhist. The Mahavamsa says that Ashoka had 101 brothers. Immediately after his father's death Ashoka put tu death his 99 brothere and became the king of India. The name of Ashoka'e mother, says the Mahahodhivamsa, was Dhamma while his brother was called Tissa. In his yonng days Achoka was a vicercy of the province of Avanti and had his headquartere at Ujjayani. Ħе married a Shakyan girl called Devi from whom he had a son named Mahendra and n daughter Samghamitra. His son and daughter later became Buddhists and were "ent as missionaries th Ceylnn fur the propagation of . . in that Island.

L

That Ashoko murdered all his brothers oud waded. through a sea of fraternol blood to the throne appeors to be too fontastic ond baseless for we find him referring to his brothers (though iodirectly) in his inscriptions. The Ceylonese chronicles mointoin that there was an intervol of four years 'between Ashoka's occession to the throne and his coronotion This interval hos been a topio of controversy among scholars. But if the Ceylonese tradition he properly analysed it will be found that it has two parts which are not strictly related to each other. The first part is concerned about Ashoka's slonghtering his brothers which moy be rejected' ontright os the occount is evidently iospired with the desire of showing the contrast in charocter of Ashoka hefore ond ofter his conversion to Buddhism. No suchreoson exists for the second part. Heoce it can he occepted that some sort of disputed soccession was involved and his coronation was delayed for some time.

His Queens and Sons: Ashoko in one of his inscripticos mentions Kurnvaki os the second qoeen. The Mahavamsa mentions two more, Devi ood Asandhimitro. . Asondhimitro lived for thirty years and ofter her deoth Ashoks made Thisyarakshita his chlef qeen. Kurovaki was also known ss Tivaramoto. Besides these queens, he seemed to hove had some purdah ladies in his palace as was customary with ancient Indian kings. He had at least four sons who were appointed viceroys of the outlying provinces. down by Ksutilya in his Arthashastra. The time-tahle was proportinately divided between hours of dicharging' kingly duties, study and amasement. He kept a rich table and hefore he turned Buddhist many animals were slanghtered for the royal kitchen. He was particularly fond of peacock's fiesh and this delivacy was continued to be served for some time even after he sholjshed others.

His Empire: The extent of Ashokas's empire was practically the same as' that of Chandragnpta's with the additional conquest of Kalinga which proved a turning point in his enser. The locations of his edicts indicate the extent of his empire. Ashoka refers to his dominions as wide and mentions people like the Cholas, Pandyas and Keralas who enjoyed a state of semi-independence. In the weet his empire extended to the Kathiawar penineula and Sopara on the Bomhay coast. The Mysore copy of his inscriptions shows that the empire may have included that part of sonth India and the N. W. honndary is suggested by the Shahaazgarhi inscriptions. Bengal was an integral part of the empire.

Washoka's conception of kingship was of a paternal type, for he considered all men as his children. His huge empire was divided into provinces and over the important ones persone of royel blood, like the *Kumaras* were appointed as Viceroys. Four such Viceroys were appointed with headquerters at Takshashila Ujiayini, Tosali and Suvernariti. The King was in intimate contact with his people through the Parishad or the supreme Assembly. The Viceroys had under them district offleers called *Hahamatras*, who, in turn, were assisted by subordinate offleers like the Pradeshikas, 'Yuktas end Rajukar, The Rajukas were judicial öffleers

#### THE FIRST EMPIRE

63

with wide anthority. The edicts refer to another class of officers who are called Palizas or agents. Every city was administered by Nagala visolakas, who may he equivalent to a commissioner and had indicial powers. The King was constantly kept informed by a hody of men called Palivedakas The officers, especially of the higher endre, were ordered to go on five yearly tours for the purposes of inspection. They had to see that the lower officials were not and any harsh to the people and that the King'a ordérs were followed in letter and spirit. Justice was administered on the hasis of equality before law by the Vyavaharikas. The king on special days ordered the release of prisoners and ho also gave certain specia. facilities to persons under trial.

Ecnomic Conditions : The pivot of economic life in India has always heen agriculture. The hulk of the King's revenue came from taxes on land and its produce. But the other professions also were in a : flonshing condition and considerably supplemented the ngrarian produce. Trade and commerce were in a very flonrishing condition and were organized into gnilds. The gailds had their own laws and trade disputes were often settled hy gnids and corporations. The alderman, whose office was often hereditary, was a leader of such gnilds. The gnilds were constitutionally recognized and had representation at the court. The price of mercantile goods was fixed by the governmeht and all commercial transactions were under the constant supervision of a superintendent of commerce. He was specially instructed to show favour to all those who imported foreign merchandise and instances of foreigners importing articles of trade from ; countries were very common. Ports like " 1-1

-

nnbhumi, Bharakaccha, Sanrashtra and Alexandria are a matter of common reference. Places like Beaares and Mathura were famous for aiks and Nepal bhankets were a special favourite with inland traders. Prodaction and eale of hides and skiae of deer and goats and hemp, flax and wool yaras were also widely practised. Magastheae base drawa a very informative thumbnail-sketch of the castams and manners of the people. The Iadiaas, he eays, all live frugally. Theft is of very rare occurrence. They live happily and are simple in their maaners. Their rohes are worked in gold and oraameated with precions stoaes, and they have a high regard for heanty and avail themselves of every device to Improve their looks. Trath and virtuo they hold alike in esteem.

The Social life of the people was mainly centred round the Samajas or occusions of festivity. Entertainment at such gatherings consisted of mneic, dancing, wrestling and other gymnastic feasts, like riding elephaat and horse, lifting a standing maa on one's choulder or display of trained animals. Touring actors would give dramatic performances base on the lives and deede of valour of ancient heroes. Before the promulcation of the orders for the annoression of all such festivities excepting those solely inspired by religious motives by Ashoka, liquor and gamblian ware a necessary adjunct to sach fairs. A superinteadeat of liquor strictly regulated its sale. Gambliag was generally done with dice and was also controlled by a Governmeat Saperiatendent of gambliag. He sapervised over the use of proper dice and issued licences to gambling houses. All this changed with sarprising rapidity on Ashoka's coaversion to Buddhism. Life was more

strictly geared to spiritual ideals and liquor and gambling were anhsequently hanned.

Position of Women: During the Mauryan spoch Buddhem was gradually sneeseding in exercising a liberal infinence on the social life of the people. Buddhism, heing a reformist movement was fundamsutally against the Caste System and Caste ns we know of it today was yet in the womb of the future. Buddhism was epscially liberal in its attindle towards women and during the Mauryan times women enjoyed such freedom so es to render their subservience to the male esx almost nominal. The system of polygamy was widely prevalent but the position of women both at home and a latroad was always characterised by dignity.

The reasons which led to the one and the only war in the carser of Ashoka are not quite clear. - It is not definitely known whether Kalinga, prior to Ashoka's risign, was part of the Mauya dominions. But the rone of the Kelinga edict would imply its rising in revolt which was rathlessly suppressed by Ashoka. In moving end revealing terms Ashoka speake of the terrihie holocenst and carnage wrought in terms of captives maimed and dead on the battlefield Kalinga. But with the captives, Ashoks's sggressive amhitione were effectively pinioned once and for all, with the maimed ones his heart bled and with the dead a new king wes born.

,

operated with the Samgha for the rapid spread of the Buddhiet way of life.

Ashoka's Dharma : "The dharma promulgated by Ashoka", observes Dr. Rhys Davids, "was the dharma for laymen, so generally held in India, but in the form, and with the modifications adopted by the Buddhists". His religion-Law of piety would be a better rendering-ie characterieed hy broadmindedness, toleration and a certain ecclecticism. It was morality and its tranelation into practics in terms of life. He believed in the other world and the effect produced hy virtue and sin on life hereafter. He had no patiencs with empty rituals and low apperetitions and exhorts his people to show "proper conrtesy to slaves and servants, ohedience to mother and father, liberality to friende, acquaintance, and relatives, to Brahmanas and Shramanse and abstention from killing animals".' Snmmarised in his own words his law of morality would be briefly stated thus: Morality includes few\_eins, many virtuons deeds, compassion, liberality, trnthfnlnese and purity.

Asboká's conduct as an ideal Buddhist layman r' perfectly in keeping with his claime. Soon after his conversion he visited the holy places of Buddhism nund in his 26th regaal year enlarged the ethna of Konagamana, a previoue Buddha. Ho was actively interested in the work of the Buddhist order of monke and nune' and was closely associated with the ecclesionical affairs of the Buddhiet community. He strove hard to preserve the anity of the Samgha and did not hesitate in use his imperial office for that purpose. He directed that the lay-worshippers should visit the Samgha on every

#### THE FIRST EMPIRE

fasting day and thus offer close co-operation is followiag and spreading the law of the Baddha.

Ministers of piety : Bnt Asboka was not coateat with the formal expression of his imperial opiaiou. In order to, see that the peopla properly followed his views and duly translated them into action be instituted a new class of officers of state known as the Dharma Mahamatras. It was the bounden duty of these officers of morality to supervise over tha marol hehavionr of his subjects. Thay wera also coacerned with the establisbment of proper amity between the various sects then existent. These officers were ordered to see that the Baddhist Samgha was not threatened by schisms and all such tendencies were rigoronsly panished. Ashoka was reputed to be a grear doaor aad it must have devolved upon these ministers to see to the proper distribution of gifts to the various religious establishmente. Ashoka also had trees planted on the roadside and wells dag at specific intervals. He established hospitals for mea and animals and had medicinal herbs planted. All these acts be coastrued as acts of dbarma and the - morality officers must have been instructed to organise a proper maintenance of all such wells and hospitals.

Was Ashoka a Buddhist? "Ashoka way" says Dr. 'Mukerjee, "humanity's first teacher of nulversal morality and religiou". It is generally presumed when speaking about Ashoka that ha was u Baddhist but certaiu omissions of a strictly doctrinal nature like Nirvaua and the four uoble truths in his edicts bave led some scholars into believing that the dharma preached and followed by Ashoka was not specifically Buddhist. Prominent among these may be mentioned as Rev. Father Heras

and following him Prof. Dikashitar. It must he clearly stated that Ashoka's Bnddhism wus what then had been understood as the religion of the Bnddhist haity which was somewhat different from the code laid down for monks and nuns. In one of his ediets Ashoka has openly declared his faith in the three jewela of Bnddhism. As healting an ideal lay devotee he went on n pilgrimage to the holy places of Bnddhism. His solicitude for the unity of the Samgha, his references to the Bnddhist sacred texts, all these are numistakable indications of his Bndhist faith. Though a Bnddhist he was tolerant towards other faiths and openly and freely made donations to Brahmanas and ascettes, Brddhists and Ajvikas.

Missions of Ashoka : In keeping with his religions ferronr and prosolytising outhnaisam Ashoka despatched missions to countries and atsate outside the horder's of India; to the Greek King Antiochus, Alexander and Magna, Cholas, Paudyas and Ceylon. What happened to these missions and how far they were successful we are not in a position to state but about the authenticity of these missione there can be no doubt. Prohably they represented a combined expression of Ashoka'a goodwill and attempt to apread his way of morality among the peoples concerned.

The name of Ashoka figures very prominently in the coclesiastical annals of Pail Baddhism as the convener of the third conneil. In all, we are told, there were three conneils and the last was held ander Ashoka's patronage. These three councils held during the period immediately after the death of the Buddha to the time of Ashoka serve as important landmarks in the ecclesiastical history of the oreed. Soon after

•

the deeth of the founder, we are told, fissiperous tondencies in the Samgha hegan to manifest themselves. This necessitated the convention of an assembly of all the prominent disciples which was held at Rejarriha. This assembly, we are further told, recited and colleted all the atterances but its authenticity is serionsly questioned by schnler like Oldenherg. But there is nothing imprnhehle in the Buddha's disciples meeting together and colleting his teechings an as th guard themselves against spurinus interpretations end internoletions. A hundred years after the first chuncil nt Reisgriba came off the second conneil at Vaisbali. The eirconmstances sorrounding it were more torbulent than the previous nue. The Vajjin monks, it appears, prnmnlgated the use of certain orticles in a manner specifically forbidden by the Buddha. The senior munks remonstrated them hat it was af no avail. The recalcitrent monks argned that their actinn was quite in keeping with the teaching of the master and in order to refute this contentinn the second conneil wes celled. .It met et Veisheli and condomned the action nn the part of the Vsjjin monks. This conncil, like the first, is not nnenimonsly eccepted ns histnricel. The third conneil. necording to the Pali chrnniolo Mahavamsa, wes held during the reign of Ashokn. The immediete reeson fur . convening the conneil wes, that tempted by the genefons treetment eccorded to the Sampha by Ashoka. many heretics entered the order end consequently it being impure the Uposatha (the fortnightly meeting ) could not be held. Ashoka came to know about it and ordered thet Uposatha he immedietely held. A minister of his bungled the tesk and a number of monks . were killed, st which the King wes much perturbed.

•

After this event the Samghn was purged and under the presidentship of Morgalipatha Tissa, who is the author of the *Katha Vatthu* the third Assembly was held. This account is fall of contradictions and absurdities. Asheka in his edicts never once refers to such an assembly. But it is possible that such a council may have heen held after Asheka's death and by its very nature much have heen a purely sectarian affair.

Buddhist Sects: The rise and growth of Buddhist sects with which the second council is associated must properly be attributed to the lacauae existing in the philosophical system of Gantama. We see, for instance, that Gantama, resolutely refused to explain or describe adequately the conception of Nirvana as also what he meant hy "soullesanese". (Anatman). The earliest attempts at schiem wers made hy his own consin Devadatta during his very lifetime but were unsuccessful. It was at the conneil of Vaishali that the 18 schools first appear into ; the history of the faith. So long as the Buddha lived every point of dispute could be referred to him and his solution he regarded as final. But after his death, in the absence of any such final authority. the disputes led to schisms which crystallised into different sects. The regional localization of the units of the Samgha, the division of the work of preservation and transmission of the Buddhist texts, the grouping of disciples around noted elders are other contributory factors. As time went Buddhism was split up into two main sections, known as Hinayana and Mahayana. The difference between the two schools centre round the diverse important points like the personality of the Buddha, the Bodhisatva **`**..." , and nature of final liberation. The Hinayanists

or the followers of the sonthern school of Bnddhism at present found in Ceylon, Barma and Siam follow the Pali Canon while the sacred texts of the Mahayanists or the northern Buddhiste nsed Sanekrit as a medium of expression. The fourth conneil held nuder the patronage of Kanishka was mainly a Mahayanist conneil. But these sects could not have existed as such during Ashoka's tims otherwise he would have surely referred to them. His schism edict on the other hand leads support to the belief that the schismatic tendencies already existed during his reign and coon after manifested themsslves into the deverse Bnddhist secte.

The rsign of Ashoka marks the zenith of the glory . and spread of Buddhism is Iadia. Ashoka accepted what was at best a small struggling ssct whose votaries were mostly to be found within the confines of Magadha. Τn this local sect he accorded his imperial patronage and infased it with his singleminded devotion. The effect was that Buddhism now became the perdominent creed of India, with Ashoka's messengers it sprsad into the remotest corners of India and even spread abroad. ' Bnt its decline was as endden as was its spread in India. Though it lingered on for a considerable time afterwards Buddhism, as a dynamic way of life had spent itself. Ater the death of Achoka it slowly started receding from public favonr and was finally abandoned in favonr of Vaishnavism. What were the reasons for such decline of Buddhism in India 1 Was it inherent weakness ? One mnst answer No ! Buddhisnm, it must be emphasized, was as much of an ethical movement as a social revolution though some scholars following others in their intellectual hobbies would frown upon such an interpretation. When a revolutionary movement cry-

78 -

stalises into a tradition it outlives its social utility. The Baddha thought of life in terms of movement while his church acted in the interest of the preservation of the ceelesiastical and dogmatic status quo. Imperial favour, again bronght it into conflict with the parent creed, Brehmanism. The Baddhist church itself lost its ninty of purpose in a multiplicity of theoretical interpretations. Imperial patronage garo the Baddhist church a cortain sense of security and material security, if not infused by a spirit of dynamic ovengelism breeds hassinde and degeneration. But it is wrong to say that Baddhism was expelled from India, it was absorbed.

Ashoka's Edicts: That we are uhle to write the life of Ashoka in anch minute detail and certainty is entirely due to that remarkable corpus of inscriptions well-known as Rock and Pillar edicts. These edicts are his antohlography exgraven on etone. Their matter is as unique ne their manner. We have already examined the matter and now we shall eee what their manner is like.

The first thing that strikes us about these edicts is the oppoing. As an example we shall quote the Fifth Rock Edict of Girnar: "King Downamprize Priyadarshin speaks thus. It is difficult to perform virtuons deeds. He who starts performing virtuons deeds accomplishes something difficult. Now by me varions virtuous deeds have been performed," and eo goes ou the King, Priyadashin or Ashoka. One who knows something about Darins the great is reminded uf his inscriptions. Compare, for instance, the Behistum inscription of Darins: "Thue saith Darins the King: This is what was done by me after I became king." Though the import of the ... sets of inscriptions is different we cannot but be . •

stuck by the similarity in format. Bearing in mind the existence of Persian power in the north-western portions of India a significant Persian influence on the conrt life of the Manryas becomes mora than a prohability.

Secondly, consider tha matter and the vehicle of expression. No other king in the history of India has ever thought of making use of anoh proclamations like the inscriptions as confessions of religions feelings. Inscriptions there are by far and many, complete and fragmentary, dated and indated, long and short, but they are, with the solitary exception of these confessions, proclamations of royal conquests like the Allahabad Pillar incription of Samadragupta or the Hathignpta inscriptions of the Satavahanas.

The third characteristic concerns only the pillhr edicts. These pillars are not only important for the edicts inscrihed on them but elso for their artistic execution and significance, which latter point could hest be discussed by survoying the Ashokan monuments as a whole and which are comprised of three distinct groups like (1) Pillars (2) caves and (3) stupas.

minidei aad (j) Nigliva. These monolithe are of bighly polished sandstone over thirty feet in height. The columns generally have a tapering appearance and the top is surmonated with a capital variously described as bell capital or inverted lotns. The capital supports the figure of an animal, either a lion or bullock. It projects on all aides of the shaft and the underside of the projecting portion is relieved with an ornament" and some design while the bell itself is decorated with conventional lotns petals. The nnimals display a vibrant spirit and possees a majesty all their own revealing the familiarity of the artist with objects of nature. The massive appearance of the shafts, their weight and locations nadonhtedly represent "a triumph of engineeriag, architecture and sculpture". The meaning of the statement in inverted commas will be clear when it is remembered that the two pillsrs at present standing in Delhi originally came from the village of Topra is the Amhala district and Meerath from the North-Western proviacee. The enltan Phirozshah Tughalk, when he saw the first determined to remove it to Delhi and a carriage with 42 wheels was used and thonsauds of men hauled at every rope and after great lanour and difficulty the pill r was raised on to the , carriage. A strong rope was fastened to each wheel and two hnadred men pulled at each rope, Thus a labour of thousands stretching over weeks enabled the Sultan to fulfil his resolve.

The Maurya Art, of which the Pillars are eloquent monnments, flourished under the patronizing - care of a sovereign monarch like Asboka, The Maurya court, it cannot be denied, was subject to conciderable "verso-Hellenic infinence and as such the close proba-

£'

bility of the pillsrs heing influenced by the same trend cannot he altogether rnled.nnt as impossible. At the same time it must be remembered that these pillars reflect the majesty of the vision of one man, they reflect tha intensity of his faith, the tona of his feeling and the grandear of his ampire. They show praccapation with an ideas, that idea heing tha translation in stone of the acrenity and majesty as associated with Bnddha's life. They possess an numistakable restraint reanlting in a suggestive silence, a veritable ambodiment of elemental vitality and parposeful life. Again it must be remembered that tha vision and capabilities of the Indian artists were such as to complately metamorphose all foreign influencewith the result that the product is completely Indian in appearance and spirit.

The earliest historical caves-the Barabar group-in-India can he attributed to the 12th and the 19th regnal years of Ashoka. These caves are carved out of a solid piece of rock generally of granite. The frontage opensin a door with eloping jambs which ara evidently a copy of wooden prototypes. The Barabar group of caves. situated in an isolated range of hills on the left hank of . the Phalgn river in the Gays district are a prominant example of aarly cave architecture. They are seven in number, of coneiderable dimensions and though differing in plan are all similar in character and evidently belong to the same age. Both internally and externally they are plain and though they are the "amallast and least ornamented of any to he found in India, it still must have required . a strong religions impulse in induce men to excavate even caves 30 to 40 feet in langth in the hard granite rock, and to polish their interiors to the extent and that some of them are finished and all probahly were intended ' to have heen."

According to Buddhist tradition Ashoka is reputed to have holit 84000 stapas. The stotement though exaggerated out of all proportion contains a grain of troth. Long hefore Ashoka cams on tha sceee the stapa, itself a commemorstive edifice of high antiquity, had already assumed a religions character and he no doubt built some stupas constraing the act as a source of merit. We are told that the relies of the Buddha's hody were distributed first atter his death and the scoond distribution took place in Ashoka's reign. Over some relies he hull stupas at varioos places. The Samchi stapa in the earliest stage cau he attributed to Ashoka. Likswise the stapa at Samath can he attributed to him.

Ashoka had fairly loog reign of more than 33 years. hut we have no positive record of this after the 29th year. He socceeded to the Maorya throne in 274 B.C. was crowned to 278-79 B.C. oud may have died in *Girce* 238 B.C. Of his last days we have no definite ioformation hot it is possible that he may have become a mock.

His Greatness: Sammarising the achievements of Ashoka and his place io History, Mr. H. G. Wella says, "Amidst the teos and thousaods of names of mooaches that crowd the columns of History, their Majesties and Gracioosoesses and aeronetics ond Royal Highnesses and the like the name of Ashoka shines and shines almost alone a star. From the volga to Japan his uame is still honoured. Chius, Tibet and even India, though it has left his doctrice, preserve the tradition of his greatness. More living mea cherish his memory today "thao have even heard the names of Constantine or Charlemagne." He was a benevalent king who loved his anhiects as a fether would and ceaselessly worked for their henefit here and hereafter. Such was Ashoka a saint who built a monument of righteonsuces emoug empire huilding monarchs and potentates.

### THE SUCCESSORS OF ASHOKA

After, the denth of Ashokn the history of uncient India ngain lapses back into n period of uncertainty and conjecture from which it emerged at the advent of . Chendragapta. From the Puranas we get e list of as many as 10 Kings who succeeded each other. The Vivyavadana mentions six names and Taranatha three. It is almost hopelessly impossible to deduce any connected narrative or succession list from such hewildering and diverse accounts. Ashoka had at least four sons; Tivara, Kunala, Jaloka and Mahendra. According to the Vivyavadan. Kunala had gone blind due to the machinationa of his step mother so that it is not possible that he reigned at any time. Mahendra and probably Tivara-Tisya hecame monka, Jaloka did not rule env. where except in Rashmir. The namea of the enccessors of Ashoka incladed in all the recessions of the Puranas and the Sauskrit Buddhist works are as followe .

Dasharatha 232 B. C. (Known from the Barhar cave Inscription).

Samprati ( Divyavadana and Jain cources ).

Devadharman.

Shatadharman.

Brihadratha (186) (Harshacharita). The reigna of Dasharatha, Samprati and Brihadratha can he fairly accertained as historical. For Dasharatha , we have the epigraphic evidence from the Ajivika cave insorption. Samprati is spoken of by Jain sources as a convert to Jaininsm and Brindratha figures as the last Maurya who was murdered by Pashyamitra Shunga. It may be accepted that the Maurya empire hroke up after Samprati and some of the kings mentioned may have been rulers of territories independent of Pataliputra. But the extremely short periods for which the various Maurya kings appear to bave ruled according to the Puranas, indicate that the Mauryan hõuse bad already passed its zenith of glory and was on the decline and that territorial fragmentation had reduced the empire to a region strictly confined within the four corners of Magadha.

The causes responsible for the downfall of such an extensive and well knit, empire are manifold and the problem has given rise to a very interesting controversy among scholars. M. M. Harprasad Shastri puts forward the following reasons (a) that Ashoka stopped animal sacrifices throughout his empire and thus offended the Brahmana group (b) he reduced the Brahmanas who were Bhudevas (gods on earth) into false gods. (c) the appointment of Dharmanniamatras interfored directly with the influence and prestige of the Brahmanas (d) his conception of dandsamata (equality before law) was a direct affront to the Brahmanas (e) the Brahm

According to Dr. Bhandarkar, Hindn civilization, in the time of Ashoka had attained a perfectly engipsied condition between the forces making for material progress and those conducive to spiritual culture. This equipoise was so disturbed by the unflagging zeal

.78

, 79

displayed hy Ashoka that the material element of Hindp civilization was completely subordinated to the spiritual and it soon hecame nuprogressive and decadent though not extinct. Ashoka adopted a "different foreign" policy which was another cause of decay, according to the same learned anthor. If he had but continued the policy of his predecessors and helped the centripetal forces ushered in hy Bindusara his strong arm and administrative. genins could have effectively consolidated the Magadha empire' and ensued its political, stability. But the substitution of Shastravigaya (victory of arms) hy Dharmavigaya (victory of monity) was politically disastrons through spiritually glorions.

K. P. Jayaswal advocates a similar opinion. He eays, "The accident of the presence on the throne, at a particular jancture in history, of a man who was designed hy nature to fill the chair of an ahhot, put 'hack events iot hy conturies hut by millenniums."

The most important reason is to he found in the constitution of the Manryan Government. The Manryan kingship was an antocracy superimposed upon a political unification of mutually discordant geographical units. So long as the central anthority had suffioient power at its command to make its weight felt in every part of the dominions and to nip all forces of disintegration in the hnd till then the empire could sarvive. Bult as soon as an element of weakness vitiated the centre the empire was bound to disintegrate; Raychondhari very apty remarks, "the withdrawal of the strong arm of Piyadassi was perhaps the signal for the distengration of this mighty monarchy." The successors of Ashoka do not seem to have possessed that comhination of power and fact to n high degree ns was required to hold the empire together. The abort reigns of the successors of Ashokn indicate that palsee revolutions were much in vogue. And again it much have so happened that soon after Ashoka's death the ontlying provinces like Kulings which were maintained within the empire hy force declared themselves independent. Thus the total area under the direct anzerainty of the Manyras must have so much shrivelled up in size as to limit itself to Magadha and some horder territory.

Characteristic of the Age: The Maaryan Epoch was remarkable in many respects. During its heyday it heheld an empire of such sound nuity which by its very magnitude must have nppeared gigantic. Natural geographical harriers were broken down and cultural contacts with nations in the weat brought in their "wake many a vulnable contribution in the apheres of trade, ait and social ideas. Hindn society displayed the prestest amount of eccleciliem in assimilating many n foreigner in its mighty folds. The enormous architectural activities, the hrisk commercial transactions and the general prosperity of the masses of people speak of a great liberal age.

## SHORT REIGNS AND PALACE REVOLUTIONS

81

semblance of an integral cohesinn in the far fining dominions of the Manryas and consequently the disintagrating parts fell away.<sup>2</sup> The snecessors of Aeloka were too weak and powerless to maintain a strong centre against the crumbling of the Manryan state and this a way was paved for the rise of a new power.

The last of the imperial Manryas was Brihadradha, a weak and powerless king, completely in the hands of his ministers. His commander in chief was one'. Pushyamitra Shanga, who like an adroit stage manager arranged an army-review to be inspected by the King at which his head was severed from the trank<sup>T</sup> by his general.

The general, who, with his sword, assassinated they last Manrya also hrought into power the Brahmanic revival epitomised in the laws of Maun and externally expressed in his two horse-sacrifices:

The origin of the Shanga Dynasty, to which Pushyari mitri ostensibly belonged, is rather obsenre. Accordoing to Panini the Shungus are the descendants off-Bharadwaja and in all probability belonged to Ujiar. yisi. The etwology of the word is donbtfal but itmean fig-tree. The family seems to have been wellknown since ancient times, and is montioned in the: Sama Vedic Brahmanas of the Vamsha Brahmanay. They are also mentioned among prominent theological families and are stated to be the followers of *Hrishna* Yajirreda. As to when the Shungas exchanged the<sup>2</sup> sword for the fernle we are not in a position to station definitely. But certain it is that during the time off the decline of the Manryas the Shungas we're here-<sup>2</sup> ditary rulers of Vidisha. Pushyminitra, the general,<sup>2</sup> and his sons must have grawn very powerful and while nominally retaining nllegiance to the Manrega Sovereign, he and his sons managed to rule over different provinces and kingdome subject to the empire. Thus Pushyamitra eleverly mapaged to gather power in his hande and by his last coup de stat hecome the sovereign of Mngadha.

✓ Pnahyzmitra in all prohability occupied the throns of Magadha in 188-7 B.C. Hs is stated to have ruled for 36 years and had a very eventful carcer, cramming in ite long epun the performance of two horse sacrifices, repulsion of a Greek invasion from the North and an invasion from Kalingo by Kharavela and an extensive persecution of Buddhism attendant on the Brahmanio reviral ermholised by his rise to power.

When Pashyamitra asarped the Mantya throne he became the master of that empire, which, though it was in a state of disintegratian, still retained n good part of its former possessions. The core of the empire was formed hy Amga and Magadha while the Jamana was the northern boundry of the empire. In the west it extended to the river Narmada and in the east it included Bengal. The dominions boasted of famone citize like Pathlipatra, Vidisha, Ayadhya, and Barlat. Beeides, the empire also included Bihar and Matham-

One of the most important events in the reign of Pashynmitra was that of foreign invasione. The time and the directione show the political and internal conditione of the power ruling in India in 2nd century B. C. Doubless there was a Greek invasion from the onorth-west for Pathajali (who lived in about the eama

83

age) in hie Mahabhashya and Kalidasa in hie Malavikagnimitram refer to it in unmietakahle terms. But the discovery of a momentums inscription from the . Hathigumpha cave has brought to light an almost nnknown event in the reign nf Pnshyamitra Shunga. This inscription is none else than the famons epigraph af Kherayela, the Jain King af Kalinga.

The kingdom of Kalinga was well-known eince the time of the Nandas. In his inscription Kharavela refers in such terms to the Nandas as to render it almost probable that the Nandas had extended their sway over Kalinga. We hear of Kaliaga next from the 13th rock edict of Ashoka wherein he describes in most vivid tarms as to how the hattle for Kalinga produced a deep and everlasting effect on his mind and which proved a turning point in his career. From this description it may be inferred that Kalinga was not annexed to the Maurya dominione hy Ashoka for the first time. Soon after the death of Ashoka Kalinga must have .declared itself independent and in the 2nd century B. C. Kharavela, the King of Kaliaga became so powerful as to threaten the very existence of Magadhan role. He invaded Magadha with a large army, attacked Rajagriha, sacked Gorathagiri and, to nee the picturesque phraseology of the epigraph, led his elephante to the Ganges, forcing the Magadhan ruler to bow down at his feet in the process. The epigraph minutely describes the early educetion of the King, his royal pomp and power and his Jainistic faith. After this event , the history of Kaliaga relapses into obscurity and oblivion.

. .

The estensible reason for the invasion of Magadha undertaken by Kharavela is not clear. He, perhaps, following the ancient Indian custom, felt that he was sufficiently nowerful to hazard an offeasive action against his traditional enemy the Magadhan ruler with certain Success. Whatever the reason, Kharavela mustered a sufficiently large force and broke into Magadhaa territory just at the time when a threat of a Greek death-grin was looming on the borders of Magadhs. The Magadhan forces uppear to have been swept away before the invading army and Kharavela, beseiged Rajagriha and sacked the hill fortress of Gorathagiri. The luvasion, though of a formidable nature does not seem to have produced any lasting effect-Rharavela, however, returned to Kalinga with his much valued trophies in the form of some Jain images.

. That there was a Greek invasion during the reign of Pashyamitra Shunga is certain but as to who the javader was is a topic of much controversy and two names of Demetrios and Menander are asserted with much force and feasibility. Numismatic evidence, though hy its very nature being corroborative, if treated as primary or conclusive, can give rise to strange interpretations. Dr. Tarn has angreated that Demetrics and Menander were contemporaries and that the latter was a general of the former. The Greeks marched through the Panjab and their forces rolled on to Madbymika and Sakata. It is not definately known whether they ever occupied Patliputra or if they did how long did the occupation last. According to the information given in Kalidasa's drama Malavikasaimitram. Pushyamitra's grandson Vasumitra who was in charge of the sacrificial horse enconstered a force of sek cavalry on the Jamuna and routed it. Rharavela's

#### SHORT REIGNS AND PALACE REVOLUTIONS

bold invasion must have acted as a lever in lifting the threatened Greek strangle-hold and very soon, thanks to internal difficulties like revolt in homs provinces, the Greeks left Mathara and retreated into the further distances of the Panjab.

Kalidasa télls as aboat an Ashvamedha performed by Pashyamitra Shanga. It was generally supposed that this was the only one performed by the Shanga King. Bat an inscription from Ayödhya refers to bim as having performed not one bat two horse sacrifices.

The Ashvamedha or the horse sacrifics was wellknown since Vadic times. It is almost invariably celebrated by a king who wants to prove his claim to lord paramountcy. Its performance involved this assertion of snpreme power and a show of political anthority not likely to be challenged or if oballenged capable of quick and effective establishment. The horse which is finally immolated must be of black and white colour and is set free to wander about unhindered for a year. A prince is generally sent in charge of the horse, whose bounden duty it is to repulse all attempts at restriction of the horse's movements.

Accession-188 B. C.

Battle of Gorathagiri-retreat of Demetrios

1st Ashvamedha-175 B. C.

Invasion of Kharvela-173 B. C.

Second Ashvamedha-169-52 B. C.

Death-152 B. C.

The Brahmanical reaction which set in shortly after the death of Ashoka was brought to culmination and fruition by the rise of Pashyamitra. The dynastic revolution was not only political hat also had wide spread social reperensions. The Kahatriya-Brahmana straggle was finally given the qulckas and the Brahmana as n class same to the forefront. The rise of a Brahmana political power consequently resulted in a widespread persecution of the Buddhists as a religious group. Buddhism was dealt a death blow which it could hardly survive.

#### ✓ AGNIMITRA SHUNGA

The successor of Pushyamitra Shnoga was his son Agnimitra who, before his succession, ruled at Vidisha. The *Pursuas* allot eight years to him. If we accept 152 B. C. as the date of Pushyamitra's death than 152-1-B. C. may he taken as the date of Agnimitra's accession to the imperial throus of Magadha. Before this time he evidently ruled as a Viceroy to his father over Vidisha. Panchala and Koshela. The capital of the area under Agnimitra's administration was the city of Vidisha. The

#### SHORT REIGNS AND PALACE REVOLUTIONS

river Narmada formed the sonthern boundary of the Kingdom. Like Pushyamitra, Agnimitra's encer was not turbulent nud excepting a petty local war and an anmorous intrigue not much information of a really definite and historical character is forthcoming.

Malavikagnimitra: Whatever may be the period during which Kulidasa lived and wrote his immortal works his story of Agnimitra and his love intrigue shows intimute knowledge of conditions prevniling during the time when Agnimitra lived and loved. The hereoine Malavika iis a Vidarhha princess, who due to repeated misfortanes has to escape and find shelter in Vidisha in the palace of Agnimitra'a queen Dharini who has her trained in the art of dancing. The king falls in love with her and after steering through some obstacles eventually marries her.

Agaimitra's war with the Vidarbha prince most liave heen only of a minor and local importance for no other reference to it is seen elsewhere. The territorial division or readjamment may, likewise, not have produced my widespread results. The position of Vidarbhn seems to be of an inferior feadatory state, owing allegiance to the suzermity of the Shungas. The dramatist has described Agaimitra as of n tolerant disposition.

Samchi and Barhut: The stnpas of Samchi and Barhut which were developed "during the reign of the Shangas" provide by fur and large, the most valuable source of information on the internal history of the period. The Barhut stnpa is situated at Bhilsa on the northern horder of Bhopal and the one at Sanchi at a distance of 54 miles from it. Each monament consists of a hemispherical stapa with railing all round it and with four

gates facing the four directions. The monuments had varied and slow growths and each generation seems to have painfully striven to add something of its own to them. Of more artistic interest than the stupa itself are the stone railings which are profusely carved over with scenes from the life of the Buddha and various jataka stories. These specimens in contra-distinction to Manrya Act show an entirely different artistic tendency. They display such a diversity of detail, a finences of artistic ingenuity and imagination that we are at once informed that a totally different snirit is inspiring this art. The constant preoccupation of the artist with the four emblems signifying the life of the Buddha indicates that Buddha had by now almost been cauonized. Another characteristic of this art is that it was the art of the people and thrived more on indigenous tradition. It is divested of all rigidity and immobility and attended by a spirit of serenity and is thoroughly capable of vieualizing n diversity of mutually antagonistic elements and reducing them with the sweep of artistic imagination into a synthesized whole. It is fully capable of transcending the, narrow limitatione of relief and bulge into a vastness of compass; consider for example the narration of jataka stories in stone. A single picture like the one depicting Anathapindika constructing the Jetayana Vibara for the Buddha, encompasses within its frame a inninber of incidents which go to make np a connected story heing told with the sheer force of a angestive use of selected material. Consider again the story of Vessantars carved on the front of the Northern gateway at Sanchi. Marshall describes it as "one of Sanchi's masterpieces". The long story showing the life of Vessantara and the snmpreme sacrifices he made, hy way of charitable actions is enlivened with the dynamic force

# SHORT REIGNS AND PALACE REVOLUTIONS

of ertistic vision and purposeful elucerity. With these monuments the indigenous art of India had finally come of age.

✓These senipatares are not only examples of artistic heanty, they ere elso source books of ioformation relation to the mode of life of the people. their dress and jewelry, their vehicles and towns. their soldiers and hermits and their customs and manners. Consider the aspect of dress. No single hook could have described the sartorial fashions of the people as vividly as these representations. The carvings generally show male figures dressed in a sort of a dhoti reaching just below the knees, with an upper rohe thrown over the shoulders. In the case of female figures the dhoties reach down to the ankles. The dhoties are secured round the waist with a girdle and sash tied in a slip--knot in the front below the navel; either with the free ends floation down one side or with the two ends or two sldes, right and left. . Tunics, which might have resembled the modern Kurta were also sometimes worn by hoth men end women. The most important . part of the dress, however, wes the inrheu." Many styles of weering these, turbans seems to have been popular.

But it is in the matter of jewelry that the ertistic taste of the people is eeen at its best. The hair, in the case of women, was decorated with fringes of pearls or other heads according to the status of the person. The dressed up hair ended in tassels which were sometimes decorated with gold caps staded with pearls and gems. From the fringes of pearls worn over the hair hung a pendant tonching the centre of

the forchend. The enrs sported enrnings. The neck was adorned with necklaces of two, three or six strands. The arms had armlets and the wrists were heavy with bangles aboving a bead-like structure or with a structure made np of rectangular blocks or slabs. Over the waistline hang girldes of diverse designs and breadth. The fingers and in some cases even the thanh glittered with rings. Weaking anklets, simple and ornamented, also seems to have been a common practice. These ornaments were generally made of gold or silver which was used as the base over which delicate designa sets with precious stonee was executed.

The sculptares which invariably have dedicatory or explanatory inscriptional lables point to the full development of the Fall language and literature. Words like a learner of Dhamma, of the Nikayas or the Pilakas signify that the Fall ennon had almost emerged in a final form and hence a disonssion on the language and the extent of literature would not be out of place here.

The problem of the hasis and original home of Pal has proved to be n most fmitful topic of speculation among scholms both in India and the west As many ins 17 different opinions are put forth by scholars like Drs. Rhys Davids, Geiger, Grierson, Keith Wallesar, B. C. Law, Bannerji, Shastri and others and locales from taxila in the north-west to Kalinga in the Sonth are proposed as the original home. The laugnage chows a general softening of the sonads of the Sanskrit language (e. g. Putra (son) in Saskrit is Putta in Pall). Of all the Prakrists it bears the closest resemblance to Sanskrit and it is generally acceptable that in its early form it must have here a cort of *a lingua franca* of Magadha. In its present form it is pre-eminently a literary language and as such heare signs of artificial pruning and modifications.

The canonical literature of the Sonthern Buddhist, which must have existed in a more or less finalised form in this age is comprised mainly of the three *Pitakas* (or haskete). These three "haskete" or collections of texts are (1) *Vinaya* (rules of discipline of the Buddhist order of 'monks and nuns), (2) *Sutta* (collection of discourses concerning the ethical principles of the Buddha's creed) and (3) *Abhidhamma* (a collection of seven texts hearing on the philosophy [especially metaphysics] of Buddhism.) From the sociological and cultural points of view the second division of which, the collection of the *jataka* tales and *Dhammapada* form a part, is more important. All these "texts" were no doubt a product of a considerable period of literary activity and reflect varying conditione of social life.

Probably to the same age can be ascribed the "fixation" of the laws of Manu and the Brahmanisation of the Mahabharata and Ramayana. The laws of Manu inform ns that the classes of bye-gone days had now hardened into castes. The Kshatriya as a class had lost his position of priority and the Brahmana had finally emerged as the most impotrant caste in Hindn society." Buddhism, was now on the decline and with it whatever liberalizing influence it had wielded on the eocial structure was fast disappearing. The Shadra, who mader the gentle and liberal influence of Bnddhism was gradually getting rid of his disabilities was fixed in the lowest divi-

sion of Hindn society and his lot was to go on worsening sver more. On the other hand foreingn elements like the Yavanes and Shakas were being assimilated in and their places fixed into the general framework of Hindn Society. Vishnavism was solwly emerging as an organised sect with numerous votaries including distinguished foreigners like Heliodorous, the envoy from the Conrt of Antalkidas, among them. Such then was the general picture of life in this age of short reigns and palace revolutions.

## THE LATER SHUNGAS

The political history of India after the time of Againifta lapses back again into that mysterious obsonvity which is a characteristic of the story of Ancient India. This darkaess is enlivened only by the flashee of names of kings preserved in the *Purana* lists. The *Purands* mention the following Shanga Kings-Vashestha (7 years, 114-137 B. C.); Visamitra (10 years, 137-137 B. C.); Andhraka (2 years, 127-125 B. C.); Pulindauka (3 years, 125-122 B. C.); Ghosha, (3 years, 120-78 B. C.); 119-110 B. C.); Bingavata.32 years, 110-78 B. C.); Devablumi (10 years, 78-68 B. C.).

Kalidasa in his Agnimitra-drama mentions Vasa-, mitra as the grandson of Pushyamita Shanga. Kalidasa either does not know of Vasujestha or has no occasion to mention his name. Almost all the Puranas are unanimous in mentioning Vasnjestha as this third king of the Shunga dynasty. It does not seem probable that the relationship between him and Vasumitra was that of a father and son. It is more likely that Vasnjestha and Vasumitra were bordhers and that. Vasnjestha and Vasumitra was chocked by his yonnger- brother

# SHORT REIGNS AND PALACE REVOLUTIONS

Vasnmitra. Nothing headdss his nams and the number of years he ruled is known about Vasnjestha.

• Regarding Vasumitra we know from Kalidasa that hs was a good archer and was in charge of gnarding the sacrificial horse for Pashyamita's Ashvamedha. Bana in his Harshacharika tell ns of a Sumitra, son of Agoimitra who being overfond of drama, was attacksd by Mitradsve in ths midst of actors and was murdered. As to who this Mitradera was we do not know.

The next Shunga king about whom some reliable infomation is available is Bhagavata know or as Bhagabhadra in the Besnagar pillar inscription. From this inscription it appears that the Sunga Kings had diplomatic relations with contemporary Greek Kings. Heliodrous, who built the Garada Pillar was a diplomatic envoy from Antalkidas to the Shunga court and was a Vishnava hy faith. Vaishnavish had by now, fully smerged into an organised sect with a numerons following and even foreigners because devotes. Bhaganhadra bad along and peaceful reign of 32 years.

Devabbami, the last of the Shangas, who raied for ten years seems to have suffered the same fails as was meted on the the last Manrya, by the founder of the Shunga dynasty. Bana says in lis *Harshacharita*, "In a freezy of passion the over libidous Shunga was at the instance of his minister Vasadeva reft of lifs by a daughter of Devabbati's slave woman-disguised as his queen." Thus was brought about the end of a dynasty which held the throne of Magadha for, "

93<sup>°</sup>

# / THE KANVAS

The minister who brought about the last Shanga's death himself became the founder of the Kanyayanalso called the servants of the Shangas (*Shungabhrityz*) dynasty which ruled over what was left of the Magadhan empire for 45 years.

The Kanvas were n well-known Brahmana clan, the name itself being the name of an uncient rishi repeatedly referred to in the *Rigoca*. The Kanva family was connected with the Atri family hat had no claim to divine origin and must have heen *Yajamanas*. The Kings of the dynasty are Vasandeva (67 to 58 B. C.). Bhamimitra (58 to 44 B. C.), Narayana (44 to 32 B. C.) and Sasharman (32 to 22 b. C.). It is possible that Mitradeva who slow Vasamitra Shanga may have heen an ancestor of Vasquéer, Kanvayana.

Nothing more than unmes of these kings is known. It is evident that being Brahmans they must have helped the Brahmanic revival and most probably the brahmanisation of the Mahabharata and the Ramagana was further carried on in this period.

The political picture of the times, as far as can he indged from the scanty material at oar disposal, appears to be one of decadence and disintegration. The Shangas started as a military power and in course of time became pappete in the hands of their Brahmana Ministers. Pashyâmitra may have to a certaín extentchecked the tendencies of disintegration of the fendatory territories from the imperial fold but had to face an ' invasion from the south and another from the north. 'y the time Agnimitra came to the throne, the Shunga

## NEW PEOPLES AND NEW KINGDOMS

military power was very much weskened and consequeutly the territorial proportions of their kingdom must have diminished in course of time. The large number of coins from that period show that many of the feudatory kings and republics declared themselves independent and were issuing coins in their own name.

The large number of coins which can be safely uscribed to this period tolls us of many small kingdoms which existed for 'nll practical purposes, independent of the central power. Such kingdoms were Pauchala (cepital Ahicchatra) Kaushambi the Yandheya kingdom, Barhut, the kingdom of the Arjanayauas and Maharaja \* Janapada.

In the 1st century B. C. the Shakas and the Andhras inundated the Gungetic plain and swamped out of existence whatever remained of the central Maurya pawer though Hinen Tsiang says that the descendants of the Mauryas lived up ot he 7th century A. D. They may have lived as petty raims, administering an insignificant territory. But Magadha as a sovereign power was was already extindt.

#### VIII

-NEW PEOPLES AND NEW KINGDOMS

"THE year 188-7 B. C. saw the end of the Mauryn Imperial Sorereignty. For the next 115 yours ruled the Skungas und the Knawns in succession in Magnaha. But long before the rise of the Knawns and immediately after the denth of Ashoka, the decline of Mnuryn power gave n ebunce to one Simuka-evidently in the employ of the Mauryns-to declare b: pendent in Western Dekkan und found the Satavahana dynasty. The absence of a strong central power necessarily resulted in the establishment of new kingdoms either by indigenons ralers or foreigners. The story of the 250 years before the rise of the imperiel Gaptas, hence, is essentially the story of these new peoples and new kingdoms like the Sutavahanas, the Indo-Greeks, the Sakas, the Kushanas nud the Vakatakas. </

We are told by the Puranas that the last Kanva was assassinated by member of the Satavahann dynasty. But hefore a Sutavahann King could infiltrate into the central areas and murder the last Kanya he must have had sufficient imperial power- and tradition behind him. It was observed before that soon after the death of Ashoka, the Manryan empire showed . symptoms of violent dieintegration. The different fendatory princes and officers of state, charged with the administration of vast - territories, threw off the yoke of loyalty to the imperiel house and to all intents and purposee mied as independent kings. One such noblo or an officer in the employ of the Mauryas must have been the first Satavahana, who made a hold hid for power and established his own independendent kingdom in the Deccan-a kingdom, which during its passage of time was to see as many as 30 kings live and work for an aggregate of 4423 years.

The origin and the menning of the name Safavalana are obsence. Verious feacital interpretatione . offered but such interpretations represent a mixiure . altempt at glorification with a dash of

97

quasi-historical anecdotes. The Puranas invariably refer to them as Andhra Kings but this can he easily explained. It is possible, may very probable, that the Puranas came to be compiled at a time when the rule of Satavahenas was necessarily restricted to Andhradesha end recent investigations have revealed that in the beginning at least the "centre of gravity of the - early Satevahena power lay in the western Deccen" and that "all the circumstances point to western India as the original home of the Setavahanas". Their ceste, relying on epigraphic evidence, could be taken as Brahmena hut a divergent view is also put forwerd. "The Satavahanas". eevs Dr. Gopalachary, "were Kshatriyas and hore the gotras of their mothers. They got this institution of tracing descent hy mothers through fater-marriages with Kshatriya families in certain localities. The system was one for the regulation of marriages and not for descent of property."

VThe Pirrana list gives us aames of 30 Satavahana kings whose combined rule spread over 4422 years. Many of the kings are just hat names to us and from among this galexy only a few kings stand out sheddiag a revealiag light on the derk periods that interstice the pattern of Satavahana history.

The founder of the Satavahana dynasty wes Simuka who, according to the *Puranas* ruled for 23 years (220 B. C. to 197 B. C.). He must have heen a noble or en officer in the service of the Manryas in the western Deccan and soon after Ashoka's death must have established his independent kingdom. A Jain legend tells us that the first Satavahana king built Jain temples and chaityas but in his old age hecome wicked and was sunbsequently dethroned and killed. Simuka was succeeded by his brother Krishna I, who ruled for 18 years. His reign saw the expansion of the kingdom as far as Nasik. The administration was modelled on Manryan lines and we have an inscription in the Nasik cave by his Mahamatra who was in charge of the . Shramonas.

"" Shri Satakarni I (197 B. C. to 169 B. C.) who sncceeded Krishna I, is snpposed to he a contemporary of Pushyamitre Shunga. The long record at Naneghat which contains the "funeral oration" of his disconsolate wife Nayanika, daughter of Mabarsihi Taranakayiro mentions the sacrifices performed by this king which indicate his imperial positon. These sacrifices willch included Ashvamedha unst have been performed in commemoration of the expansion of his empire which now spread into the central provinces and which annoyed Kharavela the king of Kalinga. Kharavsla sent an army to chastiss the hold Satavahana but it does not seem probabile that he was actually defeated.

The next important king is Hela who usbered in an ora of considerable literary activity in Prakrit. Hs is' mentioned by name in the Saplashatakam, and the Litavati. The Satavahanas used Prakrit as their official language as can be readily seen from their inscrip tions but the association of Hela'a name with the Saplasataka would indicate that he encouraged the use of Prakrit for literary purposas also.

The Saptashataka is a compilation of 700 verses in 7 chapters and of an erotic nature. The meter used in Arya and the language Maharashtri Prakrit. Hala is reputed to be its anthor but it is more than probable that many poets must have collaborated in the work. "The prevailing tone is gentle and pleasing, simple love set among simple scenes, fostered by the seasons ".....The maiden begs the noon to touch her with the rays which have tonched her heloved; she hegs night to stay for ever, since the mnon is to see her heloved's departure. The lover in turn hids the, thunder and lightening to do their worst on him, if they hut spare her whom he loves." Such is the theme and tenderness of a mellowed love, the pathes of separation and the joy of rennion are some of the dominant notes which lend exquisite charm to the collection.

The Lilavati describes the military exploits in Ceylon of Hala's commander-in-chief Vijayananda. "The king of the Sinhala Dwipa hy name Sitamegha had a danghter hy name Lilavati by his Gandharva wife Sarasri. She lived near Sapta Godavari Bhamam which is identified with modern Draksharanya. After his military exploits Vijayananda camped with his troopa at Sapta Godavari Bhumam and came to learn all ahont Lilavati. After his return-to the capital, he narrates, the whole story to his king who then proceeds to the place, kills a demon Bhishanana and marries Lilavati."

Between Haia (No. 17) and Gautamiputra Shri Satakarani there is a period of incessant aggressive activity on the part of some foreign trihes who had formed settlements and kingdoms in western India and who made repeated attempts at eastward expansion at the cost of the Satarahanas. They are described as Kaharatas but it is not certain whether they were politically or ethnologically related to the Shakas.

. Gautamiputra Shri Satakarni: Gantāmiputra Shri .Satakarni is descrihed in an inscription in a Nasik cave as the destroyer of the Shakas, Yavanas and Pablavas and the exterminator of the Keharatas. The Ksharatas had established their power in Malva and Western Italia and it was Gautamiputra who repaired the considerable losses to the family fortune by wresting these duminiums from their hands. His empireincluded Nurthern Maharashtra, Eostern Rajpukas, East and West Malwa, Snarnshtra, a part of modern Berar and Nurthern Kunkan.

Gautamiputra Shri Yadaya Satakarni: Yadaya Satakarni is the last important monarch of the line of the Satavahanas. He han sleft many inceriptions for us at Kanberi, Nasik, and Ganjam which clearly suggest that he not only succeeded in maintaining the enstern possessions but also added Aparanta and North Maharashtra te his dominions.

### - THE INDO-GREEK KINGS

- Just as the decline of the Manryas after the death - of Ashoka gave a chance to Simuka to declare himself independent in the Western part of the Deccan, the void so created in the North-west attracted a number of foreigners who hall kingdoms on Indian soil which lasted for some conturies but produced hardly my lasting effect. The Greeks known as the Yawane to Indians had been larking un the Frontiers of India since Alexander's grand invasions the effects of which were obliterated as swiftly as they were impressed. The second antempt was made by Bactrian princes of the house of Euclydemus in 200 B. C. and the third was that of Eucratides, who had supplanted the family of Enthydemus find occupied all is possessions in the North-Western portion of India befors 162 B. C.

100

# NEW PEOPLES AND NEW KINGDOMS . 101

Demetrios and Menander : The Greek invasion led by Demetrios followed the main lizes used by the armies of Alexander the Great. According to the information given to as by the Strabo, the Bacterian kings carried their conquests to the sonth over the Hinduknsh into sonth Afganistan, the N. W. F. Province, Punjab, Sind and Kathiawar. The invasion proceeded along two main rontes, one beyond the Beas eastwards and the other heyond the Indus delts sonthwards. The Vangnard which seems to have penetrated Madbyadesha and roled on to Mathura, had to turn back due to political trouble in the home provinces. The invasion, however, does not seem to have produced any lasting political results in India proper.

Menander is the best known of all the Yavana rnlera ia India. He is the central figure of the Pali hook Milinda Panha or the questions of King Milinda which gives reports of conversation between the learned Bnddhists monk called Nagasena and King Milinda who is finally converted to Buddhism. His capital was Shakala and his fame as a great and inst ruler had spread outside the boundaries of India. subjuggted Arcosic and another lad by the Shaka Manes conquered Taxila in obont 85 B. C. and put an end to the Greek power in that region.

This Manes was a powerful king and his kingdom included Chakusho neor Taxila over which ruled one of his satraps. His coins are found mostly in the Panjab where he is called Moga hut his away extended over Gandhara and his reign could be placed opproximatly between 33 B. G. and the middle of 1st cent. A. D.

Manes was aucceeded by Azes I who was the Viceroy of Arcocia and Seistan. Ares I enjoyed a long reigu erteuding over 40 years during which time he onnexed the kingdom of Hippostrotos and pat an end to Greek rule in Eastern Punjah.

Of special interest is Goudophores, the Phalava king, with whom the tradition of St. Thomas, the Apostle of the Parthians is associated. The Acts of St. Thomas reters to Goudophares as King of India. His power, of first, seems to have been restricted to southern Afganistan but later on he extended his sway over the Gandhara region with the annexation of the Peshawar district in the 26th year of his reign.

The system of Satrapies was peculiarly a Persian institution. "The satrapin Persia was the head of the administration in his province; he collected the taxes, controlled the local dificials, the subject tribes and cities and was the supreme indge of the province to whose chair every civil and criminal case could be brought. He was assisted and was controlled by a royal secretary and by emissaries of the king." on Brahmanas and Bnddhists alike and "ferries, resthonses, places for drinking water and public halls are some of the comforts that he bestowed on his subjects. What redounds greatly to his credit is his revival of the Nigama Sabha. There was also a Registry office where all important documents were registred after being read out." During his reign the country enjoyed peace and prosperity of which many benefactions and glorious monuments hear eloquent testimony. The rule of the Kyburtapas lasted from 25-20 B, C. to 78 A. D.

"The greatest rivals of the restored Satavahana empire were at first the Shaka *Kiskatrafas* at Ujiain" saya Prof. Raychondhari. And to Ujiayini belonged -Chashtana who ascended the throne in A. D. 78 and is described as the founder of the Shaka era which does not seem probable. According to the Andhan inscription Chashtana waa ruling conjointly with his graudson Rahardaman in the year 180 A. D.

Badradaman, who says in his Junagadh. inscription that "he was chosen by men of all castes as their protector" and won for himself the tills Malaksharrapa became independent sometime between 180 to 150 A. D. It appears that his power was meaneed by some enemy and had to stabilize it with his own provess. His ways extended over east and west Malwn, the Mubishmati region, he tertitory around Dwarka, Saurashtra, Marwar, Catch, the lower India Valley, a part of western and central India and Northern Konkan. The Junagadh inscription says that he twice erossed swords with Satakarai and defeated him but did not destroy him. In the opinion of Dr. D. R. Bhandarkar this Satakarni was ۰.

kárni was married ta Rudrndaman's danghter. Rudradaman also canquered the Ynudheyas. He ruled from Uijayini and was a liheral and learned king well-versed in grammar, polity, masic and lagic. He had at least two sons and one danghter wha was married ta Vashishtiputra Satakarni. It was during his time that the Sudarshana emhankment was repaired at a great cast ta his treasury.

The pawer of the *Kshairapas* which lingered an far sometime after Radradaman was finally destroyed by the Gaptas.

# THE KUSHANAS

The Knshanas, we are tald by Chinese historiaus, were a section of the Yneb-chi race who in about 165 B.O. were living in the mountainons regiane af Chinese Turkestan. There they were defeated by the Hinug-Nu wha alsa killed their king. Then, under the leadership of the widow af their stain king the Yneh-chi migrated westward and in the canree of their migration attacked the Wa-Sun killing their king. After this event the Yneh-Ohi fanght the Shakas in the plaine of Jazartee (the Syr-Darya) and farced the Shaka king to seek refnse in Kipin (Gandhara). But in the meanwhile the son of the king of the Wu-Snn who was killed by Yueh-chi attacked them and drove further westward where they established them their suzerainty over the weak and disorganized Ta-hia. . 'Fun-Ye in his annals of the later Han 'Dynasty supplies more information nhaut these Yush-chi. He says that while in Ta-hia the Ynsh-chi were devided into five groups of which the Knshanas were one.

A hundred years later the Kushanas over-powered the four other graups and the Kushana leader called.

.

Kieon-Tsioon-K'io and who is identified with Kadphises I declared himself ss the King, invaded Parthia and occapied Kabal. He aseema to have lived to the ripe age of 80. He assumed the tidles of Yanng (chief). Maharsia, Rajadhiraja and sacadhramstic which anggests that he was a devout Buddhist.

✓Kadphisee I, was succeeded by his son Ksdphises II, the Vins, Winn or Wems. Be extended the Kushaas power further into the interior of India by completing the conquest of Northern India. The date of Wema-Kadphises' succession is given by Smith ss A. D. 77 or 76. His power extended as far as the Gangetie plain (Benarea). His territories were soministered by military viceroys. His reign seems to have lasted for 32 yesrs from 78 to 110 A D.

"Chinese Interlude: In the third quarter of the first century A. D. the Chinese nower under the hold leadership of a general called Pan Chao was steadily on the increase and spreading weatwards as far as the very connes of the Roman empire. This could not be looked on in silence by Wema who considered himself as an equal of the emperor and by way of boldly asserting his status of equality demanded a Chinese princess in marriage. The Chinese general construed this as an insult to his emperor and expelled Wema's envoy from his territory. Then Wems collected a strong force of 1.70.000 cavalry commanded hy his Viceroy Si and dispatched it to attack the Chinese. But the hardships on the way so weakened the Knshana army that when it emerged into the plaias it fell an easy pray to Psn Chao and was defeated. Wema was, then, forced to pay tribute to the "Chinese.

NEW PEOPLES AND NEW KINGDOMS

"The chronology of this period," says Rapson, "has been one of the most perplexing problems in the whole of Indian History, and the problem can acarcely be said to be calved positively even now; that is to say, it has not yet been placed beyond nll possibility of doabt." Be it as it may, we can eafely assume with Vincent Smith that Wenn-Kadphises was directly anceeded by Kunishka the most illustrious and the best known of Kaehana railera.

V Kanishka oompleted the Kashana congaest of upper Iadia and his sway extended all over North-Western India, prohaby, as far soath as the Vindhyas, as well as over the remote regions heyond the Famir Passes. It is also probable that he weilded anthority over western Iadia through the Shaka *Kshatrapas* and he is cfedited' with having huit the city of Kanishkapur in Kashmir-His capital was at Peshawar where in his later days he heame a devout Buddhist and erected a great relie tower which must have heea regarded as one of the world. Its saperstractare of carved wood rose to thirteea stories, to n height of nt least 400 feet and was earmounted hy n mighty iron pirminate. He nlee hnilt a magnifeent monstery near it which was existing as late as the 9th century A. D.

Kaniehka is said to have wnged a wnr ngainst Parthia heing provoked into it by the Parthian king whoie described as "very stapid and with a violent temper." Kanishka also nrenged the defeat auffored by his predecessor at the hunds of the Chinese by defeating them and compelling them to send hostages who however, were treated with digaity and coneideration due to their status. As a result of these exploits his

107

# NEW PEOPLES AND NEW KINGDOMS

109

As a result of the Kushana couquest commerce between the Roman empire and India received a considerahle impetus and Roman gold began to pour into India in exchange for Indian silk, spices and gems.

The reign of Kauishka lasted for some forty years and was encceeded by that of Vnshishka about whom very little is known. Vashiska was followed by Huvishka who styled himself as "steadfast in the law", was a patron of Buddhism and built n monastery nt Mathura. He is also said to have huilt the town of Hushkapur in Kashmir.

The last of the great Kushanas was Vasudeva I, who was a Shaiva. He seems to have lost his hold over porthwestern portions of the Kushana dominions for his incriptions are oaly to be found in the Mathura region.

The age of the great Kushanas was an age characterised by intence literary and religious activity for it was in this age that famous authors like Vasumitra, Aslvagbosha and Nagarjuan lived and wrote their works. Buddhism was introduced into China by Kashyapa Matanga which "thas opened the way for Indian Civilization to Central and Eastern Asin".

## THE BHARASHIVA NAGAS

The political successors of the Kushanas in Mathura and certain adjoining territories were the Nagas. During the 3rd and 4th centaries A. D. Naga rule is much in prominence in western U. P. und Gwalior State. The Puranas mention two branches of Naga families, one ruling at Champarati and consisting of nine Naga kings rul in other at Mathura with seven Naga kings. The

t

dominions were further enriched by the addition of , provinces of Kashghar, Yarkhand and Khotan, till then dependencies of China.

But Kanishka is famous in the annals of Northern Buddhism not so much for his extensive conquests and nossessions as for his distinguished and active patronage to Buddhism. In testimony of the fervour of hisfaith he built many religious edifices and convened the fourth Buddhist council which was held in Kashmir. Kanishka, we are told, had studied the Buddhist scriptures in his leisnre hours, hat had been puzzled by the diversity of opinions and conclusions expressed therein. So he suggested to his adviser, the venerable Parshva, that the conflicts should be resolved by an anthoritative explaination. To this Parshya readily agreed and a council was arranged to he held in Kashmir. It was presided over by Vasnmitra and Ashvaghosha, the author of the famous Buddhacharita, was the vice-president. The 500 members who attended the council discussed the theological literature in great detail and perpared commentaries on the three divisions of the canon. The work included the Mahavibhrsha, an encyalopaedia of Buddhist philosophy, which is still preserved in the Chinese. Though himself a devout Buddhist, Kanishka whs not a funatic and showed due respect to Greek, Sumerian, Zoroastrian, Elamite and Hindu deities worshipped among hie different anbjects. Men of outstanding literary, philosophical and scientific talent like Vasumitra, Ashvaghosha, Negarjana and Charaka emhellished his court and helped in moniding the cultural

As a result of the Knahana conquest commerce between the Romen empire and India received a considerable impetus and Roman gold began to ponr into India in exchange for Indiaa silk, spices and gems.

The reign of Kanishka lasted for some forty years and was succeeded by that of Vashishka about whom very little is known. Vashiska was followed by Huvishka who styled himself as "steadfast in the law", was a patron of Buddhism and huilt a monastery at Mathura. He is also ssid to have built the town of Hushkepur in Kashmir.

The last of the great Kushanas was Vesndeva I, who was a Sheiva. He seeme to have lost his hold over northwestern portions of the Kushana dominions for his inseriptions are only to be found in the Mathura region.

The age of the great Kusheuae was an age characterised by intence literary and religious activity for it was in this age that famoue authors like Vasumitra, Ashvaghosha and Nagarjune lived and wrote their works. Buddhism was introduced into Chiaa by Kushyepa Matanga which "thus opened the way for Indian civilization to Coutral and Eastern Asia".

## THE BHARASHIVA NAGAS

The political successore of the Kushanas in Mathura and certain adjoining territories were the Nagas. During the 3rd and 4th centuries A. D. Naga rule is much in prominence in western U. P. and Gwalior State. The Pursaas mention two branches of Naga families, one ruling at Champavat and consisting of nine Naga kings and the other at Mathura with seven Naga kings. The

.

account may be taken to refer to the 3rd century A. D. and hence the heginings and prevalence of Naga power may be taken as far back as the latter half of the 2nd century A. D. The early rulers must have been feudatories of the Kushana chiefs. Several Vakataka inscriptions refer to Bhava Naga, sovereign of the Barashivas whose grandson's grandson Rudrasan II was a contemporary of Chandragapta II. The dynasty of Bhavanaga seems to have possessed great power for they performed ten Ashnamadhas and were duly crowned kings with the pureswater of the Gauges "obtained by their valour". The Bharashivas adopted Shivn as the presiding deity of their empire: The performance of ten horse secrifices clearly shows that they were independent sovereigne. They " were matrimonially connected with the Vakatakas and the Guntas and Chandraganta II was married to a Naga mringess.

The Naga house of Padmavati was more important than the other. Naga coine reveal the names of as many as 10 Nagu rulers. Hhuva Naga seems to have ruled fromcirca 305 to 340 A. D. and his danghter was married to the Vukataka crown prince Rudrasena in circa 300 A. D. The capital Padmavati (identified with Padma Pawayn in Gwalior Sitae) was in a fionriehing condition nder the Naga rule. Situated at the confluence of the Sindhu and the Para it had natural protection from three sidea and hoasted of magnificent palaces and temples. It was reputed to be a great centre of culture nud education. Ganapati Naga, Nagasena and Nandi are the three of the Naga princes referred to in the Allahabad pillar inscription of Samudragpia.

Though the rise of Samndragupta must have reduced The power of the Naga Kings, (the · Allahabed Pillar in-.

# NEW PEOPLES AND NEW KINGDOMS

scription claims the destruction of the Naga power) still soms members of the old houses continued to exist either as fendatories of the Guptas or their officials down to the declins of the Gupta Empire.

## . THE VARATARAS

Vinst as the rise of the Satavahanas was n natural consequence of the dismamherment of the Mimrya empire afor the death of Ashoka so was the hirth mnd dsvelopment of the power of the Vakntakas who rose ont of a similar political vacuum.) The power of the Western Kshatrapas was on the decline in the latter half of the 3rd tentury A. D. for the Malavas had inflicted n severe defeat upon them and divested them of several parts of their possessions. I The collapse of the Satavahanas hy 225 A. D. gave rise to several kingdoms like the Chutu Satakarnis, the Iskhvakas and Ahhiras. Such ofroumstances, then, gave rise to the Vakatakas who In a comparatively short time not only, consolidated their power' bat even extended it to formidable proportions.

The Vakatakas were hrahmanas by caste and Visnuvriddhi by getra. It is not quite clear as to where their original home lay hat the connection of the enrly Vakatakas with the village of Bagnt or Vakat in Bandelkhand cannot be raled out as an impossibility.

The founder of the dynasty, Vindhyashakti, is mentioned by the *Puranas* as a ruler of Vidisha (Bhilea, near Bhopal) and Purika is mentioned as his early capital.' Hence, observes Dr. Alteknr, "we may presume that the nucleus of the original Vakataka principulity lay in western C. P. or Berar." The ancestors of Vindhyashakti may have been local officers in Berar under the defunct Satavabana empire and the territorial possessions inherited hy him must bare comprised a district or two in Western C. P. Vindhyashakti, taking advantage of the favorrable situation may have extended his power across the Vindhya range into a portion of Malwa and thus sown the seeds of the expanding Vakataka begemony. But Vindhyashkti assumed no royal titles and was not erowned. He ruled for twenty years from 255 to 275 A. D.

The establishment of Vakataka power brought about hy Vinbyashakti was completed by his illutrions son and successor Pravarasena I, who ruled from 275 to 335 A. D. He extended the power of the Vakatakas over the greater part of the Deccan though we have no direct means of knowing now exactly he did it. He celebrated four horse sacrifices and it is possible that they were intended to commemorate his four different campaigns. His first campaign must have been directed towards the east and resulted in the annexation of the eastern parts of C. P., perhaps up to Jubbulpore and Balaghat. The direction of the second campaign must have been towards the south and which must have added southern Berar and the North-west parts of the Nizam'e dominions to his kingdom. The third thrust was in the direction of Andbradesha and the fourth resulted in establishing his overlord ship over eastarn Deccan, Malwa, Gujarat and Kathiawar The empire of Pravarasena included Northern Maharasbtra, Berar, central Peovinees and a considerable part of Hydrahad State but his sphere of influence extended much further and was comprised of sonthern Koshala, Baghelkband, Malwa, Gnjarat and Kathiawar.

Pravarasena assumed the titls of samrat, was an orthodox Hindn and performed Vajapeya, Ashvamedha

. .

and other vedic sacrifices. He had four sons each of whom were appointed as a Viceroy over the different groups of territories. His eldest son was Gautamiputra, who predeceased him and his other aou was Sarvaseua, who after his father's death ruled independently and was the founder of Basim branch in southern Bernr which continued to rule contemporaneously with the main Vakatákas down to 525 A. D.

Radrasena I, the son of Gantamiputra socceeded Pravarasena in 325 A. D. and ruled upto 360 A. D. It seems that Rudrasena I was involved in some difficulties and was helped ont by his maternal grand-father King Bhayanaga of the Bharashiya dynasty. What this trouble was is not quite clear and it is argued that the rise of the Goptas may have menaced the very existence of the Vakatakas. But this theory does not seem to be probable for even the conquests of Samudragapta did not materially affect the Vakatakas who continued to rule as hefore. It is true that the title of Samrat which was used by his grandfather was not assumed by Rudraseha bot this may be due to the fact that he did not perform the Vajapeya sacrifice. During his reign his uncle almost roled independently over the portions allotted to his care by his grandfather. Rndrasena himself was weak and icexperienced but with the help of his maternal grand father Bhavanaga he soon managed to get an effective control over his kingdom. Gradually his difficulties smoothened ont and once more the power and the prestige of the Vukatakas were stabilsed.

Rudrasena was succeeded by his son Prithvisena I, who ruled from 360 to 385 A. D. During his reign his relations with Vindhyashakti of the Bassim hranch of the Vakatskae seem to be cordial and it is probable that Prithvissua I, anhstantially helped Vindhyashakti to defeat the king of Knutala. This must have naturally raised his prestige and Chaudragupta II thought it profitable to seems his alliance hy matrimonial ties. Rudraseum II, the crown prince was then married to Prabhavatignpta the daughter of Chaudragupta II at Patalipinta in 350 A. D.

Rudrasena II who succeeded Prithvissna in 385 A.D. was considerably under the influence of his powerfal, father-iu-law Chaudragupta II. He gave up Shaivism, his aucestral craed, and adopted Vaishnavism. The king? dom was lu a prosperous condition and place were laid for a joint offensive with the Gupts monarch, against the Shakas but had to he given up due to Rudmasena's premature death in 385 A.D.

Prabhavatigupta: Rudrasana II left behind him his two minor eons Divakarasana' and Damodsrasena and Prahhavatigupts, probably ou this advices of her father, assumed the powers of a regont und carried ou the administration for some twenty years. In this task she was not only helped with financial and military aid hy her father hat also with the supply of Gupts administrative officials. Prabhavatigupta suffered yet another hereavement with the death of her eldest son Divakarasena in the 13th year of her regency and Damodarasena was subsequently installed on the throne assuming Pravarasena II as his coroustion nams. It is probable that the fismors poet Kalidasa may have heen appointed a tutor to the young princes.

At the time of his accession to the throne in 410 A.D. Prayarasena II was 20 years old. He had no military

### NEW PEOPLES AND NEW KINGDOMS

or territorial amhitiona and passed his time in peace. He was a man of literary faste and the composition of the Parkrit poem Setudandha in ascribed to him. The poem describes the valourous deeda of Rama in the conquest of Lanka.

The early capital of the Vakatakas was Parika which was later on shifted to Nandivardhana. Pravarasena fonndod n new capital-which was named Pravarapara ntter him. In 430 A. D. Narendrasen, the crown prince was married to Ajithhattarikn, a daughter of the king Kantala. Pravarasena II lived for about 30 years and died in 440 A. D.

Narendrasena sneceeded Pravarasena II in 440 A. D. and ruled upto 460 A. D. Dnring his reign the kingdom was threatened hy invasion by a Nala king called Bhavadatavarman who penetrated deep into Vakataka domiaions and even occupied Nandivardhan the capital, in 445 A. D. hat was expelled by Narendrasena. Narendrasena seems to have heen an efficient king who retrieved the fortunes of his family and raised its pressing by attending its sway over a large part of the Nala Kingdom.

Prithvisena II, rnled between 460 A. D. and 480 A. D. the tranquility of his reign was disturhed by an invasion of the Trai-kntaka king Dharasena who was ruling in southern Gnjarat during 445-475 A. D. But Prithvisena drove ont the invader and reguined the lost territories. Prithvisena died childless and the kingdom passed into the hands of Harishenn of the Bassim Vakataka hraneh and by 540 A. D. succumhed to the inevitable proceen of disintegration.

The appearance of new peoples and new kingdoms in the story of this period is closely paralled by

#### STORY OF ANCIENT INDIA

rise of a great dramatist and poet and the introduction of a new trend in the sphere of art. The age of the Manyas was essentially an age of the Prakrits and now Sanskrit language and literature were coming into their own.

In 1909 Pandit T. Ganapati Shastri of Trivendrum, while on a tour in search of manuscripta made an epoch making discovery. He came across some paim leaf MSS. Almost all the playa ascribed to Bhasa were there in those Msa. For a long while scholarly opinion was generally critical of the genniaeness of the plays and they were considered to be a kerala copy of the works of the celebrated dramatist whose works, it was believed were apparently lost and his name being known only through references in other works. Like the authenticity of his plays, the date of Bhasa is also a subject of keen controversy, dates ranging from 6th century B.C. to 11th century A. D. being proposed for him by diverse protagonists. It is aster however, to generally describe him as a pre-Gunta dramatist and it is not profitable...at this stage, on the strength of the available evidence, to ascribe any specific date.

The plays so discovered are thirteen in numbers. Of these the Svapnavasvadatia and the Pratidnya have historical subjects; the Avimaraka and Charudatta are original in theme; the Balacharita, Suitaghatotkacha, Dutavakya, Karnabhara, Madhyamacyayoga, Pancharata, Uaubhanga are based on Mahabharata topies while the Pratima and Abhisheka deal with Ramayana themes.

In all his draman Bhasa chows his consummate skill at characterization and his intimate knowledge of the "sychology of the different classes of society from which

116

In his poems Achvaghocha reveals his mastery over the Kavya form and his wide and thorough knowledge of diverce sciences like philosophy ond grammar. The significance and importance of his works can be readily gauged from his iofluence on Kalidasa, the greatest poet of Iudia.

While new modes were being slowly evolved in literary composition a very interesting experiment was being conducted in the domain of eculature. We have eeen earlier haw there were two distinct tendencies in the srt of ancient India. The first woe the indegenane tradition reflected in the ort of Borhat and Samchi and the other foreign-influenced ort of the Manryas. The Gandhara art of this period essentially belongs to the latter category with this important difference that the Manryo artist so wields his imaginotion that all foreign influence is assimilated and metamorphosed while the Gandhara ortist-being o foreigner-bordly underloads the spiritual concepts of which he makes a free use. The most important specimens of the Gandhara art come from the N. W. frontier, the Mathura ond Sarnath regions but its influence could also be seen in the sculptures of Amravati.

The Gandhara school owen its origin to the patronage of the great Kushanaa. The Kushanas imported foreign artists and through their agency carried the application of Hellenistic technique to Indian subjects much farther than had ever been done before. Such foreign artists, accredited by royal antharity and the fashian of the court, must have been readily accepted as teschers by the local Indian acuptors, who after their accumstomed manner, would have proceeded to adopt the new methods to their own purposes, sometimes perhaps bettering on the

instrutions of their masters. Two distinct elements are seen at work in this art and these are the Greek and Baddhist. The Greek technique is used for giving expression, in stone, to exclusively Buddhist sentiments and the result though pleasing when at its best at first sight, is oneer on second thoughte. From the artistic point of view the art is neither Greek nor Indian-a combination of two heteroclite elements. We see, for instance, that in whatever postnre, the Buddha wears long hair and presents in his person a half-prince and half-spiritnal heing. Incidently it is to this art that the origin of the Buddha imsge is generally ascribed. A prominent example of such an Idealized king monk image is the seated Buddha from the Berlin Museum. Other examples are to be found in the museums at Mathura and Sarnath.

- . The art of the Gaudhara school has become the subject of almost nustinted praise and nuddinted condemnation. "The hest works of the Gaudhara school" saya Vincent Smith, "are deserving of high commendation for their nesthetic, technical and phonetic qualities, to use Forgueson's terminology; or in other words, hecause they are intrinsically heantiful, skilfully excented and well-adapted to express both the ideal of the artist and the religions sentiment of his patrons." On the other hand, this is what Dr. Coormaswamy, shother great authority on the subject has to say about the Gaudhara school. "The quality of the art" he says "is effeminate and sensual, its intention realistice".

Of greater interest to us is the stopa of Amaravati, a product of the Andhra-Satayahana age. The stopa is aitusted near the amall town of Amaravati on the south bank of the Krishna river in the Guntur district of the Madras Presidency. The stana was richly decorated with a scalptared railing ranning all round t. as in the case of Samchi and Barhat. The sculptares depict varions jataka scenes and episodes from the life of the Buddha. As in Gandhars art the later specimens at Amaravati betray strong Mahayanist infinences. The imaginative grasp of the artist coupled with his close observation of natura and his afforts to reproduce the feeling behind the scene have evoked such high encominms as the following : "The scalptures at Amaravati offer dalightful studies of animal life, combined with extremely beantiful conventionalized ernament and that the most varied and difficult movements of hnmaa figura ara drawn and modelled with great freedom and skill".

The other ortistic expressions of the aga are to be found in the Nasik, Karla and Kanheri caves. These caves represent a farther and architecturally important advance over the previous models. The plan is generally the same; a namber of residential cells with an attendant chaige or hall of worship (or stupa). The capitals display great ingennity, a delicacy of feeling and a bold imaginative sweep.

The architectural and cultural remains of the age abundantly show the prosperona economic conditions. The jewelry as shown at Amaravati is of infinitely diverse type and the social life appears to be highly conventionalized and elegent. As in the previous periods, pearl fringes over the hair, armlets, bangles and anklets is the case of women, formed the most important parts of the treasure-chest. The influx of foreigners in India produced some significant effects on the social structure. Along with their political power the foreigners were completely hinduised and thus increased the compositional variety of Hindu society.

Such was the age, with its new peoples and kingdoms, new modes of expression in literature and art, an imperative preenraor to the classical age of Ancient India.

## ıx ·

### THE GOLDEN AGE

THE political history of ancient India is a story of chronic dissipation followed by periods of hectic Imperial activity. The periods of dissipation are characterised by the absence of a strong cental power briaging in its wake a process of disintegration in the political field. At such periods the picture of political conditions is composed of small monarchies, petty principalities and inconspirons republics engaged in internecine warfare resulting in chaos and confusion. The *Arthaskastra* calls this as "*Matsyanyaya*," popularly understood as the big fish swallowing the smaller ones. From this period of anarchy and turmoil gradually emerges a power that is at once ambitions in conception and imperial in design.

Sach a set of conditions attended the rise of the Gnptas. The Manya empire ran its own course and succumbed to the historical forces of political disintegration. The downfall of the Knshann empire in Aryaverta (western India) synchronised with that of the Andhra empire in Dakabinapatha (Deccau). The disappearance of the rule of hufth these powerful dynasties from the stage of India histary took place during the first built of the third century A. D. Then followedexcept in the Panjab and the far unrul-west of Indian period of anarchy which cantinued for some time, till all disorder settled down under the suzerain power of the Gupta monarcha wha snaceeded in establishing a uorthern Indian empire which lasted in all its glory for well-nigh two and a half centuries.

The Gupta Clan: The clau which was raised to imperial dignity by the efforte of Chandragapta I and Samudraganta has its origin and early history obscured by vague traditious and ambiguous references. It is probable that some Guntas must have held official nositions under the Satavahanas as is evidenced by the Nasik and Karle Cave inscriptions. It is not quite clear whether these Guntas were connected with the Imperial Gapta family. The well-known Barbut pillarinscription of the Shnuga perind refers to Rajan Visadeva as Gauptiputra indicating thereby that his motherhelonged to the Gupta clan. The same ###BARG Ganptiputra ocenta in many other aucient records. These references definitely mean that the clan of the Guntas was not an obscure one; on the other hand the name was fairly well-known and common.

Traces of Gapta rule in Magadha are found as early as the 2nd century A. D. I-Teing (the Chinese traveller who visited India in the 7th century A. D.) tells ns of a Meharaja Shri Gupta (Cha-li-ki-to) who built a temple near Mrigesikhavana fur same Chinese pilgrims. I-Taing? "date would place .Shri Gupta round about 175 A. D.

\*122

Attempts have been made by some acholars to identify this Shri Gnpta with the grandfather of Chandragupta I, but the identification\_lacks an elament of finality.

Describing the political conditions before the risa of the Guptas Dr. R. N. Dandekar asys: "The sequence of the political events after the fall of the Kanva dyaasty therefore seems to he as follows : The Kanvas were overthrown hy a Satavahana King who snhsequently hecame the ruler of Magadha. The Satavahanas could not have heen at Pataliphtra and in Magadha for more than fifty years after the fall of the Kanvas. During the period whea the early Knshana priaces, Kadphises and Wema, were advancing against the Satavahana prince in Northarn India, a local Licohavi ruler established himself at Patalipntra. The Licchhavis, howevar, ia their tnin, had also to qait Pataligntra ultimately when a minister of Kaaishka advanced against tha Magadha capital. The Knshanas were thus virtaal masters of the whole of Northarn India for sometime after the beginning of the decadence of the Andhra power. During this period the eastwhile fendatories of the Andhras wara trying to make themselves politically independent. The downfall of the Kushanas... was accompanied by the rise of the Bharaebivas . . . There were thus two great dynasties abont that time (i. e. circa 250 A. D.) in Northern India, that of the Bharashivas, who rose to power immediately after the fall of the Knshanas and that of the Vakatakas.

We saw above that the first Gapta name we come across in the history of the period is that of Shri Gapta. The names of Shri Gapta's immediate saccessors are not kaown. The earliest name which is directly connected with the imperial Gapta sis that of Maharaja Gapta whowas sacceeded hy his son Maharaja Ghatotkacha. The first independent avereign (Maharajadhiraja) of importance in the line is of Chandragapta I, the son of Ghnotkacha. His necession could be placed in 320 A. D. held to be that initial date of the Gapta era. Like his great predecessor in Magadha,—King Bimbisara,—Chandragapta I, strengthened his position by a matrimonial alliance with the Licchavis of Vniehali and laid the foundations of an empire, which through its very life, symbolised the golden or classical age of ancient India.

The clan of the Lieshavis was a famous clan celehrated, agea ago, in the nunals of early Buddbism. Kumara Devi, whom Chandragupta I married, brought to ber busband valuable political infinence in the shape of a dowry and which in the course of a few years secured to him a paramount position in Magadha and the neighhonring countries. It seems bighly probable that at the time of this fateful union the Liechavie were the maeters or overlords of the imperial city and that Chandragapta, with this matrimonial alliance, naturally encceeded to the power held hefore hy his wife'e relatives. With what importance was the event regarded by the Gaptas could easily he judged by the issue of joint coins mentioning Chandragapta and the Licchavis. It is very likely that the Guptas and the Licchavis ruled over two contagions states which were amalgnmated with the marrige of Chandragnpta I, and Kumara Devi. A portion of north and west Bengal may be regarded as forming a part of the Gapta territory and North Bihar as that of the Licehavis. It is certain that by his Licehavi connection the status of Chandrsgupta I, was mised from that of a petty chieftain like that of his father and grandfather-to such political dignity that he thought it

124

×

fit is assuming the lofty title of "Sovereign of Maharajas" usually associated with a claim to paramonutcy. He struck coins in the joint names of bimself, his queen and the Licchavis and his eon and successor proudly described himself as the son of the daughter of the Licchavis.

Chaadragupta I, extended his dominious along the Gsugetia valley as far as the junction of the Gauges and the Jamuna, where modern Allahabad stands. He ruled daring his hrief tenure on the throne, a populons and fertile territory which included Tirhūt, South Bihar, Oadh and certain other adjoining districts. In the, opinion of many scholars the Gupta era dates from the reign of Chandragupta I.

Chandrsgupts I, was succeeded hy Samudragupta, one of the greatest conquerors and kings of ancient India. The period of his reign that of his successor marks the zeatth of the glory of the Guptas. His Conrt peet Harisheaa, who was also an officer of importance, has left us a nnique record of Samudragupta's early life and schievements.

The fourth verse of the Allahahad Pilldr inscription composed by Harishena describes a meniorable scene from the court of Chandragupta I. The full court was assembled, we are told by the poet, and "Samudragupta who heing looked at (with envy) by the faces, melaneeholy (through the rejection of themselves), of others of equal birth, while the attendafits of the court breathed forth deep sighs (of happiness), was hidden by (his) father, who, 'exclaiming "verily (be is) worthy embraced (him) with the hairs of (his) body standing erect (through pleasure) (and this) indicative of (his) sentiments, and (him) with an eye turning round and round in affection, (and) laden with tears (of joy.) (and) perceptive of (his) nohle nature,—(to govern of surety) the whole world,." These lines tell na of how Chandragupta I selected Samadragupta from among his other brothers as heir apparent to the throne of the Gaptas. It is possible that in his old age Chandragupta I, abdicsted in favour of Samadragupta or that "princes of the royal hlood had coveted the throne and these contending claims for succession were exciting the public, and perhaps even disturbing the political life. In order to put a stop to all dangers for the present and future', the King perhaps in the presence of all, nominated Samadragupta as his successor."

The Court post Harishena, while describing the nomination of Samndragnpta aa the successor of Chandragapta I, refers to the feelings of joy arising in the hearts. of some while the others felt sad, envious and jealoos. The amall number of gold coins with the name of a Kacha has given rise to a controversy among echolars regarding his identification. Fleet, Vincent Smith, Allan and Raychondhuri argued that Kachu was hut another name for Samudragupta while Rapson proposed that Kacha was a brother of Samudragupta who cujoyed a very abort reign as Samudragupta'e predecessor. Rev. Fr. Heras was the first to suggest that "a rehellion of Samudragupta's brothers against him in the beginning of his reign is hinted at in the Allahahad inscription and prohably even described in the same. ... His brothers seem to be allied against Samudragupta, most likely to proclaim king the eldest among them in his stead. Such proclamation was actually carried out, and the eldest brother of Samudragapta, presumably Kacha was enthroned; ... Bat this intrnsion did not last long; ... Soon . Ssmndragipta defeated his hrothers, and they finally acknowledged him as the real snecessor of their father."

After having put down the unsuccessful rehellion of his houther Samadragupta turned towards the consolidation of his Kingdom. The Allahahad inscription tells as of his conquests in Aryuvarta as niso in the south. Three stages in these conquest could easily be discerned and the following lines give an idea of the events and their extent.

The First Phase: The 13th line of the Inscription refers to Achynta, Nagasena and Kotakuhja who were nprooted by Samndragapta. This was the first phase of his campaigas. Achyuta was a ruler of Abicchatra aad aloag with Nagasena-a Naga king of Mathura-was a scion of the Naga family of Champa. Kotaknhja was a ruler of Shravasti. The reason for this battle seems to he that the three kings, taking advantage of Samudragapta's preoccupation in putting down the rebellion of , his brothers led by Kacha jointly made war on him with a view to regaining their independent status. The hattle must have been fought at Kaushamhi, since it was the most convenient place where the Kings of Ahicchetra, Mathura and Padmavati could meet nud where the Allahahad Pillar was originally erected at that time. The defeat of these three kings helped in the consolidation of Samudrsgupta's empire round nhout Magadha after which event he proceeded on his triumphant march to the south.

The Second Phase: We are told about the twelve kings of Dakshinapatha who were subjugated by Samudr-

127

ngnpta in the 19th line of the inscription. The twelve kings are as follows:

- Mahendra of Koshala—Sonth Koshala in the Mahanadi Valley, comprising parts of the modern districts of Jubbnlpore, Rnipore, Bilaspore and Sambalpore.
- (2) Vyngburaja of Mahakantara-Snuthern forest country-tributory states of Orissa and the backward tracts of the central pravinces (Jaso State).
- (3) Mantaraja of Kosbala—either the district round the modern lake Kallern or Kerala.
- (4) Mahendra of Pisbthapura, —Pithapuram in the Godavari district.
- (5) Swamidatta of Kotthnra;-Kothoor, 12 miles south sonth-east of Mahendrngiri in Ganjam district.
- (6) Damana of Erandnpulla-Erandol in Khandesh or Ganjam district.
- (7) Vishnngnpn nf Kanchi-Conjeeveram in the Chingleput district, Mudras.

- (11) Knbera of Devarashtra-Yellamamchili in the Vizagapattam district.
- (12) Dhanenjaya of Kusthalapure-not definitely identified. May he Kuttabur in Northern Arcot.

From the identification of the place names given it is possible to trees the route of Samadragupta's triumpheat march in the South. He must have passed through the Rewa State and the Jubbulpore district, defeated Mahendm of Mahakoshala, entered the Eastern Gondwana forest, where he defeated the chief Vyagharaja and emerged on the eastern coest in the Vizagapattam district. After emerging from the foreat Samadragupta defeated Mahataraja of Koshala and another Mahendra of Pishthapura; then proc-eded aonth and defeated Swamidatta of Kottura hill.". Then Samadragupta ndvanced as far as Vengi and Kaachi.

The magnitude of the campaign undertaken by Samudragnpta can easily be judged from its results. The whole campaign involved some 2,000 to 8,000 miles of marching across diverse types of territories with few tracks and fewer roads and must have taken at least three years for its completion. into Gnpta territory as is evidenced by his inscription at Sisunia. Matila, who ruled over the territory of modern Bulnudsahr district, Gauapati Nags of Nalapura or Narwar in Gwellor State, Balavarman of Assam sud other kings of Aryavarta enflered the same fate.

Tribal States: Besides the above mentioned kingdoma which either came under the direct sway of the Imperial Guptae or were feudatory to them there were several border states and tribal republics who declared their allegiance to the Gupta sovereign. The Mulawas (Mandsore State), the Arjunayauns (in the Punjah), the Ynudheyas (Bharatpur State, Garwhal and Rohilkhaud), the Madrakas (Sialkot), the Abbiras (western Rajputaas), the Prarjuuss (Ceatral Provinces) the Sauakanikas, the Kakas and the Kharaparikas (Damoh district ju C. P.) preferred to give tribute to the mighty Gupta mouarch rather than risk a war with him. Likewise the kings of Samatata (Part of East Bengal bordsring on the sea), Davaka, Kamarupa (Assam), Nepala and Kartripura (Katarapur ia Julluudhar District) fully gratified the imperioue commands of Samudragupta.

By now the power and prestige of Samudragapta were felt even outside the borders of Iudia and even foreign (kings sought to establish their friendship by sending preceute to his Court. The inscription mengtions Daivaputa Shahi Shahanushahi — a Knehesa prince, Saka Marunda (foreign potentate raling over some parts of Central Iadia) and Meghavaran of Ceylou as seading presents to Samadragupta.

Shortly after the termination of hostilities Snmudagupta celebrated the famous Horse sacrifice signifying that he was the Lord perumount of India. According to ancient and time-houoned tradition every king with eny pretensions to supreme power had to formelly establish his cloim by performing the horse-sacrifice. A horse was let loss to wander at its own sweet will wherever it liked for a period of one year. Any king wanting to challenge the enpremocy of the king to whom the horse belonged hindered its progress. A conclusive hattle was fought end the horse was set free to return to the capitul in o year's time efter its peregrination. Samudragupta commemoroted this important event by isening a type of coin well-kaown es the Asivamedha type.

The empire of Somudragupta comprised nearly the whole of Northern India (excluding Koehmir) Westeru Paajab, Western Rojputana, Siad and Gujaret, together with the highlad of Cochettiogarh and Orissa and a long stretch of territory along the easteru coost extending us far south ee Chiagleput. The home provinces and certain other adjocent territories were directly administered through the Emperore own officiale while the tributory states fnactioned under the local potentaes.

Samudrágupta's Personality: It is not snrprising that the maa who wos nhle to nchieve eo mnch und with such thoronghuess had un outstunding and muny sides personality. The *Manyashri Mulakapla*, u 'Mahuyanist Buddhist book gives the following character eketch of Samudragupta.' 'Samudragupta was lordly ehedder of excessive blood, of greot powers and dominione, heartlese ever vigilent, (mindfnl) about his own person, numindfnl of the hereafter, sacrificing unimals."

This being a Buddhist account cannot be expected to be very complimentary to a Brahmanical king but still

the sketch brings ont Samndragupta's manliness and dominating personality. The inscription tells as that he nlways took pleasure in associating with learned people and was a "supporter of the sacred scriptures". always offered generous patronuge to poetry and learning He: and was himself an accomplished musician. He was an excellent warrior and his "most charming body was covered with all the beanty of the marks of a bundred confused wounds" received on numerous fields of battle. An outstanding soldier king of our ancient times. Samndraguptacould not yet be described as a militarist. His conquests , of the southern territories and his generous treatment of their kings bear eloquent testimony to his high ideals of Dharamavijaya. It is enstomery to describe Samudragupta as the Napoleon of India; such a description though encomious is not quite just to the former for Napoleon regarded kingdom taking as the duty of kings while Samudragupta's actions were strictly regulated by the Hindu ideal of Dharmavijaya Though a soldier through the all-- powerful requirements of his station in life, Samudragupta was a man of learning and culture, tolezant in his religions beliefs (though himself a fervent Hindu he readily granted permission to the Ceyloness' embassy to build a monastry for Buddhist pilgrims) and gallant in the treatment of his adversaries. We know from an incription that his chief queen was Dattadevi. He must have ruled for a long period and his - '-n must have lasted from 328-29 to 377-78 Af

.

ealled Ramagapta who was the immediate successor of Samndragapta.

It was generally known that a drama called Devi-Chandragupta by Vishakhadatta existed from scattered references to it in the Natyadarpana of Ramchandra and Gunachandra. Fregments of the drama were also, likewise, preserved, in the Skringaraprakasha. of Bhoja. By pieciag together all sach notices we get a connected story of Ramgupta.

The story of Ramagapta, if told is a coasected form would run as follows. It appears that Samadragupta was succeeded by his son Ramagupta, who was such an imbedie that rather than lose his life and kingdom la war, he consented to sead out his wife Dhruvaderi to the harem of the Shaka king of Mathura (probably a raler of the western Kehatrapa dynasty); his brother Chandragupte, however came to his rescue, and attiring himself as a lady, went into the Shaka King'a harem and killed him there. Eventually ho killed his brother and married his wife.

It is true that this King Ramagupta is an where directly referred to is any of the Gapta inscriptions but literary references like that is the Harshacharita of Benna and in the Majmal-ut-Tawarikh as also the Sanjan Copper plates lend credence to the story of Ramagupte.

One important objection fowards the acceptance of the Ramagupta story is the improbability of the Shakas growing so powerful immediately after the death of Samadregupta as to impose such humiliating conditions on his successor. It is suggested that "in spite of Samadragupta's conquests and expeditione. the glory of the Gupta empire begsu to decline perhaps towards the end of his reign. His forward policy must have created a number of enemies who must have been waiting only for a suitable opportunity to reassert themselves."

### CHANDRAGUPTA II

With the ignominous blot upon the honour of the. Guptas being removed, Chandragupte II consequently succeeded on the Gunta throne. It appears from the convertional Gapte geneology that Chandragupta II was chosen by his father Samndragunta to anceed him but as this was not made public Ramegupta succeeded Samudragupta. After the death of Ramagapta, Chandragapta II asenming charge of the administration as the legal monarch started operations for the consolidation of the empire. The Meharauli Pillar which is often ascribad to him tells us that he fought the Bahlikas and strengthenad his north- ' west dominious from the Jullundhar Doab to Mathura. He also anuihilated the power of the western Kshatrapas and annexed their dominious. These operations put an end to the longest foreign dominion on the Indian soil and added the important and fertile territories of Kathiawar and Northern Gujarat to the Gupta Empire. The Empire now extended from the Bay of Bengal to the Arabian sea. The acquisition of these coastal areas with their populous and rich hinterlands facilitated the commercial activities of the people who were thus brought into a closer contact with the western world.

The ampire of Chandragapta II was enbstantially the same as that of his father with addition of Malwa and the Kathlawar peninsula. It extended from the Arabian sea to the Bay of Bengal and the Himalayas to the Narmada.

134

...

An important feature of the "foreign" policy of the Gnptas is the political significance of their matrimonial alliances. We saw before that the marriage of Chandragupta I, with the Licchavi princess Kumaradevi. helped much in the foundation of the Gupta Empire. In the reign of Chandrngnpta II such marriages again come to the forefront as matters of policy. The Va. kstakas, though not so powerful us to endanger the political existence of the Guptn dynasty, were sufficiently, strong to canse embarrassment and annovance if provoked into hostile action. So, instead of waging mutually destructive wars the Guptas placated the Vakatakas and earned their support in times of stress by marrying Prahhavati Gupta, the daughter of Chandragapta II to the Vakataka Rudrasena II. Chandragapta II himself married Kuheranga, a Naga princess, while a daughter of Kakasthavarman, the Kadamhs King was married to his son Kumaragupta. All these matrimonial "connections were the forerunners of solid polititical alliances which helped in creating a sense of internal security, peace and prosperity.

Chandragupta-Vikramaditya of Ujjain?: The glorious military exploits of Chandragnpta II uaturally compare well with those of Vikramaditya of Ujjain, the most celebrated and almost legendary figure in Indian sagas and tales. Dr. R. N. Daudeknr is of the opinion that though Patalipntra was the official capital, Chandragnpta II made Ujjain his second capits! "probably in view of the special exigencies of administration that arose particularly on account of the wars against the Shakas and the consequent reorganisation of the newly acquired territory in that region". This fact would naturally account for the genesis of the glorious cycle of legends abont Vikramaditya of Ujjain. Again, it is also true that Chandragnptn II, like his father before him, assumed a title in this case Vikramaditya. In the opinioa of many scholars he is the original of the lengendary king Vikramadityn of Ujjain, who defented tha Shakas and was the founder of the Vikram Samwat.

Chandrugnyta II had at least two wives. The first was his elder brother's widow Dhruvadevi and the second Kinberanaga. Ho had at least one danghter Prabhsratigupta-who was married to tha Vakntaka. Rndrasena II and three sons Kumarrgupta, Govindagupta nad perhaps also Ghatotkaelargupta. The lattar two wera appointed to rula as Viceroys over cartain provinces of his vast empira. Besidea his titles Chandragupta II had another name Devagupta and though ha is atyled as a Paramabhagavaia, a Valshaava in aoma inscriptioas, ha was tolerant la his religions attituda and liberal in his acticas. He enjoyed a tairly long reign of mora than 36 years (3767 A. D. to 415-16 A. D.).

The reign of Chandragnpta sew the consolidetion of the Gnpta empire and represents the zonith of Gnpta glory. It was during his reign that all foreign domination in India was ended and there followed a period of social peace and economic prosperity. The acquisition of the Kathiawar sceboard gave an impense to oversives trade and migration and consequently helped much towards increasing the prosperity of the land.

But it is in the field of coins that Chandragnpin II's contribution is the most striking. It was he who introduced innovation in the gold, silver and copper coinage of the country. Ilis coins are characterised by considerable originality and artistic heauty. Generally they repier sent a parely Indian type of goddess seated on a lotas while the other designe are the conch, the umbrella, and the horseman. The texture and execution of the coins well reflect the prosperity and high artistic talents of the people of the age.

# KUMARAGUPTA I

Chandragnpta II, Vikramnditya was enceeeded by his soa from Dhravadevi, Kamaragnpta L Hie reign though peacean and prosperons in the heginning ended in disester. Ohvionsly to the peaceful part of hiereign belong the thirteen inscriptions-the largest number referring to aay one Gapta Kiag- and the numerone coias foand ia widely acattered areas. From the findspots and the contents of these inceriptions it can easily be earnised that Kumaragapta I was ahle to preserve intact the vast empire hegacathed to him by his glorious father.

Kamaragnpta I, like his predecessors on the Gupta throae followed a policy of religions toleration. He huilt a temple of Kartikeya in Bilsad in the Etah district, in the United Provinces; he dedicated an image of n Jaina Tirthankawn nt Mnthnra; he is described ns Pardmadaivata in another insciption signifying thereby that he wns etanneh devotee of Vishnn. Ac would hecome a Hindn king he performed an Ashvamedha in commemoration of which event he issued his very are Ashvamedha coine.

A number of incriptions throw important and interesting light on the governmental system of the times. The Kingdom seems to have been divided into different provinces for the purposes of administration and each part was governed by a viceroy who was invariably a memher of the royal family. We have thus Chiratadatts ruling over the Pannevardhanh Bhukti of Northern Bengal, prince Ghatotkacha Gupte administering Eastern Malwa including Tumbavana and Bantihuvarman ruled from Dashapur in Western Malyra.

The fairly prosperons and peaceful reign of this king was overshadowed by the dark clouds of invasion by foreigners. It is generally believed that the adversary of the Gupta King was the king of the Pushyamitras. Who these Pushyamitree were it is difficult to say. But whoever they might have been the effect of their hostilities is all too evident. Not only did they constitute a grave menace to the empire but were responsible for "rinning the fortunes of the Gupta family". The enemies, it appears, had greet resources in men and money and it is possible that the Gupta king met with serious setlacks.

"Kumargupta I" enya Prof. R. D. Banerji "was weak in character and fond of a life of ensy indolence and he was no intrepid leader of men." The Manjushri Mula Kalja deacribes him as by no meane a weak, king and it is possible that old age when the foreign invasion came, found him incepable of dealing with it squarely in all its magnitude and fury.

Kumaragapta I, was also known as Shri Mahondar, Ashvamedhamahendra, Simhevikrama, Vyaghrabalaparakrama etc. His reign was a long one and extended over 40 years (415 A. D. to 455 A. D.)\_ His queen was known as Anantedevi and at leest two some Puragapta, son of Anantadevi and Skendagapte aon of Devaki, another queen, are known to ns. It is probable that Kumaragapta I died while the struggle with the Pushyamitras

#### SKANDAGUPTA

Skaadagnpta who was fighting the Huna hoardes in the last days of Kumarngupta I, was his successor after his death. The Bhitari Pillar incription describes him as the saviour of the family fortnne, fighting the harbarians, nudergoing great hardshipa, apending a whole night on a couch that was the bare earth, conquering the Pushyamitras and defeating them. He is credited by the same inscription to have conquered his enemies by the strength of his arm and re-establish the ruined fortunes of hislineage.

The early part of the reign of Skandagupta was an doubt full of troubled events and a war of encoession appears probable though the evidence for it is vague. A gold coin on which the King is represented as standing-, with a bow and an arrow in his hands with the figure of Lakshmi on the right, when rend in conjunction with the statement in the Junagadh inscription that the "Goldeess of sovereignty, discarding all other princess selected him of bar own necord," would lend support to the view that Skandagupta did not rightfully succeed to the throne hut had to secure it with his own prowess and valour.

The early life of Skandagnpta was a long succession of battles waged to atem the tide of the depredatory bands of the same Hunns who had shaken the very foundations of the kingdoma of Europe. He is credited with having defeated his enemies and thus it was due to him that the tragedy of the devastation of the fair soil of India by waves of foreign maranders was postponed, if not, decreased in fary. As to who these Hunna were, it will be discussed later on. Suffice it to -say here, that they lived in **Central** Asia on the Western Border of China us far back as 2pd century B. C. and oue branch of them called the Ephthalites or the white Hunas were the harbarians who menaced the existence of the Gupta throne. Skandagupta was able to check their progress, even though temporarily, before 460-1 A. D.

The long drawn ont warfare necessitated by the eruption of the Hunas on the borders of India necessarily reflected on the economic life of the land in impoverishing the aoyal treasury and distarbing commerce and industry. This is specially so in the case of coinage. The Gold coins of Skandagapta are rare and of depreciated purity, the causes of which may easily be traced to his wars with the Hanas and other internal troubles.

An inscription found at Mandasor mentions Ohandragppta II and his son Govindagnpta hut nowhere is the name of Skandagnpta to be found in it. A clay seal found at Vaishali refers to Chandragnpta II his Queen Dhruvadevi and their son Govindagnpta II. This would suggest that Govindagnpta had rebelled against his nephers Kkandagnpta. Similar inscriptions from Western Malwa give evidence of growing rebellions among the fendatories of the Gaptas. Nurendrasena, the Vakataka "King claims that his commands were obsyed by the lords of Kosiala, Mokala and Malava which indicates his powerful position. All such bits of evidence tempt us to deduce, that internal troubles which formed a most potent contributory factor in the disintegration of the Gapta.

The political sagacity of Skandugnpta becomes evident in his appointment of trastworthy Governors or wardens of the marches for the purposes of preserving internal security and as sentinels for apprehending foreign invasions. From the Junagadh rock inscription we know of Parna Datta of Saurashtra who was responsible for the reconstruction of the hroken dam. Sauva Naga of Antarvedi or the Gangetic Doab, Bhimavarman of the Kosam region were some of the governors appointed by Skandagnpta.

Skandagupta had a fairly crowded but a short reignspreading over 12 years. (455-6 A. D. \_to 467-8 A. D.). Like bis predecessors be adopfed the titles of Kramaditya, Vikramaditya and Deva Raja. 'His achievement could best he summarised in describing him as a ccaseless fighter for the protection of his motherland from spoliation by foreign\_barbarians, a' tolerant monarch in matters.religious, though himself a devont Bhagavata, and a wise administrator all of which go to mark him out as one of the greatest of the Gupta Emperors who died a. hero ia barness.

• Already in the reign of Skandagupta the empire very obviously hetrayed signs of cracking up and lapsed back into the state of dissolution. The story of the later imperial Guptas only brings the element of dissolution in the forefront. The history of the period after Skandagupta is more or less a story of chaos with occasional flashes in the shape of the names of kings and their short reigns which were mainly occupied with incessnut straggle with enemies hoth internal as well as external. From the mass of indefinite, inconclusive and conflicting evidence only a hare outline of events could be formed. And the following lines attempt to present a rough sketch of the times. his royal ambitions fulfillad when hs succeeded on the Gupta throne after his hrother's death. He had a very short reign and died sometime before 473 A. D. He, as well as his successor, do not seam to have had may hold over the distant provinces of Skandagnpta's Empire, like Centrel India, Gujarat, Malwa and Sanrashtra. His queen was named Vstsadevi und his son was Narasinhagupta Baladitya shout whom nothing much is known.

Kumaragupta II; The very name of this king suggests that he must have been very young when he succeeded to the throns. He assumed the title of Kramaditya. His was a very short reign which must have terminated before 476-77 A. D.

Budhagupta: With Bndhagupta we are on firmer ground. Six of his records have been known so far and these show us beyond the shadow of a douht that he railed over extensive dominions. His empire included Northern Bengal, the Kashi country and parts of Central India. He railed for twenty years from 477 to 496 A. D.

The Maitrakas of Valabhi: The dynasty of the Maitrakas which ruled over the Kathiawar Peninsula with Valabhi as their capital from 500 to 770 A. D. shows how clowly the officers and fendatories of the Guptas, in their period of decline, were either founding their own kingdoms or throwing off the allegisace to the Guptas. From the numerous records left by the dynasty we learn that Bhattaraka, a general of the Gupta emperor grew to be so powerful as to become the chief of Samshtra. The Mairtakas, at least in the early days, nominally acknowledge the suzerainty-of the Guptas, hut later on, when the power of the Unptas had recohed its nodir they declared themselves independent. Similar was the cass with the Porivrajaka Maharajas and the Ucchakalpo Kings.

Bhanugupta Baladitya II: The reign of Bhanngupta Baladitya II is memorable for it was during this period that a crashing defect was inflicted on Mibiragula, a Hana Chieftain and the successor of Toramona in alliance with Yashovarman of Mandasor.

The Hunas : The Hnnns were a band of nomadic savsges originally living in the nsighbourhood of China. They advanced towards . the west and split up into two main streams, one going towords the Volga ond the other to the Oxns. The Volga-honnd division figures prominently in the onnols of the Roman empire. The other hand, originally subject to the Joan Joan tribe, became very powsrful in the Oxus Valley towords the middle of the fifth century. They were named Hephtholities or Ephtholities or ths white Hunas after the name of their ruler's family. From the Oxas valley they descended upon Persia and India. Skandagupta inflicted a crushing defent upon them, sometime between 455 to 467 A. D. and saved the Gapta empire from their ravages. The rulers of Persia were less successful and in about 5th century A. D. the Huna power attained its greatest height ruling over n vast empire with the capital at Balkh. About the activities of the Hnnoe in Indin very little is known. Two kings Torsmana and Mihirguln are known from inscriptions and coins. Toramnna, we nre told by the Juln work Kuralayamita was the king of Uttarapatha. He lieved at Paventyn on the banke of Chumhal. The capital of Mihirkula, accord

Hinen Tsiang was Shakala. He first took some interest in Buddhism but later on became hostile, working for the extermination of the faith.

The Hunas descended upon India in two waves. The first may be dated about 400 A. D. They were defeated by Skandagupta but were able to retain possession of Gandhara and founded a petty kingdom there.

The second wave was led by Tormana, after two centuries. They were able to penetrate as far as Malwa. Mihirkula, the successor of Toramana was haally defeated by the combined efforts of Narsinha Gupta and Tashovarman of Mandasor.

Due to incessant warfare with the Huna hordes and straggles with the feudatories, who were progressively becoming powerful and aggressive, along with the weakness manifest at the centre, the Gupta empire eramhted to zuin. Certain vestiges of Gupta rule in some parts of India continued for some time ufterwards but they were too local and insignificant to count in an all Indian historical recapitulation. The empire of the Imperial Guptas which had its foundations laid by the brave efforts of Samudragupta and which reached its zenith of glory through the glorious exploits of Chandragupta II had now, for all intents and purposes caesed to be. The golden äge at ancient India continued for about a century illuminating its life and culture.

. Government administration during the Gapta period had attained a very high state of development and efficiency. The King, it is needless to add, was the 'repository of all powers, eivil, juddicial and military but

be often consulted bis conneil of ministers on important points of etatecroft. In Guptn times n coverigin was often appointed by his predecessor and the right was not absolutely bereditory. Princes, in their formative years were entrusted with responsible administrative posts with o view to occord to them a background of practical training and to develop their ability to take quick and effective decisions.

The Viceroys in charge of the larger nuits were generolly persons from the royal family. The King had a council of ministers to assist him.

The empire, for the purpose of efficient odministrntion was divided into provinces called Deshas. The head of a Desha was a Viceroy. The provinces were again subdivided into bluktis which were about the size of the commissioner's divisions in modern times. The bluktis were, in their turn, subdivided into vishayas, squivalent to a modern district. The officers in charge of the bhuktis . were known as Uparikas who were directly appointed by the emperor. The Vishayas were administered by Visha-Sapatis who were appointed by the Uparikas and in rare cases by the emperor himself. The emollest administrotive nnit was the village and the Gramyaka was chorged with its administration. The Village conneil functioned normally and discharged the daties of villoge defence; settling village disputee, organising works of public ntility, and collection of government revenue.

There were various grades of administrative officers like the Mahaakshapatalika (Ministerin obarge of records) Mahapratihara (Chamberlain) Mahadandanayaka (Judge) etc. The army ond its odministration were in the charge of the Mahasenapati (General) though the sapreme mander was slways the King. There were seven departments of sdministration, the most important being, civil, revenue and police, military and judical, pertsining to the central, provincial and local administration. The military department was lunked after by the Makasandhivigrakika (Minister for pesce and war) and it was divided into four corpe like infantry, cavalry, chariots and elephants and camels.

Fs-Hien who travelled in India and Ceylon during 399-414 A. D. has left us his detailed impressions of the life of the people in the hame provinces of the Gaptas. In the Middle Kingdom, he says, "the cold and heat are , finely tempered, and there is neither hoarfrost nor snow. The people are numerous and happy; they have not to register their honseholds, or attend to sny magistrates and their rules; only those who cultivate the royal land have to psy (a portion of) the gain from it. If they want to go, they go; if they want to stay on, they stay. The king governs without decapitation or (other) corporeal punishments. Criminals are simply fined lightly or heavily, according to the circumstancee (af cach case). Even in cases of repeated sttempts to wicked rehellion, they only have their right hands ont off. The King's hodygnards and attendants all have enlaries". The dress of the people concieted mainly of turbans, conts, shawls and loose garments which were similar to the modern dhoti. In matters of prnaments, earings, necklaces, armlets and anklete were very popular. The coins of the Gnpts kings show them dreesed in tight-fitting coats. troneere and head-dreee, wearing earinge and armlets and the queen is dreesed in a loose eari and tightfitting head-dress. Sometimes a shawl-like spparel was brown loosely over the shunders.

The existence of a large number of Gapta coine hoth of gold and silver suggeste the economic proeperisy of the country during the age. Crafte and trades were generally organized into guilds as in the olden days but the set up of such guilds had now become more elaborate and complicated. The main source of income for the etate was, of course, land revenue for the collection of which a very complicated administration was employed. Land was classed as follows : waste, pastnrags, agricultural, etc. and rates of collection varied accordingly. stable enrrency backed by the vaet resources of the state naturally facilitated extensive trade and commerce. These coine of the Gaptas throw a flood of light not only on the political and economic conditions but aleo illuminate the religions ideas of timee. And to these last wo shali turn in the next few pages.

# x

## EXPRESSION OF THE GOLDEN AGE

A borseman type coin of Chandragnpta II significantly describes him as Paramabhagvata. Several coins of the Archer type belonging to the same king prominent-/ ly display the wheel of Vishma. Many coins of Kamargnpta I, show the eagle (garinda) which is the conventional vehicle (Valama) of Vishma. All these indications clearly show that many of the Gapta monachs were ardent devotes at the Bhagavata creed or Vaishnavism. The Gapta age was essentially an uge of the triamphant revival of Hinduism and Hinda culture. Samadragnpta, after his conquests performed the celebrated horse fice, in commemoration of which he issued a special

of coias known as the Ashvamedha type. The Vaishnava creed, dariag the Gapta period, had finally emerged as the accepted creed of the masses of people and connicd within its folds kings and commonera alike. Vaishnavism, before it reached this status of preeminence; had to go through gradual spread and evolution through many a cantury and in order to understand its final appearance we mast acquaint ourselves with the broad outlines of its previous history.

"The cult of Vasudeva," observes Sir E. G. Bhandarkar. " must have been formed from the same intellectual ferment es produced Buddhism and Jaiaism but ss a religious reform it was on more coaservstive priaciples. It repudiated slaughter of animals and the inefficacy of the sacrificed rituel and advocated the path of devotion as the way of salvation. Like Buddhism and Jainism it was a natural reaction against the harres excesses of the ritualism of the Vedas. Another important characteristic of the Bhagavat sect was that originally it was a Kshatriya movement professing the principles advocated · by a Kshatriva warrior-philosopher. This new religious theory preached hy Krishna was adopted hy his tribe the Yadavas who had their habitat round Mathurs. As it was essentially n religions movement initiated hy a Kshatrive and sponsored by the warrior caste it must aot have found much favour with the Brahmanas. Indeed, it is highly prohable, that they viewed it with much hostile interest hut were later on forced to accept it due to the pressnrs of circamatances, nt the time when Brahmanism was threatened by the aggressive spread of Buddhism and Jainism. The former was more dangerons not only did it flout the authority of the Brahmanus

#### EXPRESSION OF THE GOLDEN AGE

and their sacred texts, the Vedas, but also did it reject the easte theory and turned towards nu ambiguous agnosticism. Hence, to counter the influence of Buddhism, Brahmanism must have made a common cause with Bhagavatism. It is at this time that 'Vasudeva Krisnha was identified with Vishna. The Buddhist propuganda of castlessness must have provided the prime cause for such an amaigamation. For it is only during the reign of Shungas, that Vasudeva worship floarished in Magadha of which we have evidence in the form of archaeological remains of a Garuda column.

"The priesthood", says Edgerion, "in order to maintain its sacredotal leadership took up Krishna Vasudeva who was a popular deity und identified him with Vishun, the old Rigredic colar god." "Brahmanism" Edgerton remarks, "stocped to conquer, it absorbed popular cults which it had not the strength to uproot. The simple and ancient device of identification of one god with another furnished the means to this end."

There are numistakahle traces of the influence of Bhagavatism on Buddhism, especially the lster phases of it. The cult of the devotion in staps worship is clearly due to the influence of Bhagavatism and to the same source is to be attributed the senlptural representation of foot prints of the Buddha. .

The Founder: The founder of Bhagavatism, Vaandeva Krishna, was a chieftain and head of the Vrishni, which helonged to the Yadava clau. Krishna was his personal name and Vasudeva his patronymic. He had a brother called Samkarehana. Krishna who was the leader of the Satavata Sopt, lived in the 9th century B.C. There is also a reference in the Upanishads

tioning Krishua Devakiputra who was a pupil of Ghora Anginasa. From this it appears that his mother's name was Dévaki. According to the Kalpasutra (S.B.E. XXII) p. 246) she woke up un asseing anspiolons dreams at the time of conception. Thus we have no real difficulty in accepting Vusudera Krishua as a historical figure. Sir R. G. Bhandarkar thinks that Krishua and Vusadeva were two distinct individuals in the heginaing and later on identified But this view enanot be accepted. As is shown by Rayehondhri, Vusadeva was really Krishua's patronymic and originally Krishua must have been a Kshetriya hero. The pastoral association must have been horrowed from the Rigvedic descriptions of Vishua, especially after the association of the Abbiras, who were a pastoral. tribe.

Krishna Vasudeva: The identification of Krishna Vasudeva with Vishna is an interesting phase in the development of the former as a Bhagoat (Lord). Vishun is quite a minor god in the Rigveda hut in the Upanishadic period he came to occupy a very prominent position—"highest among gods". ,Dr. Dandekar has very exhaustively dealt with the prohlem of the evolution of Krishna into a memher af the Hindu trinity and we cannot dn better than summarize his conclusions.

Vishnu: Vishnu, according to Dr. Dandekar, in the early period must have been connected with vegetation ritnal. He had in him certain traces which were abhorred by the vedic Arrans and even though he must have heen a popular god of the masses, was ignored by the composers of the vedic hymns. In post-vedic times popular radigion ngain came to the forefront and with it Vishnn. In the second century B. C. when Brahmanism made an ulliance with Bhagavatism Vishnu had already become the all important god and hence he was promptly identified by the Brahmanns with Krishna Vaendeva. Names like Vishnndetta and Vishnarakshitu clearly show that the identity was an established fact in 100 B. C.

The sources of the philosophy of Bhagavatism are to be found in the speenlatione of the Upanishads. The three principal tenets of the creed are Karma, Sonl and God. The nature of Karma is much the same es the Buddhist conception of cause and effect but the Bhagavata believe in selflees Kurma which in itself is service of the Lord. The conception of sonl is ennnelated in the Gita. Soul is conceived as un eternal, indestructible principle of existence. God is conceived as nn all loving God, omnipotent and "heing moved hy the distress and ignorance of men ". The nature " of Vasndeva as enanciated in the Mahabharata is that he is the supreme sonl, the eternal soul of all sonls. He is the supreme creator. All living heings ars represented by Samkarshana who is a form of Vasndeva. The chief characteristic of the Bhakti cult, which is another name for Bhagavatism, are helief in monotheism, love, admiration and worship of God ac, the , means of salvation. In the second century B. C. the doctrine of Vynhas was already developed for Patan." jali mentione the fonr Vynhas, of Vasndeva, Samkarshena, Pradynmna and Aniraddha. The main emphasie of the philosophy of Vaishnavism is as expres-... eed in the Bhagavadgita on the doctrine of (Karma). It ennnciates some of the nohlest Hindnism, the foremost among them heing 2

Prasad (faith and divine grees). While we sre speaking about Vaishnavism we may also try to discuss the message of the *Bhagoadgita* which had by now emerged almost into its finalized form. Of , all the sacred books of the Hindus there is none so popular, so uniformly heautiful so lofty and so positive in its message, as the *Gita*. By its very nature and scope it epitomizes ell that is best in Hindu philosophy and in the process of doing so often hes to survey and reconcile contrary views lending to diverse interpretutions.

" The causes for the tramendons popularity of the Gita ars many and varied. First of all consider the setting; the mighty Kaurava-Pandava armies are poissd for a sengainary hattle. A word from the respective commanders and the legions would he interlocksd in a deathlike ferceity. Arinna then, snrveys the field and naturally in the opposite phalanx finds many of his blood relations and revered teachers. This produces in his mind the most epectaculer re; action. He reflects, is it proper for him, a warrior, to spill so much fraternal blood just for the selfish motive of 'enjoying a kingdom ! The how drops from his hand, he turns towards Krishne his charioteer end . guide and excluims in aslf pity, 'No! I cunnot do itl' Then Krishnn synmines all his douhts and shows him in an anmistakable, way the path of his duty. Such is the formal excellence of the Gita. Again, take the spirit of toleration that aheds its pleasant mara over. the entire composition enlivening its every word end systy single modulation of tone. In this there is no rahid dennncistion of mny mode of thought. All nre satirely on their own merits. Ariana is

on the horns of a moral dilemma-should he, as befits a warrior, fight in battle irrespective of whom he strikes down, whether friend, relative or preceptor or should he, considering the selfish motive which goaded him into such a disastrons action, refrain from pulling the string of his bow?

Different Interpretations: Being n dissertation on the problem of finding the correct approach to'nn incipient action, the Gila has naturally to treat with formal approval different modes of thought "All modes', says a proverh, "lead in Rome". "All modes of devotion", says Krishna, "lead one to communion with Ishvara" whether it is that of ritualistic devotion or devotion of knowledge or Bhakti." Under the circumstances then, the Gila is exctremely liable to a number of diverse interpretations.

Message: But it cannot be gainsaid, that the core of the philosophy of the Gita brenthes forth the glorions message of Karma Yoga or activism. Kurma, in this context, is not to he interpreted within the meaning of the word ritual or passive knowledge loosely interpreted. Karma should rather be rendered as-devotion to the discharge of social obligation. But devotion here does not imply a means to an end but the end in itself. Your concern, says the Gifa is solely with action, not with its fruit. It closely examines the two ideals of Nigritti or rennuciation and Pravritti, which means an active life. perhaps with selfish interests, and points to the golden mean of action without thought of recompense. That is the message of the Gita,-the message of disinterested but positive action. -,

Samkhya and Yoga. It is possible that the systems of philosophy referred to in the *Gita* emerged in a finalised from in this nge, though the ideas belonged to more mncient times. Buddhism, for instance, presupposes, some aspects of Samkhya and Yoga philosophical thought. Be it as it may, we can safely assume that bahind the *rise* of Vaishnavism was its anceesafil contest with the other views of life.

#### THE SIX SYSTEMS

1

We will now make an affort to take a hrief survey of all soch viaws, the most important heing the six systams. The six systams mark the epitome of ell ancient Indian thought. The Vedas contain the seeds and the Upanishads represent the of the striving of the ancient Indian philosopher in search of Truth. The six systame mirror the calimination of his efforts. The systems not only presupposa and draw considerably upon these stores of viaws and either develop them, me in tha case of tha Vedantn or openly turning hostile contradict them and build up their own theories like tha Sankhya.

Methodology: The one churacteristic feature which is uniformly applicable to all the system is their close examination of the possible aonrees of knowledge ur methodology of argumantation (*Pramana*). Generally speaking the *Pramanas* ara three: (1) *Pratyashia* or method of perception (2) *Anumana* or inference (the classical example of which is 'wheraver there is smoke there is first) and (3) *Shabda* or verbal testimony. A little explaination is necessary with respect to the last. Shabda or verbal testimony does not metar the phonetic ranction in the psycho-philological aense hut in the peculiary Indian context it neces sarily means revelation .. In other words it means all such literature as is called Shruti in contradistinction to Smiriti. The Vedas, Vedic literature and the Upanishadas consitute Shruti literature. Hence Shabda has been very aptly rendered as systematised tradition which, is tentamount to intuition. But Shruti or revelation is act accepted unconditionally for three important factors regalate its nse. Firstly, the truths revealed hy Shruti should not be extra-empirical, i.e., otherwise nuattained aad unattainable. They must tell us of the nuknown through the known. Secondly, what is revealed should not he contradicted by any other Pramanas or the coatent of revelation must he internally coherent and must not he against reason. Thirdly, the revealed. truth must appear prohable. Not all the systems, however, accept all the three Pramanas, aomé like Samkhya totally disregard revelation as a sonrce of knowledge while Vedaata specially emphasized on its use.

Six Systems: The orthordox systems are six in aamher namely (1) Nyaya of Gantama, (2) Vaisheshika of Kanada, (3) Samkhya of Kapila. (4) Xoga of Patanjali, (5) Purvamimasa of Jaimini, and (6) Uttaramimamsa or Vedanta of Badaryana. As opposed to these the system of Charvaka, Yogachara and Madhyamika and Jaiaism are collectively called the six heterodox (*mastika*) systemelike Samakhya and Yoga, Nyaya and Vaisheehika, Purvamimsusa and Uttaramimams have much in common with each other and hence they are generally paired and treated as one forming a composite whole.

Nyaya: Nyaya is more or less understood to be a system of logic for the Nyaya system treats logic in such an exhansive manner that its method has ever accepted by the other systems. Its founder is known as Gantama who was nicknamed as Akshapada or eye-footed, i.e., with eyes directed un the feet. The Nyayasutras are ascribed to 150 B. G.

Method: The Nyaya system, though generally described as a method of Ingie is not limited to it and claims to be a complete philosophical system. In this it is ouly a development of the Vaisheshika system from which it has borrowed its doctrine of atoms, of the origin of the nniverse and its psychological principles. The Nyaya theory maintsins that souls are infinite and eternal, possess definite qualities and only hy means of the material organ of thought which they possese are capable of experience and knowledge.

The Nyaya system, however, pays more attention to formal logic than to philosophy. It holds that the sources of knowledge are four; (1) Perception (2) inference (3) analogy and (4) cridible testimoney. Inference again. is subdivided into three classes : (1) inference from cause to effect (e.g., the presence of clouds indicates storm), (2) from effect to canse (e.g., the swelling of rivers shows rain in highlands) and (3) conclusion as to something beyond the reach of the senses only to he known in the .abstract, when, for instance, the individual senses are made the foundation on which to have a general conception of the instrument of perception. The Nyaya syllogism consists of five parts: (1) Proposition (2) Caose (8) Exemplification (4) Recapitulation nf the cause and .(5) Conclusion. The hest illustration of this is the pro- . position 'where there is smoke there is fire'

- (1) There is fire on the mnnntein,
- (2) For the monntain emokes.

## EXPRESSION OF THE GOLDEN AGE

- (3) Wherever there is smoke there is, fire, o.g., on the hearth in the kitchen.
- (4) The monntain smokes,
- (5) Therefore there is fire on the monntain.

Vaisheshika: The founder of the Vaisheshika system was known as Kanada (atom-eater) who is supposed to have composed his sutras between 200 and 400 A. D. He proposes to teach the true discernment of all that may he known and for that purpose classifies the multifarious things of experience into dravyas arsubstances which are nine in number. They are: (1) Earth (2) Water (3) Fire (4) Air (5) other (6) time (7) epace (8) Soul and (9) organ of thought. These dravyas together with their properties constitute the universe. That dravyas are not all material and hy themselves do not explain the aniverse for they form only the framework They have various properties and onter into various relatione. The system again postulates the following six estegories (1) substance (dravya) (2) quality (3) movement or action (4) association (5) difference and (6) inherence. But the most important part of Kanada's theory ie his doctrine of atoms which he seems to have harrowed from Buddhistic thaught. The ntams of earth, water, fire and sir, he says, are eternal and uncreated and althongh they themselves have no extension, their heterogencons nature is the cause of the extension and visibility of the combinations of atoms. In its view of the universe the system envisages periods of evolution and dissolation when the atoms are grouped and regrouped. Belief in God and permanent snul are a praminent part of the Nyaya Vaisheshika system.

Sankhya: "The brigin of the Samkhya philosophy", says Garbe, "must be sought in a reaction against the idealistic monism of the Upanishadas and its rise may he attributed to the same district of India as produced Buddhism." Kapila, the founder of the system was a clear and hold thinker who, in opposition to the Upanishadic trend, sought to maintain not unity but variety behind phonomena. He rejected Brahman and along with it the existence of God. His is a thoroughly rationalistic system and the name indicates its unalvtical method. The aim of the system, in common with the others, is a complete liberation from the sufferings of earthly existence. In order to explain the universe Kapila poetulates the existence of two uncreated and everlasting entities called Prakriti and Purisha which differ essentially from each other. Prakriti-matter is real while Purusha-sonl signifies not one but an infinite multitude of individual souls. Prakriti is the primitive matter from which the universe is evolved in regular course. Purusha-soul is in itself inert but its very presence is responsible to set primitive matter on its way of evolution. Soul is eternally changeable while matter is eternally subject to change. But both have no heginning and no end. Sonl is without attributes or qualities, without parts and therefore imperishable, motionless, absolutely inactive and impassive, unaffected by pleasure or pain or any other emotion and completely indifferent to all sensations. Further Pratriti has three essential characteristics (gunas ) called Satva (lightness, illnmination and joy ] Rajas (movement, excitation, pain ) and Tamas ( heaviness, obstruction and sloth ). These three gunas form the substratum of change which is perpetual, but this change is not total and the gunas persist.

In their theory of the universe the Samkhyas pos-"" , two periods of motion (1) towards evolution 1

and (2) towards dissolution. These movements are cyclical with alternating periods of evolution and dissolution. The Samkhyns hold that matter is indestractible and sonl is perpetual and production is only manifestation of what is already in a latent form. When the equilibrium of the three gunas is disturbed the evolution of primitive matter begins. "Uncon-" scious primitive matter" as nn effect of the presence of Soul,""then issues from its stable equilibrium and becomes the subject of evolution and matter during the period of the existence of the universe continually brings forth new products. For this process it becomes necessary to assign some cause. The developments and combinations of inert matter which take place nnceasingly would be nnexplicable if they were not affected by a spiritual principle. This principle . is the collective infinence of the innumerable indivi- . dnal sonls which-themselves incapable of any activity-contemplate, as spectators from all eternity, the movements of matter. It is not by conscions will that the souls ' exert an infinence on matter, but by their mere presence, which in n purely mechanical way excites matter to activity and development, just ns the magnet nots on the iron." Hence it will be readily seen that the position, of the soul in the, Samkhya system is not entirely superfluous for, it also brings into conscionsness all such physical forces as would othewise remain purely mechanical and naconscious. The Samkhyns, further believe that every living heing possesses whithin the gross material body, which suffers dissolution after death, nn inner or subtle hody which is formed essentially, out of physical organs and the senses. This subtle body

accompanies the sonl in the cycle of existence from. one gross body to snother."

"It is not only the basis of metampsychosis and the principle of personal identity in the vericors existences, hat also the vehicle of personality in this life for in this solute body all psychiced events have their home and origin. The soul, thus brings into consciousness the psin-of the body. This pain is determined by want of discrimination which is the result of the fatal inheritance from the past."

Evolution, according to the Samkhys system proceeds in a particular order in which the nppercace of the 24 brinciples' of *Prakriti-Mahat-Ahamkara*. *Manas-Sensory organs--Motor organs--Tammatra-Bhutas* takes a prominent part. The aim of the system is deliverance which is to be achieved through the proper discriminating knowledge of differentation befween sonls and matter.

Yoga: Very closely silied to the Samkhya is the philosophy of yoga whose founder was Patanjali and who is identified by some scholers with Patanjeli the Grammarian who lived in 2nd century B.C.. His Yoga Suras ere ascribed to 450 A. D. by Hermann Jacobi.

The yoga system is generally treated as a branch of the Samkbun for it accepts almost all the dostrines of the latter on cosmology, psychology and physiology. Its dostrine of emaucipation is almost the same but it rejects the atheistic spirit of Samkhya and introduces God in the system. This God however, appears to be clearly an atterthought for the idea is only loosely inserted and the action seems due only to please the

\$

## EXPRESSION OF THE GOLDEN AGE 161

more orthodox and help spread the system. It also differs in the treatment of the doctrine of absorption as the most effectiva means for the attainment of the knowledge that seemes emansipation.

The God of the Yoga neither oreates the universe, nor rewards or puniahea and appears only as a particular goal. The divine goal (i. e. God) stands in an eternal and indissoluble relation with the noblest and most refined constituent of matter—Satiss and is free from eataaglement with the world. The trus emphasis of Yoga, however, is on coacentration of thought, a centralisation of all the activities of the objecta of sease and of thought on Aiman. For this it lays down' the life of asseties and practice of diverse postness and methods of the control of the physical organs.

Purva Mimamsa: The Purva Mimamsa which also is known as Karma Mimamaa holds that the Vedas are eternal and nacreated and their rsvelations concera only things existing from eternity and are eelfevideat. Like the Samkhya this system has no place for God. The Vedas in the ayetem, do not mean the poetic compilations of the Rigvedic aryane hat the ritualistic and liturgical literatare of later days. The system is developed in the Nimasadarshana of Jaimini and the compilation is ascribed by Jacobi to 2C0 to 450 A. D.

The aim of the system is to give a correct interpretation of the vedic 'texts dealing with Brahmauical ritual. Incidentally it also aims to colve all the donkts in the mind of the follower regarding the correct procedure and ecquence to he adopted in the performace of the ritanl. It also discnesse the rewards which

~

accrae to one who correctly performs the ceremonies. It classifies the contents of the Vedas and in trying to examine all donbts regarding the efficacy of such performances tollows a highly developed and logical method consisting of five parts (1) The proposition. (2) the donbts as to its correction (3) the erroneons method of treating the question (4) refutation of the erroneons method by the trac argument and (5) the result of the investigation.

The Uttara Mimamsa or the Vedanta: The last of the six orthodox systems is the Uttara Mimamsa or Vedanta and which incidently is the most important for its effect on the trand of Indian philosophy and religion. Like the Parva Mimamsa it implicitly ancepts the anthority of revealed literature and further develops and clarifles some of the nohlest conceptione of the Ufarishedas.

While discussing Upanishadic Philosophy we saw how the Upanishadic philosophers almost stambled apon the epoch-making conception of Atman-Brahman. The fundamental idea of the Vedanta is the same and is tersely and heantifully expressed by Tatavam asi; ahan brahma asmi, that thon art ; I am Brahman. But the acceptance of the identity of sonl with the eternal priaciple of creation involves us into many difficulties. If the identical principle we might ssk, is both, then how can we explain the diversity in the world ? This difficulty is explained by the conception of Maya or ignorance which so effectively conceals the unity in diversity. Enveloped in ignorance the Atman is nuable to distinguish between itself the and ubadhis or limiting conditions like body or physical organs. The Maya or illusion involves as in a round of rebirth and is responsible for the misery of existence.

EXPRESSION OF THE GOLDEN AGE

It ignorance of Maya is the agency throng which misery makes itself operative and manifest, the opposite of ignorance which is Vidya or knowledge should lead, us to emancipation. Knowledge, indeed, enables the Annan to distinguish itself from the upadhis or limiting factors. But knowledge of what ? Evidently knowledge of both the real nature of Annan and Brainnan. The supreme aim of human heings is emsnoipation, which is another name for the cessation of the soul's transmigration. This is bronght mhont by the recognition of the individual self as identical with the Higher Self.

Brahman, the Vedantin tells ns, is of two kinds, the lower and the higher and consequently knowledge is also of two types, knowledge of the lower Brahman and that of the higher. The higher Brahman is attributeless. formless, devoid of distinctions and unconditioned. It is not gross and not subtle, not short and not long and is imperishable and the only thing that can be predicted of it is that it is not non-existent. It is pure Intelligence and Bliss. When attributes are imposed upon it, it becomes the lower Brahman and is made so only for the sake of worship. The lower Brahman is conceived of in three different ways (1) Pantheistically as the world sonl which is all effecting, the vital principle from which all creatures spring and in which all created things are reabsorbed. (2) Psychologically as the principle of the individual soul which abides in the citadel of the body and the lofus of the heart and (3)Theistically as the personal God-Ishvara who guides the lives and activities of all created things.

Knowledge, conclades the Vedantin, is the path of salvation. But knowledge is difficult to be achieved and only the exceptionally gifted can know of the

higher Brahman and thus seek their speedy salvation. Bot for the common moo it is not to be; for him is the lower Brahman, worshipping whom he cao gradually find his delivernnee. For him there is the path of works. It is true that they caooot create knowledge but they oid is destroying the barricades is the way of its sequisition.

Shankara: The hest ood most remarkable exponent of the Vedanta philosophy was the great Shankaracharya. He seems to hove lived io the 5th centary A. D., He earried on o dialectical cootroversy throng the whole of India in vindication of the doctrines of Vedanta and the most famous event in this campaign was the defeat of Mandan Mishra. Shankaracharya established four Mathas at Shringeri, Dwarka, Badrikashram and Pari. A Sanayasin with the title of Shankaracharya is io charge of every Matha-These Mathas are influeotial centres of Hindnism. Shankara's maio works are his commentary on the Bhagwadsita, the commentary on the ten principal Upanishadas. Brainmasutra aod Shankara Bhashya.

Vedantiam had, besides Shankara, who preached Kevaladvaita or pure monism, other brilliant exponents like Ramannja, (Vishishtadvoita), Madhava (Dvaita), Vallabha, (Shnddhadvalia) ood Nimhoratra (Dvaitadvaita).

Charvaka: Of the heterodox systems, the materialist philosophy of Charvaka is the most interesting hoth by its own exposition of o thorough-going materialism and os an indication of the range of oncient Indian thought. The materials for the stody of this system are very

164 .

<sup>#</sup> Histosching could be summarized in "Broken estyam Jagan mithya, Jeo huana manarah." Brahma or the Supreme Spirit of rest World is nursalidat beit is only the Supreme Seif and no other.

After having considered in some detail the philosophical implications either preenpposed or implied in the religions thought of the age lat us now turn towards the more concrets expressione of this goldan age of India.

The most remarkable manifestation of the golden age .. in literature is seen in the works of Kalidasa, the greatest of all Indian poets. Lika his other litarary compatriots Kalidasa has left ne practically no information about himself and hance a mass of legends and fantastic tales. have gathered round his name. One such traditional story tells us that the post was a Brahmans's child. He was left an orphan when he was a child of six months and was brought up by a shepherd. He was a handsome . ahild full of sprightlinese and charm. The daughter of the king of Banaree was one of the most learned persons of the day and was proud of her learning. The king resolved to marry her only to a man of equal culture and vowed that her hand could be won only by one who could defeat ber in a learned disputation. Many poets and scholars tried to win her bat were defeated., Consequce-'ntly they decided to wrank their vengeance on ber by marrying her to a stapid man. And Kalidasa, we are told, was such a stapid one. The disgrantled poets pretended that, he was their gurn and in n sham discussion the princess was defeated and subsequently married to Kalldasa. Bat trath came out at last nod baing apbraided by her Kalidasa prayad to the goddess Kali for divine grace which was daly granted and he thas became a poet. This is what tradition has to any about his life. But ... from his works we get some small though more definite indications. His worke raveal him as a finely cultured and highly talented and learned man. A graat traveller, he was gifted with aingularly kaen powers of searching

#### 

observation and a sympothetic understanding of the human mind. His knowledge of the sacred lore is extensive and his ocquaintance with the ensions and monnere of the people intimate.

Though the date of Kalidasa is still a matter of controversy everything points to his flourishing in the time of Gnpta glory. The alinsion to the horse sacrifica in the *Malavikagnimitra* is almost inevitolly to be explaiued as a reminiscence of the performance of that rite by Samudragapta to the glory of his regime. The Vikramadityo, therefore with whom Kalidasa is associated in tradition seems most naturally to be taken os Chandrogupta II whose reign may be placed hetween 376-77 and 415-16 A. D. The picture of the times as drawn by Kolidaso preanposes the existence of economic prosperity and sociol security which can mainly he ossociated with a strong imperial power like thot of the Gaptas.

The works of Kalidasa nre seven in number and can he listed in a prohoble order of composition in the following order (1) Ritusamhara, (2) Meghaduta, (3) Kumarasambhava and (4) Raghuvamsha comprise his postical works while his dramoe are (1) Malavikaguimitra (2) Vikramoreashiya and (3) Shakuntala.

In the poeun Rithusamhara "each of the seasons in reviewed in detail, in the six cantos with 153 stanzas which make up the work. The ealient characteristics in nature which mark each are described in loving and graceful detail and the ceneon's meaning for lovers is explained. The glow of the summar Sun is painful even to lovers, bat they find consolation in the nights when the heart of the moon is filled with jealonsy as it gazes on the lovellass of the maidens, hut this is the very time when the wanderer is burned by the

#### STORY OF ANCIENT INDIA

fire of separation from his beloved. In the rains, love is suggested by the wild streams which eagerly embrace the tottering trees on their banks as they rush madly to the ocean and hy the clouds filled with rain which bend down to kiss the rocks of the manntain neaks. The creepers of autamn are the fair arms of maideas whose white teeth, seea through their red lips, are like the jasmine Gevealed through the orimson Ashoka flowers. In winter the fate of the Priyangu creeper, huffeted by the breeze, is that of the maidea severed from her lover; for whose lover is heade her this is the season of seasons. In the cool season which preindes spring, the fire and the mild rays of the reviving san are pleasant to lovers, who find the moon-beams cold and the light of the star pale. Spring brings the blossoms of the mango, which are the nrrows to he shot from the how of the god of love to pierce the hearts of maidens." The poem is distinguisbed by a profonad eympathy with the life of natare and an admirable love of describing in pregnant brevity the aspects of Indian scenery and life.

The Meghadula, the best known work of Kalidasa, describes in measared and touching tones the pauges of separation smitted by a Yakaha who is exiled by Kahera – for a year, for neglect of daty. This year of exile be spends at Ramagiri in Central India. In the rainy season be sees a cload on its northward way and this gives hum an idea of sending a message with it to his heloved in Alaka on Monut Kallasa. The Yakaha describes to the cload the way be should for follow and in incorpressibly beantifal lines the course to Alaka is nafolded. The descriptions of Ujioyini and the Himalayas are incomparable in their beauty, snggestiveness and delicacy of iceling.

The subject of Kumarasamöhara is indeed a daring one for it describes the events which bring about the mariage of the highest Gud Shiva to Uma and the bith of Skanda, the war god who destroys the demon Taraka. The poem contains sume hrilliant descriptions of the majestic beanty of the Himalayas and the brilliant and tonehingly pathetic picture of the lament of Rati for her husband Kama reduced to ashes by Shiva's dreadful glance.

The Raghuvamsha-the finest Indian specimen of the Mahakavya narrates the history of the dynasty of the kings of the solar race. This wide theme gives the poet full scope to exercise his power of description; war and the coronation of a king, the choosing of her mate hy a young princess at a Scayamvara, the marriage rite, the loss of a darling wife and the grief of a bereared husband, town and country, the seasons, the incidents of a great digwigaya the triumphal progress of a king who seeks to conquer the earth, all form -Occasions for the poetic-skill.

"The Kavya style", says Keith, "unquestionably attains in Kalidasa its highest pitch, for in him the seatiment preduminates over the ornaments which serve to eubance it, instead of overwhelming it. Seatiment with him is the soul of poetry, and fond as he is of the beanty due to the use af figures, he retrains from sacrificing his main purpose in the search for effect." The poetry of Kalidasa is the highest expression of the tonal and suggestive capabilities of the Sanskrit language and the depth and intensity of Indian sentiment.

Shngn and Malavika the Vidsrhin princess. The Vikramovashiya treats the old legend of the love of Pururavus for the celestial nymph Urvashi noted for her beauty and attractive churms. Furnavas resenes Urvashi from n demon and the encounter involves, them in a stronge and passionale love. The drama Shakuntala, rightly described as the masterpiece of the art of drama, narrates the story of King Dushyanta meeting Shakuntala at her adopted father's hermitage. his marriage with her and later on forgetfatness about her. The play is remarkable for its sentiments of pathos, love and devotion.

While Kalidas represents the zenith of the glory of classical Sankrit literature, Bharavi, who lived to wards the end of the golden ago shows its period of decaying conventionalism. The subject of his Kiratarjunizam is taken from the vanaparva of the Mahibharata which tells as how Arjuna secared weapons from Shira in the gnise of a Kirat. The poet has taken a simple tale from the epic and embellished it with epic happenings. Bnit would be unjast to deay both poetical fancy and forceful diction to Bharavi the secationet of heroism is admirably expressed and the descriptions of eccangr me often pinful.

As in the field of literature the golden age also may nifested itself in remarkable advances in mathematics, natoronomy, medicine, chemistry, and metallungy. Muthematicians like Varahumibira and Arynchests (who gave the most meanrate value for TT) and doctors like Varahumibira, lived, worked and bronght forth glorions results of their efforts in this age.

But it is in the domain of urt that the full maturity of Indian tradition is seen. The age, hy its

۰.

the earth and to the past. The east as well as the west now begin partly in acquire and partly to consolidate features that were destined in the fature to turn to a considerable extent iatu local i.e., ethnical characteristics. The Dekkan, however, makes the body of the rock, the oradle of pertentous qualities."

A description of some of the outstanding works of the period, however, will bring out the main characteristics outlined above- Let us take for instance a life size composities frem Pathari in the Bhopal Ageacy depicting the nativity of Krishna. Devaki is shown reclining nn a cench with the divine baby lying at ber side and is watched by five attendants. The scalptare, it must he remembered, has a dauble significance. Ope is the religions aspect, for Krishon wership had by now came much into yegas, and the ather artistic ar idealistic. The ferm in which the mother lies relieved and the · horn huds, the looks of satisfaction and anticipation on the part of the attendants, all these details combine to impart to the work a sense of spirital apgestica and reveal the supreme self-confidence, the imaginative grasp and the visionary sweep of the artist. The beauty and artistic grace of the composition appear to be the more remarkable when we consider the dimensional aspect.

Now we shall take the Buddha image from Mathura Museum. The Buddha is shown standing and the skill with which the hedy is show through the transperent garments is characteristic of the hest Gupta sculptare. All Hellenistic influence is purged and the resultant effect is charming.

> Probably associated with the same age are the world paintiags in the caves at Ajanta in Hydera-

# EXPRESSION OF THE GOLDEN AGE

had State. The snhjecta af the pictures are almost exclusively Baddhist. They include numerous figures of the Buddha relating to variona incidents in his life and also scence from the Jalaka collection. The artists who painted these figures were no novice but were nurtured in the best traditions of ladian art. To them it was a meditation and a symbolizatian af their innermost spiritnal urge. They were of the earth no donht, and though their ideas are represented by earthly scenes the effect is aever earthy. They have the merit of transcending the · Obvious limitations of space and time and feeling into the spaceless and the timeless. They also reveal a close familiarity with objects of nature and the world. 'The animal printinge bear eloqueat testimony to their powers of observation. As an example we would refer to the picture of the fighting hulls. A painting which reveals the suggestive power of the artist's brush at its best is that of the "Dylog Princees " so eloquently described hy Mr. Griffith. A lady of rank sits on couch leaving her left arm on the pillow and as atteadeat hehind holds ber np. A girl in the background places her hand on the breast and looks towards the lady. Another with a sash across her breast weilds the faa, and an ald man in white cap looks in at the doar, while another sits heeide a pillar. In the foreground sit two women and in the \_apartment-are two figures, one with a persian cap has a water vessel and a cap in the manth of it; the other with negro-like hair,waats comethiag from him. To the right, twa female eervants eit in a separate compartment." "For patbos aad sentiment" ease Mr. Griffith. " and the nnmistakablo way af telling its story, this piature, I consider, cannot he surpassed in the history of art. The dying woman, with drooping head, half closed eyes and languid limbs, recliace on n bed the like af which may be found in any

native house of the present day. She is tenderly supported by a female atteadant, whilat another with eager gaze is looking into ber face und bolding the sick woman's arm as if in the act of feeling her pulse. The expression on ber face is one of deep anxiety as she seems to realize how, soon life will be extinct in the one she loves." Here, there is a comprehensive picturization of a number of feelings. Pathos and anxiety and grief and fear and a sense of the impending doom, all are there, transmited into the gold of inexpressible beanty by the touch of the artist's self-confident burnsh.

Many such scenes could be described, still the beauty of Ajanta will not be completely within the grasp of our curions satisfaction for art like this does not aim at satisfaction and pleasure alone bat strives to impaty a sense of heightened awareness to our emotional per coptimilities and a feeling of conscionsness of our in ward like.

For the pictures of Ajaata, as Mr. Griffith so aptly pats it, are accomplished in excention, consistant in convention, viracions and variéd in design, full of such evident delight in beautifal form und coloar. The work-manship is admirable, long subtle, curves are drawn with great precision in n line of unvurying thickness with one sweep of the brush; the touch is offen bold and vigorous, the handling bread, and in some cases the imprints as solid as in the best Pompeian work. The draperies tooare thoroughly understood and though the folds may be somewhat conventionally drawn, they express most thoroughly the popularities of the oriental treatment of masewn cloth.

Such is the art of Ajonta, n veritable embodiment of the spirit of the golden ago of maturity of convention,

### A CHALLENGE FROM THE SOUTH

of synthesis of all that is best, of an unmistakable positivism, and n vastness of compass, hoth physical and ideological.

# XI.

# A CHALLENGE FROM THE SOUTH "

NEVER before in our ancient history a story of a monareb's life has been so anthentically thrown into high relief by a narrative and travel hook written almost during his. own time. So fortnate we nore about the story of Harsha and his life can be sketched in such detail that consequently we know much more about Harsha and his time than any other Indian king of ancient days. The cources for the reconstruction of the story of his times are mainly three (a) his life written by the court poet Bana (b) the travela of Hinen Tsiang and (c) his three inscriptions—the Sonpat Copper Seal, the Banakhern Plate of year 22 of Harsha era (i.e., circa 628 A. D.) autithe Madhahan plato of the year 25 or 631 A. D.

Compared to Harshn with his life fall of glorions deceds, his military conquests, his cultural activities, his predecessors pale into insignificance. The founder of his dynasty, we are told hy Baaa, was one Pasbpabhati, ā worshipper of Shiva and disciple of a Shaiva saint Bhairavacharya from the Dekkaa who received the booa that he would be "the founder of a mighty line of kings". From the Madhuhan plate inscription "we get the tollowing list of succession :--

· Narvardhhaa—Vajrihidevi Rajyavardhana—Apsasadevi Adityavardhana—Mnhasenagnptadevi Prabhakarvardhana—Ynshomati, It is noteworthy that of the four predcessors of Harsha only his father is titled Maharajadhiraja signifyin a high royal atatns. It is clear that Harsha's father Prahhakaravardhan sturted as a petty chief of a "district called Sthaueshynra in the land of Shrikantha" and by his own exertions became a power in the land. In the course of his struggle for supremacy he must have overpowered a number of potentates of adjoinin territories but wn have no definite information of it excepting the somewhat suggestive observation by Bann which runs as follows-"He was a lion to the Huna deer, a burning fever to the king of the Indus hand, a troubler of the alcep of Gnjarat, & bilious plague to that acent-slephant the lord of Gandhara, a min to the lawlessness of the Latas, an axe to the creeper of Maiwa's glory."

These Vardhanas originally came from Sthaneshwara over which they ruled and which was their capital till Harsha abifted the seat of government to Kananj. The kingdom of Sthaneshwara, accarding to the Riven Tsiang was "about 7000 li in circuit, the enpital 20 li or so." "The soil" he further states, "is rich and productive and abounds with grain (cereals)-The climate is genial, though hot. The manners of the people are cold and insincere. The families are rich and given to excessive luxnry. They are much addicted to the use of magical urts anh greatly honour those of distinguished ability in other ways. Most of the people follow after worldy gain, a few give themselves to agricultural pursuits; there is a large accumulation here of rare and valuable merhandise from every quarter". The kingdnm of Sthaneshwnr from this description, though not of gigantic proportions, as fairly prosperous.

Harsha was horn in the year 590-1 A. D.) He had one elder hrother Rajyavardhana (born 587 A.D.) and a yonnger sister Rajyashri (born 594 A. D.). Harsha's maternal nacle, the King of Malva, deputed his son Bhandi to serve as a companion to the young princes. Ata later date two more companions Kumaragupta and Madhavagupt, sons of the king of Eastern Malva, were dispatched to the court of Prabhakaravardhana. We do not know much abont Harsha's childhood days and education hnt Bana tells us that he was trained in Sword caft, riding horses and archery.

In due course Harsha's sister Rarjyashri was married to Prince Grahavarman, the son of the Mankhari King Avaativarman. The event was celebrated with appropriate pomp and Grahavarman set out towards his kingdom with his imperial hrids.

### STORY OF ANCIENT INDIA

in favour of his younger hrother Harsha. Harsha. however, prevailed npon him and Rajyavardhana finally assumed charge of the kingdom. But misfartnue would afford him no respite for a courier came with the sad tidings that the King of Malva had treacherously attacked his brother-in-law Grahavarman, killed him and what was more his sister Rajyashri was cast into a prison at Kanyakubja like a common brigand's wife with iron fetters clinking round her tender feet. Enraged at this ntrocity Rajysvardhana decided to avenge his brother-in-law's death by inflicting a crushing defeat on the King of Malva by advancing against him in wrathful battle. He kept his younger brother Harsha in charge of the administration in the capital and himself rode away accompanied by his minister Bhandi along with a formidable army. The campaign was successful but the end was sad. Rajyavardhana routed the Malva army with ease hat was lured into a conference by Shasanka. the king of Ganda-the king who destroyed the famons Bodhi tree. Rajysvardhann was caught off his guard and murdered hut in the confusion which ensued, his sister Rajhashri was able to make good her escape from the prison "into the Vindhya forest. News of this tragic happening duly reached Harsba who swore vengeance on the treacherons Shashanka. He was heseached by his subjects to become the king and he assumed charge of administration and started ont on his war of attrition. His ministers gosded him on to fields of conquests and Harsha with bis determination steeled, with the double object of resening his sister Rajyashri and avenging his . brother's desth advanced against the Malvas. He punished them severely and set out in search of bis sister. He was directed to the Vindhya forest, to the hermitage,

.

## A CHALLENGE FROM THE SOUTH

of a Buddhist mock Divakaramitra. Divakaramitra told him of having seen a lady of royal mein mounting a funeral pyre with the intention of offering hereoff ac suttee. Harsha reached her in the nick of time and dissuaded her from her resolve. She begged Harsha to permit her to become a nnn bat Harsha succeeded in taking her beck to the capital.

Harsha now, determined to pnt an end to all potential troubles, lanched himeelf into a ronte merch of conquest. With a strong army of 5,000 elephants, 20,000 eavalry and 50,000 infantry he etarted marching eastwords.- This compaigning laeted for ahont six years during the conrise of which Harsha was defeated but only once and that by Fulakeshin II, the Chalnkyn monarch. (But Harsha was not really free from trouble for a long time afterwards.)

This king of the Chalukyas-Pulakeshin II-was the most outstanding personality of the period. The Chalukyas were the bitterest adversaries of the Pallavas of Kanchi and chimed to have originally ruled over Ayodhya for a considerable time before they leapt into prominence hy ahout 550 A. D. Pulakeshin I secured for himself a small principality round Vatapipura (Badami) which eventually became his capital. His sons, who succeeded bim carried on the tradition of conquest and added to their kingdom large slices of territories in the Koakan, Bellary and Knrnool districts at the cost of the Kadambas. The kingdom thus embraced the whole of the Bomhay Presidency with the exception of Sindh, Kathiawar and northern Gajarat.

Pulakeshin I, bad two sons, Kirtivarman the elder and Mangalesha the yonuger. Mangalesha who succeeded Pulakeshin desired to leave the throne to one of his sons but Polakeshin II pressed his claim and thus a civil war of succession ensued in which Mangalesha was defeated and killed. Polakeshin II who succeded him had to face attacks from within and without but his clever generalship enabled him in not only defeating his enemies but considerably enlarging his kingdom also. Hardly had he consolidated his empire than he had to propare and meet n mighty foe in the parson of Harshavardhana.

The causes which led to the Hnrsha-Pulakeshin conflict ara not quite claur. The neceont hy Hinen Tsiang implies that Harsha's ambition for further coaquetss must have naturally led him to 'the war in which he was defeated. Tha year of the event caunot ha placed later than 613 A. D. According to the life Hinen Tsiang "Shiladityarnja, boasting of his skill and invariable saccess of his general filled with confidence marched at 'the head of his troops to contend.with this prince (Pulakeshin) but was unable to pravail or anbjugate him."

But the military greatness of Pulakeshin II was not confined to his repulsion of the invasion hy Harsha. He forced the Latas, the Mulawas und the Gurjaras of Northern India to bow hefore him and the same fate was imposed upon the southern Koshalas and Kalingas-Later on he overian the Vengi country (region hetween the Krishna and the Godavari) shattered the greatness of the Pallavas and almost invested their capital at Kanchi. Marching further beyond the Kaveri he threatend the Cholas who along with the Kerlns and the Pandyas made friends with him. These victories made him the master not only the whola of India-south of the Vindhyas, but also of large territories to the North of that natural frontier. So great was the fame of this monarch that King Khusrn II of Persia exchanged letters and presentswith him.

"The disposition of the people" says Hinen Tsiaag "is honest and simple; they are tall of stature and of a stern vindictive character. To their benefactors they are grateful; to their enemies relentless. If asked to help one in distress, they will forget themselves in their haste to reader assistance. If they are going to seek revenge, they first give their enemy warning ; then each being armed, they attack each other with lances (spears) when one turns to flee, the other pursues him, but they do not kill a man down (a persons who submits). If a general loses - a hattle, they do not inflict punishment, but present him with woman's clothes, and so he is driven to seek death for himself. The country provides for a baad of champions to the number of several huadred. Each time they are about to engage in conflict they intoricate themselves with wine and then one man with lance is oac haad will meet ten thousand and challenge them in fight. If one of these champions meets a man and kills him, the laws of the country do not punish him. Every time they go forth they beat drums before them. Moreover, they inchrinte many hundred heads of eleplants and taking them ont to fight, they themselves first drink their wine, and then rushing forward in mass, they trample everything down, so that no enemy can stand before them. " No wonder, then, that Harsha could not conquer these people. About their king the Chinese traveller further says, " The king, in consequence of his possessing these men and elephants, treats his neighbours with contempt. He is of the Kshatriya caste, and his name is Palakeshi. His plans and undertakings are widespread, and his beneficient action are felt great distance. His subjects obey him anhmission. "

But the glory of Pulakeshin II was as great as it was short lived. Soon after 641 A. D. the Pallavas smitten into shame by him, now muntered sufficient courage and. power and led by their king Narasinhavarman I, defeated and killed him. They plandered his capital Vatapi and thus ended the career of the victorions Pulakeshin II.

After his conquest of the territories between the Krishna and the Godavari, Pulakeshin II, left his younger brother Yuvaraja Vishnuvardhana in charge of administration. He soon declared himself independent and founded the eastern branch of the Chalukyas, But Vikramaditya I, who succeeded his father Pulakeshin II, soon regained strength, crashed the Pallavas and re-established his suzerainty over the Chalnkva empire. He was succeeded by his soon Vikramaditya II, who, with his brother Vijsvaditva I. re-conquered the lost portions and consolidated the empire. Vikramaditya III, who followed next on the throne had to face an invasion by the Arabs who had succeeded in overmaning, Sindh, Northern Gaiarat. Malva and Southern Rajoutann and tried to penetrate into the Deccan. They infiltrated into the Lata Province. bat were defeated and thrown back by the Chalnkya king who thus saved south India from devastation by the Arahs. This was in 712 A. D., but after exactly 41 years (753 A. D.) the Chalakyas had to surrender their hard won and hard maintained supremacy to the power of the Rashtrakutas.

station on the Hotzi Gadag station of the M.S.M. Railway sre situated a group of four caves which could he attrihuted to the period of Mangalesha, the predecessor of Pulakeshin II. The caves generally follow the same nattera in their nlan as in other cave architeotare but the nillars and capitals show some new characteristics. Of the four caves No. III is "hy far the finest of the series and one of the most interesting Brahmanical examples in India. The cave opens on the north and the level of the floor is eight or plas feet above that of the court outside. A narrow platform is hnilt np ontside the whole length of the front. In the east end of the varandah is a large figure of Vishnn seated on the body of the great snake Shesha or Anants, which is thrice coiled round helow him, while its heads-five in this instancs-are spread out over and round, his hig mukuta or crown, as if to protect it." The other representations in the caves are the Varaha, the Narasimha and the Vamana avataras. · In ussessing their artistic value Stella Kramrisch says. "The reliefs of the four caves of Badami, too, are of essential importance. When calling to mind the snavity of Saraath eculpture, grave weight of forces seems gathered in the looming inertin of their full and heavy forces. In Gapta sculptures of the sixth century absorption and hliss of the mind had transmitted to the appearance of face and hody a calm that was unearthly yet tender. In the Dekkan however, that absorption is not of the mind only and there is no bliss." The Dekkan sculptures, according to Kramrisch, are a natural development of the trend of the sixth century tradition which lay in the "perfection of visualising transubstantiated from on the basis of knowledge that during the past centuries had derived its strongth and increased its technical facilities

But the glory of Palnkeshin II was as great es it was short lived. Soan after 641 A. D. the Pallavas smitten into shame hy him, naw mustered safficient courage and power and led by their king Narasinhavarmaa I, defected and killed him. They plandered his capital Vatapi aad thas eaded the career of the victarious Palekeshin II.

After his coagaest of the territories' between the . Krishna and the Gadavari, Pulakeshin II, left his younger brother Yuvaraja Vishauvardhana ja charge af administration. He evon declared himself independant and faunded the eastern branch of the Chalakyas. Bat Vikramaditya I, who sacceeded his father Palakeshia II, soon regained strength, cruched the Pallavas and re-established his sazerainty over the Chalokya empire. He was succeeded by his eoon Vikramaditya II, who, with his brother Vijayaditya I, re-conquered the lost portions and coasolideted the empire. Vikrumaditya III, who followed next on the throne had to face an invasion hy the Arabs who . had sacceeded in overrunning, Sindh, Northern Gajarat, Malva and Southern Rajputann and tried to penetrate into the Deccan. They infiltrated into the Lata Province, but were defected and thrown back by the Chajakya king who thus eaved south India from devastation by the Arabs. This wes in 712 A. D., but after exactly 41 years (753 A. D.) the Chalnkyns had to surrender their hard woa and hard maiataiaed aupremacy to the power of the Rashtrakutas.

. The Chelakya exuberance, however, did not mailfest itself in wars of offence and defence only ibat also adopted some finer channels for expression. The main example of this are the bas reliefs et Badami. Badami or Vatapipura was the capital of the imperiel and western Chalakyas and some three miles awey from the Badami station on the Hotgi Gadag station of the M.S.M. Railway are situated a group of four caves which could he attrihuted to the period of Mangalesha, the predecessor of Pulakeshin II. The caves generally follow the same pattern in their plan as in other cave architecture but the pillars and capitals show some new characteristics. Of the four caves No. 111 is "by far the finest of the series and one of the most interesting Brahmanical examples in India. The cave opens on the north and the level of the floor is eight or nine feet above that of the court ontside. A narrow platform is hnilt up ontside the whole length of the front. In the east end of the verandah is a large figure of Vishan seated on the hody of the great snake Shesha or Anante, which is thrice coiled round helow him, while its heads-five in this instance-are spread ont over and round, his hig mukuta or crown, as if to protect it." The other representations in the caves are the Varaha, the Narasimha and the Vamana avataras. In assessing their artistic value Stella Kramrisoh savs. "The reliefs of the four caves of Badami, too, are of essential importance. When calling to mind the snavity of Sarnath scalpture, grave weight of forces seems gathered in the looming inertia of their full and heavy forces. In Gapta sculptures of the sixth century absorption and hliss of the mind had transmitted to the appearance of face and hody a calm that was unearthly yet tender. In the Dekkan however, that absorption is not of the mind only and there is no bliss." The Dekkan sculptures, according to Kramrisch, are a antaral development of the trend of the sixth century tradition which lay in the "perfection of visnalising transnhstantiated from on the basis of knowledge that during the past centuriee had derived its strength and increased its technical facilities by its inherent kinship with and interpretation of nature."

A little later in time bat closely allied to the scalptures of Badami are those at Ellora. Superficially they give an appearance of naturalism but the Ellora "figures are but creations of a widespread energy that accumulates. and in its turn tends towards its own dissemination. Contraction or swelling of the modelled parts, therefore, are physiognomically expressive of forces that transcend the limits of the physique."- Now sculpture reveals "great dramatic force, and freer movement than in the Gupta period." The tendency is towards increasing elegance and] slenderness of form. The most renowned example of this is the Kailas temple. "This great Shaiva temple is not an interior excavation, like the earlier cave temples, but a model of structural temple, and from the living rocks and staading free from it though sunk, as it were, in the sloping side of the hill from which it has . been excavated." The main temple is Shaivite and a relief represents Shiva and Parvati on mount Kailasn.

Other remarkable examples of Shaivite temples are situated at Elephanta near Bombay. Thei colossal Trimmrti, the reliefs representing the marriage of Shiva and Parvati, the daneing Shiva and Shiva in medilation are snperb examples of n natural art-tradition with centaries of development behind it. When one considers the proportional aspects in relation to the tremendous expressiveness of the countenances one cannot but observe and feel that the hand of a master mrtist is behind them. And he was not only an artist but a man of deep religious emotions with a forceful

ive grasp.

But now to return to Harsha. According to the information given hy Bana the Kingdom of Harsha's father Prabhakaravardhan was constituted of the territories of Gandhara, the Indus land, the country of the Hanas Maiwa, Garjarai and the land of ths Latas, lut it is not clear whether these regions ware under his direct administration. The conquests of Harsha added valuable parts to the empire which now included the whole of the hasin of the Ganges including Nepal, practically the whole region between the Himalayas and the Narmada.

Administration : The king was the ultimats rspository of all powsr, executive, as well as legislative. He was, howsver, assisted by a connoil of ministers (Mantriparishad). Ws ars furnished with the names of some of Harsha's high ministers. We are told, for instance, that his prime minister was Avanti. Simhanada was his commander-in-chief, Kuntala was the ohief officer of his cavalry and Skandagopta' commanded his elsphant force. There were different kinds and grades of officers like mahasamanta. Maharaja, Pramataras (spiritual councellors) Rajasthaniyas, Kumaramatyas, Uparikas and Vishayapatis. The schems of administration was practically the same as that followed during the Gupta epoch. The salaries were not paid in cash but were given in the form of lands to high officials. The military personnel however, were, as a rale, paid in cash.

The administration of the period, necording to Huien Tsiang, "was founded on benign principles." The executive was simple. The families were not entered on registers, and the people were not subjected to forced labour. The private demenses of the crown were divided into four principal, parts; the first was for carrying on

#### STORY OF ANCIENT INDIA

the affairs of the state and providing sacrifical offerings : the second for providing subsidies for the ministers and chief officers of the state : the third was for rewarding men of distinguished ability and the fourth for charity to religious hodies, whereby the field of merit was cultivated. Thus the taxes on the people were light and the personal service required of them modernte. Each one kept his own worldly goods in peace, and all tilled the ground for their subsistence. Those who caltizated the royal estates paid a sixth part of the produce as tribute. The merchants engaged in commerce came and went carrying ont their transactions. The river passages and the road barriers were open ou payment of a small toll. When the public works required it taboar was extracted but paid for and the payment was in strict proportion to the work done.

The military gnarded the frontiers and went out to chastise the rehels. They mounted gaard at night round the palace. The soldiers were levied necording to the regultrements of the service. They were promised certain payments and were publicly enrolled. The chief soldiers of the country were selected from the heavest of the people and as the sons followed the professions of their fathers, they soon acquired a knowledge of the art of war. They dwelt in garrisons around the palace (during peace). and while on an expedition they marched in the front as . an advance gnard. There were four divisions of the proy: viz. (1) infuntry, (2) cavatry (3) the obariots, and (4) the elephaats. The elephants were covered with strong armour and their tasks were provided with sharp snears. A leader in a car gave the command whilst two attendants ton the right and left drove his chariot, drawn by four . horses abreast. The general of the soldiers remained in

his choriot. He was surrounded by a file of guarde who kept close to to his chariot wheels.

The covolry spread themselves in the front to resist an ottack, and in case of defence they corried orders bither sod thither. The infantry by their quick movements contributed to their defence. They enried a long spear, and a greot shield, sometimes they beld a sword or sobre aod odvonced to the front.

The life at the const and of the npper closses of society was not rigouronsly purltonical ond occasional periods of festivity and, merry-making belped to lend gorgeone colour to the life of the people. The casts system though fully operative by now did not prevent people from mixing freely together whenever occasion demanded it. The statue of women was high and dignified and women of higher classes did not live in seclusion and even went in for higher education.

The main pursuit of the general masses of people wos ogriculture. Rice was the main item of cultivation but gioger, mustard, melons, pumpkins and other edible items also formed an importont part of cultivation. The most nanal food consisted of rice, wheat, unlk, butter, cream, soft sugar, sugar-candy, oil of the mustard-seed and all sorts of cakes mode of corn. Fish, mutton, gazalle, and deer were eaten generally fresh bat were sometimes solted. Wines of gropes ond sogor cane and other fermented drinks were also liberally imbibed on "bestive occassions."

Though land revenue formed the bulk of nationalincome, industrial life was not in a backword conditionlodestry was organised on the basis of castes and had corporations or guilds of their own. The Brahmanas

#### STORY OF ANCIENT INDIA

generally occupied themselves with the spiritual life of the people while the Kshatriyas formed the backhone of the army and the administration. The Vaishyas monopolised inland and foreign trade and Shudras were the agriculturists. The layout of the towns suggested careful town-planning and administration.

The proviacial towns and villages were surrounded by wide and high walls. The streets and lanes were tortnons and the roads winding. The stalls were arranged on both sides of the road with appropriate signs. Butchers, fishermen, dancers, executioners; and scavaagers and so on had their shodes oatside the city.

The hab of, nrban activity was the market where commodities, hoth indegeaons and foreiga were sold and boaght. The media of financial transactions were, coina hoth of gold and silver as well as cowries and small pearls. Sea voyngea were very common and shipa sailed for Ceylon and as far as China. As a consequence of maritime comercial activity numeroas enlaral coatacts were established with diatant Samatra, Javn and Malaya.

Crimes of a violent nature were not common but life had become more risky than in the Gapta age. Hinen Tsiang was several times stopped and robbed while his predecessor Fa Hian had no such anpleasant experiencea. Imprisonment was the usual penalty and multilion of the nose, ears, hands or feet was not rare. Offences of a minor nature were punished with fines which ranged according to the gravity of the offence.

fashioned oloth (but there is evidence that in some cases it was so); they mostly affected fresh white garments and esteemed little those of mixed calanr ar ornamented. The men would wound their garments rannd their middle, then gather them under their armpits, and let them fall down across the hody hanging the right. The robes of the women wanld reach dawn the tright. The robes of the women wanld reach dawn the the grannd and covered their shoulders completely. They wore a little knot of hair on their crawns, and let the rest af their hair fall laose. Some af the men ent off their monstaches, and had other odd customs. On their heads the people wore caps with flower wreathes and jewelled necklaoes. Their garments were mads of silk and cotton, hemp and wool.

Like his Manryan predecessor Asboka, the name of Harshayardhana is more revered for his religions incliuation than political conquests. Futting asids his word after years of active warfare Harsha showed marked leaninge tawards the pacifist teaching of the Buddha. Thereafter he ceaselessly worked for the furthernoce and expansion of his cherished faith and is consequence boilt many rest houses and stupas. Though a devout Buddhist, Harsha was not a fauntie and vaturies af differeat sects and beliefs were entertained and served with almost equal liverslity and conrtesy. He built stupas as also temples dedicated ta Shiva and the Sna. But the most prominent feature of the religions and intellectual . life of the age was the five yearly assembly.

Hiven Tsiang has left us a detailed description of a religious assembly and the happenings which took place there. A huge pandal accommodsting thousands of / people was built and Malayana and Minayana Inddife' monks. Brahmanas and Jains alike were invited to take part in religions debates. Hinon Tsiang threw a challenge that his theory be proved incorrect in the assembly but was nut replied. A plot to set fire to the pandal and possibly an attempt on the life of the King resulted in some Brahmanas being banished to the frontiers of India.

Harsha also instituted five yearly assemblies for distributing charity. Invitations were sent and thronghout the empire and the large concentres gold, silver, pearls and other valuable gifts were given away.

Harsha's administration was that of an enlightened monarch. Being a self-made emperor bis dignity sud prestige exercised such influence that he was not much bothered by political troubles in his later years. He was a widely travelled king and knew almost all the perts of his empire intimately. This had a very desirable effect on his officers in keeping them alert and efficient and subsequently the tenor of administration was very high. His day was divided into three parts, one of which was entirely devoted to the affairs of the Government and the remaining two to religious and intellectual pursuits. -During his long and etahle reign lasting upto 648 A. D. he lived as a cultured, energetic and enlightened emperor and left such marks in matters of religiona and literary patronage as to evake memories of the great Ashoka and Samudra Gupta. •

A CHALLENGE FROM THE SOUTH

· 191

skilled calligraphist as his signaturs in this last line of the Bansekhsra Plate inscription testifies. He had extended his patronage to distinguished authors like Bana the anthor of his life (*Harshacharita*) and the famous Kadambari.

Bana, the anthor of the Life of Harsha and Kadambari was the son of Chitrahhanu and Rajyadevi. His mother died young and his father who brought him up . died when Bana was fourteen. After his father's death Bana mixed freely with all manner of people and wandered from place to place In the and ha received a royal summons through Krishna, brother of Harsha, 'It was while at the latter's court that he wrote the famous life. In the eight chapters of his hook he narrates the story of the life of Harsha begianing with his own life of his vonthful days of dissination and ends the parrative with the rescue of Rsjyashri by Harsha. Historically the work is of minial value, though in our pancity of actual records it is something even to have this. But his supplementation in the form of vivid pictures of the army. of the life of the court, of the secretaries and their re-1stions with the Buddhists, the history of the period. is of unestimable value for the internal history during Harsha's days.

The *Radambari* opens with the story of the mighty - king Shudraka reigning at Vidishn on the Vetravati. He once saw a chandada girl of matchless beauty who had come to present him with a parrot. To the astonisizment of the king the parrot told him a strange tale of how his father was killed by a hunter in the forest and how he himself was reaced by Hmita, the son of the story of the This Jabali told the other sages of the story of the Krishna. The poem is written in an epic strain and displays considerable powers of richness of imaginntion, some striking verhal effects and good sense and simplicity.

Of a different celibre and inclination was Bhartribari, the reputed anthor of the three Shatakas (poems containing 100 versee) called the Shringarashataka. The Vairagyashalaka and the Nilishalaka. It Tsing who followed Hinen Tsiang in 671 to 695 A. D. tells ns of a Bhartrihari, who was a grammarian and anthor of the Vakyapadiya. This Bhartribari, according to It Tsiang, was very famons throughout the five parts of India, and his excellences were known everywhere. He helieved deeply in the three jewels ,and diligently meditated on the "twofold nothingness". Having desired to embrace the excellent law he became a homeless priest, but overcome by worldly dssires he returned again to the laity. In the same manner he became seven times - n priest and seven times. -returned to the laity. It is highly probable that the traditional etory recorded by It Tsing refers to the poet. From his Shatakas, however, it does not seem that he was a Buddhist but it is possible that he became one in old age.

Of his three compositions, the Shringarashataka ataazas describe the charms of women, their strength in love and the effect of their association, both happy as well as sad. The Vairagyashataka points ont that life is all a shadow show and the path of bliss lies in realizing the true meaning of life. The Nitishataka contains words of advice regarding mural behaviour and how generally to follow the path of rectitude. His poetry, eavs Keith "exhibits sanskrit to the best advantage. In Bhattrihari each stanzn pormally can at and by itself

and serves to express one idea, be it a scatiment of love, of resignation, or of policy, in complete and finished form. The extraordinary power of compression which Sauskit possesses is seen here at its best. The effect on the mind is that of the perfect whole in which the parts coalesce by inner necessity."

• Education in the times of Harsha displayed the same high level activity as literature, learning being both wellspread and intensiveAs. the government honoured learning a considerable imputes was given to it and philosophy and other sciences received outcoaragement. Harsha himsolf evinced o keen interest in the progress of learning daring his times and in the furtherance of his policy huilt a great Samghorama at the famous University of Nalanda. He olso made provision for the maintenance of students studying at thot institution.

This institution was in a very flourishing condition daring the times of Harsha. The place Nalauda before it became an educational centre was a rich and prosperons place with which were associated the holy memories of the Buddha. The institution was already established by 100 A. D. and numerons kings and other wealthy patrons helped to maintain there a sneedension of glorious teacher whose fame had travelled all over the land. The kings of the Gapta dynasty and Harsha contributed in a large measure in making the seat of learning the focus of of intellectual life in ameiont India.

The University of Nalaudo was more or less on the same lines as its ancient predecessor the University of Taxia which floarished in pre-Buddhist days. It cannot be called a university in the modern accepted sense of the term for no such organization to which the numerous and well known teachers belonged existed. It was rather a centre of learning which attracted students from all aver India hecause of the presence of many learned and renowned teachers there. Different arts and subjects of higher interest were taught there. The students generally staved with the teacher who not only looked after their instruction in the subjects of their chnice .hut also moulded their character and infinenced their manners. The instruction was carried on in the morning and the noon was devoted to recapitulation and discussion by the students among themselves. The teachers had a large number of students (the traditional figure is 500) and were helped in their task by assistant teachers who in their stadent days were trained by them and had shown signs of great intelligence and aptitude. At the end of the conrse the students paid the fees of the teachers in cash, usually thousand banas. But those who were too poor to pay had in work for the teacher in lieu of their fees. Subjects, like archery, swordcraft, elephant craft, horsemanship and sacred lore were the most popular subjects at the Taxila University.

The University of Nalanda was nf a more ambitions nature. It was essentially a traching nniversity and stadents were instructed in all the varied branches of learning like the Vedas, Upanishadas, Samkhya, Vaisheshika as well as the philosnphy of Mabayuna and other Buddhist sects. Students coming from other centres of learning had the undergo a strict test before they were admitted to Nalanda. The teachers of Nalanda, according to Hinen Tsinng, were men of the highest ability and talent. "Their distinction" he says, "is very great; at the present time there are many hundreds whose fame has rapidly spread through distant regions. From maring till night they engage in discussion, the old and yonng mutually help one another." Famous teachers like Dharmapala, Guanmati and Sthiramati, Prabhamitra and Shilabhadra lived aod tanght at Nalanda. The students who came for higher learning generally stayed there for two or three years. Instruction was carried on in different viharas and Samgharamas which were donated to Nalaoda hy kings like Kumaragupta and Harsha Indeed anch was the fame of the busy intellectual activity of Nalanda that it was truly nu international seat of learning.

The University of Nalandu was still functioning in its full giory and a pernsal of the extends adopted and worked ont there would give a comprehensive idea of the magnitude of its task and the extension of its effects. Grammar, philology, logic, astronomy were some of the prominent subjects and teachers of natiouwide fame lived and taught at this university. Though Bradchism was op the wane it was still an active force and the number of monks engaged in study and teaching as mentioned by Hinen Teinag is impressive.

Hinen Taiang tells us in great detail about the carriculum followed in the course of education. "To educate and encourage the yong" he says "they are first tanght (led) to study the book of twelve chapters (Siddhavastu). After arriving at the age of seven years and upwards, the young are instructed in the five vidyes, shoatrars of great importance. The first is called the elucidation of sounds (Shabdavidya); it treats of the arts, mechanics, explains the principles of yim and yarg and the calendar. The third is called the medicinal treatise (Chikitsavidya) it embraces formulae for protention, secret charms (the use of) - medicinal stones, acceptmenter and mugwort.

## THE SOUTHERN INTERLUDE

The fourth vidya is called the *Hetuvidya* (science of togio); its name is derived fram the character of the work, which relates to the determination of the true and false and reduces to their last terms the definition of right and wrong.

The fifth vidyar is called the science of the interior (adhyatmvidyar-philosophy); it relates to the five vehicles, their causes and consequences and the subtle infinences of these.

The teachere explain their general sense, and guide their pupils in naderstanding the words which are difficult. They add lustre to their poor knowledge and stimulate the desponding."

The age was remarkable for its intellectual acuteness, religions toleration, social gaity and economic prosperity; the guiding force behind all being Harshavardhana of Shaneshwara.

## XII.

٢.

### THE SOUTHERN INTERLUDE

"SOUTHERN INDIA", says Vincent Smith, "as distiaguished from the plateau of the Decan, from which it is separated by the Krishna (Ristana) and Tungabbadrarivers, has a character of its own, and a history generally independent of that of the rost of India." Early contacts of political or enlural nature were not only hindered by natural barriers but ethnic and linguistic differences also hampered all such efforts. Though the Sonth was ' to the northernors for n considerable time, "" political inflaence does not effectively begin till the

of the great Mauryas. The references to southern kingdoms like the Cholas and the Pandyas. in the edicts of Ashoka presuppose the existence of these southern nowers for a considerable time in the past but a connected history of the south is difficult on account of the pancity of materials of a definitely historical nature. But the very fact that the kingdoms of the south referred to by Ashoka were independent and that he was keen on being on friendly terms with them suggests that their political nower and prestige were not inconsiderable. The Saugam petiod, which was the Augustan Age of Tamil literature, reveals an era of peace, plenty and prosperity resulting in · enitural development of a very high degree. Trade and commerce, hoth inlaud and foreign, were in n very flourishiur condition and pepper, pearls and beryls from the south were highly prized as commercial commodities in the markets of Earone.

After the decline of Mnuryas the Satavahanas established their kingdom in the Andhra countries and the Pullavas of Kanchi begun as officers of the Satavahanas and ultimately became kings of the region round Kanchi.

The origin of the Pallavae, like many of the dynasties of uncient India is a matter of controversy among scholars. Various theories are propounded to explain their origin and the theory that held the field till recently was that developed by the late Mr. Venkayya, who desaribed them as of Persian or Parthian origin. Vinceat Smith who first sponsored the Persian origin theory later on abandoned it in favour of the indigenous origin of the Pallavas. It is now almost unanimonaly accepted that . the Pallavas were indigenous in origin and "appeared 'for the first time in the south as a powerful Brahmana (the Gupta) invader tn xetire," The reign of Visbuugopavarman falls within circa 342-360 A. D.

The reigns of Simhavishnu (circa 550-600 A. D.) and his son and anccessor Mahendravarman I (circa 600-630 A.D.) form the golden nge of the Paliavas. Simhvishnn is assid to have defeated the Chulas, the Pandyas, the Kalabhraa and the Malavas and cansolidated the Pallava hegemany in the anuth. His religions leanings were towards Vaishnavism and his reign nshered an era nf considerable cultural activity.

Mahendravarman I : The reign of Mahendra is memorable (clrca 600 tn 630 A. D.) in many respects. The Chalakya contemporary of Mahendra was Palakeshin II who meted ant a anund rehaff th the exnansinnists ambitions of Harshavardhana of Sthaneshwara. The causes of the conflict, hetween the Chalnkyas and the Pallavas are obsence but the struggle was both lung protracted and hitter. In his battle with Palakeshin the Pallava king suffered a severe defeat. It was during his reign that,"'a real start in excavating temples nut of solid stone" was given the resolt of which are the magnificent temples of Mahabalipnram. The religious activitien of Appar and the literary efforts of Bharavi in Sanskrit literature synchronised with his reign and the age of peace and prosperity during which 'Mahendra ruled, gave considerable impetus tu productions in the fields of drama, music, painting and other arts.

A nuteworthy event in the life of Muhendra was his conversion to Sheirisan. He was at first a Jaina and was infterwards converted to the cult of the Linga by the cult of Appar ur Tirunavakkariyar, who was first persecuted and then patronised by Mahendravarman I. The two great Shaivn devotees, Appar and Tiranavasambandar, were contemporaries of the two Pullava kings Mahendraand his son Narasimhavarman I.

Shaivism though new comes into great prominence in the history of both the northern and conthern parts of India had a tradition reaching back into remote antiquity.

Like Vaiehnavism, Shaiviem also had, become very popular in this age. If the beginnings of Vnishnavism can he traced to as early an age as the Upaniehadio times the existence of the cult of Shiva could be linked with -the pre-Aryan epoch. The important finds at Mohevjo Daro enable as to form an iden of the religious conceptions of the Indus valley people. We have already described the figure of a deity called the proto-type of the historic Shiva hy Sir John Marehal eleewhere and have also referred to the wide prevalence of the phallusenlt in pre-Vedio India. In the Rigvedic period we find that Rndra-preenrsor of the Purnnic Shiva-is regarded with mixed feelings of dread and veneration. But he is altogeher a minor god. He is shown as a god of destraction and at the same time kind and henevolent. Radra'a cons are the Maruts and both the father and his sons are associated with death from very early timee. He is also described as the protector of cattle-Pushupn. There ie ' a reference in the Rig veda to ande gods indicating tha prevalence of pholins worehip among non-Aryane. The general conception about Rndra in early Brahmanic literature appears to be that "Radra was a terrible god and in Rudra Shaivism the centiment of fear ic nt the bottom, however concealed it may have hecome in cert-

ain developments of it, and this sentiment it is that has worked itself out in the formation of Rudra-Shaiva systems of later times."

In the Mahabharata Shivn has already become a powerful, wrathful impetuous god, hat generons when pleased. His vehicle is the famons Nandi and he is sho wan as specially fond of Yoga. A necessary adjunct of the Shaiva creed is phallas worship. Today the sect claims adherents generally almost all over India but especially South India is its centre.

After his conversion to Shaivism Mahendra-lost no time in giving a new impulse to that religion in the Tamil country by excava ting a number of rock ont Shiva temples in the Kanchipnram district. These rock cut temples are evidently in imitation of the Buddhist pattern.

The monuments of Mahabalipuram are remarkable hoth for their stylistic significance und religious associations. The oldest and most interesting group of these monuments are the so-called five "rathas" or monolithic temples standing on the sea shore to the south of the other rock excavations. Four of them stand in a line running from north-north-east to sonth-south-west and appear to have been carved ont of a single rock or stone which must have been between 85 to 40 ft. in height. and one stands a little detached from the rest. Dranpadi's ratha is a cell 11 ft. square externally and with a curvilinear roof risiog to about 18 ft. high. This "ratha". is the most completely finished of the five and is now unique of its kind". The Arjuna ratha is a copy of the Dharmaraja ratha. The Bhima ratha is nn ohlong hnilding measuring 48 ft. by 25 ft. high. The Dharmaroja ratha

is the finest and most interesting of the group. The three npper stories are ornnanced with little simulated cells. The Gauesha ratha is situated at distance of three, quarters of a mile from the others and is a small and singularly, elegant temple. It is in three stories with elegant deteils and shows a form a later known in Dravidian architecture as Goguram or gateways. Of greater interest to ne is the clear indication that these rathas formed the originals from which all the vimanas in southern India were copied, and continued to be copied nearly unclanged to a very late period.

The Kailasnath and Vaiknntha temples at Conjeevaram are other notable examples of Pallava architecture. The former is dedicated to Shiva and faces the east and has a sancturn 9 ft. equare enclosed by massive stone walls-6 ft. thick. Enshrined within is a huge sixteen-sided black stone linga about 6 ft. in height and 3 ft. in diameter. Around the sanctury is a narrow circumbulatory. passage , with a fight of steps on the south eide leading upto the first floor. In front is a portico flanked by two small shrines, one on each side of the entrance. As the sanctury end passage are covered by the flat roof or terrace above on which stands the pyramidal tower of the temple the . interior is in total darkness. The exterior walls of the Shiva chamber are provided with no less than nine small ettendant shrines. The pyramidal tower over the central shrine is divided with no less than nine small attendant shrines. The pyramidal tower over the central shrine is divided into three main stories rising to a total height of about 50 ft. and is crowned with the usual nimbrella ornament surmonnted by an ara-finial.

In the development of Pallava architecture fourdistinct styles corresponding to the periode of the four-

kings Mnhendra (610 tn 640 A. D.) Mamalln, (640 to (674 A. D.) Rejasimha (674 tn 800 A. D.) and Nandivarman (800 to 900 A. D.) pre to be seen. Of the first style the monuments are "the enhterrenean rock cut excuvations known an cave temples. They have one - external facade which is in the face of the rocks. The plan is simple consisting of a rectangular pillared hell with a small shirne-chumher exumvated in one of the eide walls. These temples are characterised by the type of pillar found in them. The pillare are 2 ft. square in section and 7 ft. in height. The upper and lower portions are cuhical while the middle portion of the shaft hes the angles levelled off, which makes the middle third octagonal in section. Sometimes the -enhleal portions are decornted with a conventional lotns flower design similar to the lotns medallions appearing on the stone rails of the Amaravati Stupa. The capitals of the pillare pre simple corhels or brackets supporting the prehitrave above. The lower or underside of the hrncket is rounded upwards and " cometimes decorated with horizontal rowe of ornament."

To the second or Mamalla style helong cave temples, rathers and rock temples. The most striking feature is the curinus shape of the pillars. They are now more elegant and hetter proportioned. At the base is the conventional lion supporting the shaft of the column on its head. Between the expitul and the architrave is a double bracket supporting the cornice. The seven pagodus are a notable example of this style of archtecture.

The third nr Rajasimha style introduces a new trend in the history of sonth Inninh architecture. New structural buildings come into vague. They are built of

# THE SOUTHERN INTERLUDE

205

stone sometimes accompanied by n brick auperstructure covered in plaster and decorated in instances. The central ehrine is covered with a lofty tower rising in tiers which diminish in size as they approach the enumit. The prominent example of this style is the Kailasnath temple at Canjeevaram.

The fourth of Mandivarman style carries the tendencies of the Mamalla period into further elaboration. The gable window ornament and absence of the conventional lions are some of its characteristic feature.

.Bnt the most interesting and remarkable group of sculptures of this period are the statues of Simhavishau and Mahendravarman carved in a panel in a rook out temple at Mahabalipuram. The first one is of Simhavishou with his two queens on either side and the other shows Mahendravarman with his left hand holding the right hand of one of his queens. Pointing out thesalient characteristics of Pallava architecture. Kramrisch saya, "Most of the other rock cut reliefe of Mamaliaparam are architectonic in their structure. Whether they represent Vishnuitic mythe and Shaivaitic divinities or " the royalty, the rectangular frame is the key note of the composition. Where eingle figures are made to fill aunk pauels on the rathas (rock ont temples) their extraordinary height is one with that of the chafte of the fillastere that flank those panels. But not only is the the remarkable elongation of the figures in keeping with architectonio devices. Their postures too, whatever bend the, body may assume, have more of the swaying loftiness of Aryavarta figures. The vertical direction remaine predominant and hases its slimnese on the ehallow cavee which cling to the tall limbe and make them smooth. And inrther unbounded mass is suggested

#### STORY OF ANCIENT INDIA

by the relation of the figures towards it, has paradoxically enough architechtonic discipline for its co-relation. This antithesis of the suggested nubconded and the nestly defined and disciplined gives but two eesential aspects of one and the same reality."

The reign of Mahendra saw considerable activity in the fields of architecture, painting and literature. The work Mattavilasiniprahasana throws a revealing light on the cultural conditions of the age. The Buddhist and Jain religions were declining in strength and Vaishnavism and Shaivism receiving royal support had assumed greater strength and vigour. The temples of Mahabaliparam hear eloquent testimony to the architectual aptitude of the monarch and serve to indicate and fund for ging of cultural unity between the north and the south.

The Pallavas, says Dr. Krishnarao, have a very important place in the history of ancient India. They were the counter part of the Imperial Gaptas and Vakatakas, in the south. They were the earliest dynasty wha introduced Sanskrit in the south. Hist the Imperial Guptas the Pallavas described themselves as Paramabhagavatas and established Vishnaism as the state religion. They heautified the sunth with senlpture and architecture and their capital became one at the seven holy cities of India.

# THE KADAMBAS

The Kadambas who ruled over the present districts of Belgann, Dharmar, North Kanara and the northwestern parts of Mysore were the pultitcal contemporaries of the Pallaras. They were Brahmanss of the Manava getra and claimed northern origin.

Maynrasharman the founder of the dynasty heing insulted by the offensive behaviour of some 'Pullava hor semen with whom he was involved in a sharp quarrel, decided to averge himself. He, then, after having duly trained himself in the art of war overpowered the frontier guards and established himself in the forests of Shriparvata (Shrishnilam, Karnul district). The Pallavas tried to chastise him for his audacity, but latter on made a compact with him hy which he entered into their service. His valour and dignified bearing so pleased the Pellava king that ho was rewarded with suzerainty of the Premara (Malwa) country.

The rule of the Kadambas reached its acme during the reign of Kakusthavarman. He was a distinguished warrior and the contry over which he ruled so efficiently was peaceful and prosperons. During his reign the Kadambas, as a political power hecame so important that Narendrasena, the Vakataka' king thought it fit to contract a matrimonial ulliance with a daughter of Kakusthavarman and a second daughter of his was married to a Gapta king. During the 4th and 6th centuries A. D. the Kadamba rule was at its highest hat sneenmbed before the onslangth of the Chalmkyas in the middle of the sixtb century A. D.

•

Cholas, Cheras and Pandyas: The three Sonth Indian kingdoms of Cholas, Cheras and the Fandyas are af great antiquity and references to them in the Mahabharata and the Paranas can be found describing them and their propartions. Ashoka in his edicts refers to them in such terms as to suggest positions of importance and " power. But the sources for the reconstruction of their history being what they are, any attempt to do so is beset with considerable difficulties. All the three kingdoms involved Arjana ia a fight in which Wang-Hiuen T'se was helped by Tihetan troops. Severe defeat was indioted upon Arjana and the Chinese occupied come parts of India. In the absence of any further corroborative material the historicity of the story is always open to question hut it serves well to indicate the wide prevaleoce of chaose ia political conditions following Harsha's death.

Yashovarman: Bot oace agaia after Harsha'e death Kanauj ia the 8th century A. D. leapt ioto political promiaeace, with the relegn of Yashovarmao. He, it appears, was of the same type as Yashodharman and Shashaaka, a seeker of political fortnae and encceeded io establishing his power at Kaanuj. His reiga is memorahle for his literary patroaage to Bhavabhuti, the great Sanskrik pote who lived at his court.

It was during the reign of Yashovarmao that Dhavahhat, the Saaskrid dramatist, lived and wrote his three plays Mahaviracharitam, Malatimadhava and Uttararamacharitam, Bhavahbui oamè of the Udambara family from the city of Padmapnra. He was well versed in grammar, rhetorie, logio Vedas, Upanishadas, Samkhya and Xoga. Io hie early life, he like hie predecessor Bana, was very friendly with actore who may have influence him ia turning to the stage. For them he wrote, prologues for the plays written by othere hut after some time succeeded in having his own plays staged hy his friends.

In his Mahaviracharita, Bhavabhati dramatises the early part of the life of Rama. The piece opens shortly hefore the hero's marriage and the story is taken np through his exile, the abduction of Sita and her resone

were engaged in interaccine warfare and thus their territorial dimensions were frequently subjected to drastic alteration. Of the three the Cholas were no doubt the most powerful and important. The first historical Chola rnler was Karikal who anceeded to the throne when quite young and was an heir to the kingdom not in the enjoyment of peace. He is credited with having made embankments for the Kaveri river and ander bim the kingdom reached new heights of glory. He had to fight the confederacy of Chera and Pandya chiefs which resnited in subsequent Chera-Chola friendship. But undonhtedly Rajaraja (the Great) was the greatest of the . monarche of his time; who with his numerons wars and extensive conquests made his kingdom the most powerful in south India' He anceeded to the throne in 985 A. D. and had first to pat an end to dynastic intrignes. In his hnay reign of 28 years he passed from victory to victory and at his death he was indisputably the Lord Paramonnt of Sonthern India roling a realm which included nearly the whole of the Madras Presidency, Ceylon and a large part of Mysore.

### XIII.

#### THE LAST DAYS

THE history of the timea immediately following the death of the great Harshavardbana is still shroaded in considerable darkness. He, it appears, and there are good groands to believe, died heitess and anbesquently a minister of his, named Arjuna, or Aranasbva usnrped hié throne. This Arjana, we are told by some Chinesé books, robbed a mission headed by à Wang-Hinen-T'se which reached India shortly after. Hatsha's death. This

209

involved Arinna in a fight in which Wang-Hinen T'se was helped by Tibetan troops. Severe defeat was inflieted npon Arinna and the Chinese occupied some parts of India. In the absence of any further corroborative material the bistoricity of the etory is always open to question hut it serves well to indicate the wide prevalence of chaos in politicol conditions following Harsha's death.

Yashovarman: But once ogoin after Horsha's death Kanan in the 8th century A.D. leapt into political prominence with the reign of Yashovarman. He, it appears, wos of the same type as Yashodharman and Shashanka, o seeker of political fortune and succeeded in establishing his power at Kanani. His reign is memiorable for his literary patronage to Bhavabhuti, the great Sanshrit poot who lived at bis court.

It was during the reign of Yashovarman that Bhayabhut, the Sanskrit dramatist, lived and wrote his three plays Makaviracharitam, Makatimadhawa and Uitararamacharitam, Bahvabhuti came of the Udumbara family from the city of Padmapura. He was well versed in grammar, rhetoric, logic Vedes, Upanishadas, Samkhya and Noga. In his early life, he like his predecessor Bana, was very friendly with netors who may have infinence him in turning to the stage. For them he wrote prologues for the plays written by others hut after some time succeeded in hoving his own plays staged by his friends.

In his Makaviracharita, Bhnvabhuti dramatises the early part of the life of Rama. The piece opens shortly before the hero's marriage and the story is taken up through his exile, the abduction of. Sita and her rescue nnd ends with Rama's return from Lanka and his subsequent coronation. The skill of the dramatist can easily be judged by the unified charactor he had imparted to the plot by reducing a large number of apparently diverses incidents into a harmonions story with a basically good characterisation which however, through the presentation of fully developed characters instead of passing through n process of development, uppears in certain places stiff and anconvincing.

His Malatimadhava is more ambitions in design. The story centres round four main characters. Bhurivasu and Deverate and Malati and Madhava. Bhurivasu and Devarata, two great friends, decide while studying at a university to maintain their close friendship by marrying their son or daughter to each other. Later on Bhurivasn becomes a minister to the king of Padmavati and has a daughter named Malati. Devarnta becomes a minister of Kundinpura in the Berars and has a son called Madhaya. But the friend's plan is threatened with frustration when the king of Padmavati desires Malati to be married to his court favourite Nandana. This difficulty obviated through the good offices of Kamanandki a fellow student of the parents. She so arranges a meeting between Malati and Madhava at a festival that they fall in love with each other, and as such the king could not find fault with Bhuriyasn. That is the main plot. And this is intersticed with subplots and several episodic elements. The plot as it stands is a loose natch-work and lacks the consistency, the inevitableness, that should belong to every dramatic action. But it also shows the dramatist's power of inventing and his sense of the dramatic. It is sentimental in tone and its language reveals a fine command over the finer shades of meaning and their proper nse.

it represents the best elements of the infinences of Gandhara art, "Except for its quasi-classic pilasters", eays Havell, "the design of the Martanda temple confirms etricitly to the Hindn tradition of the time." In its finished form it must have been an imposing structure; boldy planned and artistically excented.

But the story of the two countries from the close of the 8th century to 1000 A. D. is essentially the history. of the rise of the three great kingdoms of the Rashtrakutas, the Palas of Bengal and the Gurjara Pratiharas. These three dynastics jointly und severally influenced the destiny of India during the most oritical period of her history.

The history of the ninth and teuth centuries A. D. is eccentially the history of the tripartite straggle for power hetween the Rashtrakutas, the Garjara-Pratiharas, and the Palas of Bengal. The political set-up in Narthern India was in a very fluid state and territorial demarcation of different kingdoms enhiet to violent fluctuations. The once powerful Chalakyas raled in the Dekkan but due to their protercted hereditory atraggle with the Pallavas of . Kanchi, their strength was now definitely on the decline. In the East Koshala ruled Udayana and in Rajputana and Malwa ruled the Gurjaras with their centres at Bhimam and Ujiain. But they along with the Maitrakas of Vallabhi were constantly harassed by the Arabs. Gopala I was trying to consolidate his kingdom of Bengal which had just emerged from anarchy. In such conditions rose Dantidurga, the founder of the Rashtrakuta dynasty. He exploited the circumstances to his hest advantage and built up a kingdom which snon hecame an imperial power . The predecessors of Dantidarga must have been raling in fendatory capacity somewhere in the central or westerp -

THE LAST DAYS

portione of Central India. or more precisely in Berar. The family of the Rachtrakutaa came of the Canarese stock and spoke its mother tongne Conarese. Dantidurga began his career by attacking his neighboure in Koshala and Shrivardhana and hy extensive manoenvree and bold generalship he defeated the rulera of Kanchi. Kalinga, Shrishaila Malwa, Lata, Tanka and Sind. Later on in alliaace with Naadivardhana the Pallava ruler, he attacked the Gnrjaras of Broach and the Chainkyae of the Gujarat branch and annexed portions of their dominions. Dantidurga was a leader gifted with political insight and possessed of great organising capacity. Hie empire, which he alone built up, included sonthern Gujarat, Khaadesh, Beraí and Northern Maharashtra. He was an orthodox Hindu and gave large charities to the Brahmanas. He died not long after 754 A. D. and was anoceeded by his nucle Krishna I, who continued his policy of expansion. Krishna I, made further additione to the Rashtrakuta empire by succeasfully attacking the Chalukyas ead aanexing Konkan, Carnatak and the major portions of the present Hyderahad State.

Krishna I was anceeded by his eldest son Govind II in circa 772-773 A. D.' Thie king distinguished himself more in a life of plenance und vice than in battle and conquest. He was aubsequently overthrown by hie younger brother Dhrnva in 780 A. D.

When Dhrnva came upon the throne he was fifty years old. Bat age does not seem to have impaired his military ability or damped his imperial ambition. He first attacked the Gaaga chief, Shivamara, defeated and imprisoned him and annexed his kingdom, This Shivamara, seems to have allied himself against C' war of anccession which he had to fight to

predecessor-his elder brother Govinda II. Then he turned against those Chiefs of Tahwad, Kauchi, Véngi and Malwa who displayed disloyal tendencirs during the troublesome days. He overrau the Pallava Kingdom and almost beseiged the capital of Kauchi. Then he turned oorthwards and defeated Vatarain, the Gurjarn Pratihara chief, possibly with a view to helping Dharmapala of Bengal in 759 Å. D. But Dharmapala proved to be his next victim, who was eventually defeated. The reign of Dhruva marks the bigh water mark. of the glory of the Rashtrakutas for, in his short, reign of 13 years (760 ta 793 Å. D.), he nut ooly re-established Rashtrakuta

Dhrava selected Govinda III among his sons and possibly abdicated in his favour. Soon after Dhrava's death Govinda III was lovolved in a war of succession with his brother Stambha whom he soon defeated. He reduced all the important Kings to the Sonth of the Narmada and turned his afteotion to Dharmapala of Biengal and his protege Chakrayadha both of whom he humbled. Io 606-607 A. D. he decided to match his strength against Nagabhata II, the successor of Vatsaraja on the Gajrat Pratihan throue and elarted on an expedition which was boldly phoned and brilliantly excended. In this campaign he was eminently successful and his armies marched right upto the Himslayso rauges.

columns in their long marches literarily embraced all the territories between the Himalayns and Cape Camorin.

Govinda III died in 814 A. D. and was sneceeded by the six year old son Amoghavarsha. Amogha's reign in its early part was beset with considerable difficulties. The fendatory ohiefs rebelled and dissension was widespread. . His cousins who were foudatory chiefs of the Gujarat territories declared themselves independent and founded a branch line there. Amopha was psaceful by disposition and the arts of peace naturally received great encouragement during his reign. Though he succeeded in stabilising his kingdom, in the end, the power of the Rashtrakutas was now definitely on the deoline. The later Rashtrakuta kinge were continuously engaged with the Garjara-Pratihara chiefs in wars of mutual exhaustion. The Parmaras were also gradaally rising in power and prestige and the Rashtrnkutas had to contend with them for their very existence. Internal dissensions and external conflicts in conrse of time so exhanated the Rashtrakutas that for all practical purposes their power came to nn end hy 948 A. D.

The achievements of the Rashtrakutas were as remarkahle in the political field as they were glorions in the caltaral sphere. The Kailasa temple at Ellora described by Havell as in some ways the most wonderfal *tour de force* achieved by Iudian eculptor architects was built by Krishna I to glorify bis patron deity and oonmemorate his victories. "Technically." says Haveli, "the Kailasa temple is almost anique among the great rockcat monuments of India, for instead of making a horizontal excavation into a hill side, as was the case at Ajanta or cavring detached masses of reck as at Mammla predecesson-his elder brother Govinda II. Then he turned against those Chiefs of Talawad, Kanchi, Vengi aod Malwa who displayed disloyal tendencies during the troublesome days. He overran the Pallava Kingdom and almost heseiged the capital of Kanchi. Then he turned northwards and defeated Vatsaraja, the Gurjara Pratihara chief, possibly with a view to helping Dharmapala of Bengal in 789 A. D. But Dharmapala proved to be his mest victim, who was eventually defeated. The reign of Dhruva marks the high water mark. of the glory of the Rashtrokutas for, in his short, reign of 13 years (780 to 793 A. D.), he not only re-established Rashtrakuta

Dhruva selected Govinda III among his sons and possibly abdicated in his favour. Soon after Dhrava's death Govinda III was involved in a war of saccessioa with his brother Stambha whom he soon defeated. He reduced all the important kings to the South of the Narmada and turned his attention to Dharmanala of Bengal and his protege Chakravudha both of whom he humbled. In 806-807 A. D. he decided to match his strength agoinst Nagabhata II, the successor of Vatsaraja on the Gujrat Pratihara throne and started on an expedition which was boldly plauned and brilliantly exeanted. In this campaign he was eminently successful and his armies marched right upto the Himalayan ranges. Daring 808-810 A. D. he planned a 2nd campaign in the Sonth and overran the Ganga, Pallava, Chola and Pandya-kingdoms. Brilliant as these campaigna were they were more in the nature of Digvijaya and did not result in an annexation of any further territories to the empire. But Govinda was an-- doubtedly the ablest of the Rashtrakuta emperors. A bold general and a victorious conqueror, his trinm?

columne in their long marches literarily embraced all the territories between the Himningus and Cape Camorin.

Govinda III died in 814 A. D. and was succeeded by the six year old son Amoghavarsha. Amogha's reign in its early part was beset with considerable difficulties. The feudatory chiefe rehelled and dissension was widespread. His consing who were feudatory chiefe of the Gnjarat territories declared themselves independent and . founded a branch lino there. Amogha was peaceful by disposition and the arte of peace naturally received great encouragement during his reign. Though he succeeded in stabilieing his kingdom, in the end, the power of the Rashtrakutas was now definitely on the decline. The later Rashtrakuta kings were continuously engaged with the Guriara-Pratihara chiefe in wars of mutual exhaustion. The Parmarae were also gradually rising in power and prestige had the Rashtrakutas had to contend with them for their very existence. Internal dissensions and externai conflicts in course of time so exhaneted the Rashtrakutas that for all practical purposee their power came to an end by 948 A. D.

The achievementa of the Rashtrakntas were as remarkable in the political field as they were glorions io the cultural sphere. The Kailasa temple at Ellora described by Havell as in some ways the most wonderful *tour de force* achieved by Iadian scalptor arcbitecte was built by Krishna I to glorify his patron deity and commemorate his victories. "Technically" says Havell, "the Kailasa temple is almost anique among the great rockcat moonments of India, for instead of making a horizontal excavation into a hill side, as was the case at Ajauta or carving detached musses of rock as at Mammila

slopiog hill-side from above, quarrying a pit varyiog in depth from 160 ft. to about 50 ft. and leaving io the middle of it a detached mats of rock from which they sculptured o foll-size double storeyed tample solid at the base, hot with the first floor completed intercally and externally-its vimana, or shrine 96 ft. io height, and the assembly hall ohont 53 ft. square, with sixteen sculptured pillars arranged in groups of faur ta support the solid mass of the roof. The three sides of the deep pit which formed the temple conrtyard were subsequently carved ioto pillared cloisters, which proved a richly scolptnred pracession path, and n aeries of splendid chapels fram whose dimly lit recesses Shivp's snow-white palnea canld he be seen glittering in the snnlight, for the scalpture, as asaal was finished with a fine coat of highly palished chunam."

The Palas of Bengal : Io the early part of the 8th century A. D. Beogal was so much immersed in aparchy . that the people elected one Gonala I to he their ruler to save them from the dire effects of interpecine conflicts. When Gopaio I came to the throne io 750 A. D. he was 'no elderly mon. He was married to Dadda Devi and cojoyed a very short reign. He was succeeded by Dharmapaln who was the reol founder of the greatoess of the dyoasty. Doring his long reign Dhurmapala made him. . self the moster of Northern India and his infloence reached os far os Kashmir. Dhormopolo was a Buddhist hat his Buddhism most have had very little resemblance to what Gantama, the Buddha prenched. Dharmapala was socceeded by his soo Devopolo, whose role covered the major portioo of the 9th century A. D. Doring his reigo the kiogdom of Assam and Kolioga were annexed to the \*\* 1 The dynasty cootioned its role ooder Mahipala

r

(circa 678-1030 A. D.) who was attacked by Rajendra -Chola in about 1023 A. D. The Palas of Beogal were constantly engsged in wurfare with the Rashtrakhtas and the Gurjsra Pratiharas and as such their power had only a local sigoificance.

During the age of the Pules of Bengal Mahayann Buddhism (especially tantrio worship) flourished with considerable vigour and it is not surprising that art received both direct and indirect impetus from them. Some images of Buddhist divinities could even now be found scattered in Bihsr, Orissa and Bengal but many must have dissappeared into total destruction due to vandalism. Of the existing specimen an image of Vishun found in the ancient city of Mahnsthana combines a mysterious-sense of vitality, perfect simplicity and restraint of setting nod attractive scheme of decoration. But the general tendency is towards a formal crudeness and florid 'ornamentation generally reflecting the fibre of the age.

The Gurjara Pratiltaras: The origin of the Gurjara Pratiltaras is sbroaded in mystery and as yet is a topic of controversy. According to M. R. Halder, the Imperial Pratiltaras of Kananj derived their family name from the office of a Pratibara or door keeper and not from the asue of their Primeval man like the Chandellss and others. (Indian Antiquery, Vol. LVII. pp. 181-189). The most widely accepted theory, however, describes them as a people of central Asian origin. They invsded India soon after the Hunas and first settled in the Propinb. This was in the early years of the 6th cent inry A. D. when they established kingdoms and palities in various places. Daring the times of

hy the Rashtrakuta King India III but the fortunee were soon retrieved. Mahipala died in 931 A. D. and was succeeded hy his three suns Mahendrapala 11, Devapala and Vijayapala During this time the Pratihara Empire was menaced by the Chandellas of Jejaka Khukti (Bundelkhand) who by 954 A. D. extended their power upto the Jampua in the rorth and Gwalior in the northuwest. Following their example the Kalachuris, an ancient family with their history dating hack to 3rd century A. D. but fendatory to the Pratiharas, now established an independent principality. Thus is the last quarter of the 10th century A. D. the disintegration of Pratihara rule was almost reaching its final phase. The repeated raids of Sultaa Mahamud of Ghazni and the devastation consequent upon euch raids fialshed the work which was started by wars of mntnal attrition fought by Indian kiags among themselves. These raids exhausted the economic and military resources of the country and opeaed the golden gates of India to a flood of foreign invaders.

#### XIV

### IN LIGHTER MOMENTS

In the foregoing pages we made an attempt to learn the history of political events in the story of Ancient India. This represented the life of the people in the serioas task of war and territorial acquisitions and empire building and government. Incidentally we also bried to understand the meaning of the varied mounmeatal legacy left to us hy nor ancectors in the dim and distart past. But their's indeed would have been a poor

ċ,

life, if as the poet W. H. Davies says—they had no "time to stand and stare", amile and iaugh, clap and applaud, rail and bantar, as appppet ahows and dramas. In short, no account of their life would be complete without a reference as to how the spent their leisure boars.

The commonest occasing of social festivity was the Samajia. At such festivals daucing, singing, music, recitatione, conjuring tricks and acrohatic shows wera much in prominence as items of entertainment. On such occasions the man of fashion wunld deck himself in all finery. Vatayayana in his Kamasutra has given us a. detailed description of a nagarika's (citizen). toilet. "After getting ap and cleaning up his month and teeth the dandy proceeds with his toilet. The first article in this toilet is the anulepana, a fregrant contment ordinarily made of fine sandalwood paste, or of preparations of .a variety of sweet smelling substances. He applies snitable quality of this ointmant to his person. He then scents his clothes in the sweet smelling smoke of incense thrown into the fire and wears a garland on the head, or hangs it round his neck. He applies collyriam made of varions substances in his eyes. To his lips, already reddened by the betel he has chewed, he applies alatkaka (a red drug made from lac) in impart a deeper crimson . to them and then rubs them over with way to make the dye fast. Then he looke at himself in glass, chews spiced betel leaves to perfume his munth and thus decked out sallies forth." By the time he reaches the fair ground, it is fairly lively and buzzing with activity. Perhaps in one corner stands the master acrobat, beating a gong to -collect a crowd before he starte performing his tricks-. ne panse and see what he has to show. In small

### IN LIGHTER MOMENTS -

225

groups of twos and threes, the spectators are assembled. Now the master acrobat 'digs all over the ground, removes all irritating stones, pebbles and fragments of broken pottery and makes the ground smooth and soft. This done be challenges his mate to a bout of wrestling. The bout starts with spectors now clapping,' now sighing." From some other corner of the fair waft strains of music. Perbsps a skilled musician is displaying bis art. There be sits with the seven stringed vina in hand singing . a soag of a lover joyonsly expecting the arrival of bis lsdy love; or perhaps he is singing about the valorons deeds of an ancient hero on forgotten fields of deathly hattle? The drum gives him accompaniment and the tom-tom and cymhals lend voice and sound to past deeds. Just opposite to him is, perbaps, a touring theatrical company. A dance-ballet highlighting some exalted and virtuons deed is in progress. Then on the other side, may he, sits the astrologer, ready to tell your fature hy Interpreting omens, dreams and signs, ready to foretell oclipses, and ready for prognostications from the flight of comets, the thuaderiags of gods, the junction of planets, the fall of meteors, earthquakes, conflagrations, sigas in the heavene and on the earth. He tells you about wenith ; and happiness and kings.

Talking-about kings let us see what is happeniag or a festive day like this in the royal palace. Perhaps a drama by a far renowaed master ! Perhaps the Mriccharkalika of Shadraka will; be on the stage soon. The spacious royal theatre measuring 96 ft. square is being for ready. The anditorium is in one constant bum. The king has his throne arranged in the centre and the stage hastles with activity. In the green room are seen actors and actresses getting ready for their roles of Aryaka and

King Palaka, Samsthanaka and Vasantasena, Charudatta and Sharvilaka. Soon in a matter of hours Aryaka will bo imprisoned by the order of King Palaka because he is afraid of n prophecy that a shepherd's honse will overthrow his dynasty. Samsthanaka will molest the charming Vasantasena who will take refnge in Charudatta's honse. He will agree to keep in his custody her jewels and escort her back home. In the meanwhile Sharvilaka will break into the poor Brahmana's house and decamp with the jewels. Then Charadatta, for lear of being langhed at if he said that he was robbed of the jewels, will preteod that he gambled them away and in return will give the lady his wife's only ornament-an old fashioned necklaae. Sharvilaka, in great joy, will tell his ladylove of his successful theft for her liberty but she will turn him away and return the stolen goods to her mistress Vasantasena who overhears the conversation. Now she is so pleased with Charndatta's behaviour that gradually she will fall in love with Charadatta and eventually marry him after surmounting maoy an obstacle.

As the tails develops the critical andionce is now wild at Samasthanaka's hebavionr and now sympathetic towards the poor Charndaita. Every incident, every movement, every gesture, every scene and every not is keenly -followed, applanded, criticised on its merits or fanits.

The above sketch may well apply to the theatre and the dramas produced in ancient Iadia. The king was the sapreme patron of all the fane arts but theatres besides the one in the palace were not non-existent. Bherata, ia his Natyashastra gives detailed instructions of theatres

.

## IN LIGHTER MOMENTS

of different dimensions. Bharata classifies theatres into three groups; the first "where gods and angels figured" and where there was a frequent use of large musicalinstruments together with such movement on the stage. The medium size is that which is recommended specially.

"The standard theatre was a rectangular building 96 ft. in length and 48 ft. in breadth, subdivided into two equal divisons, viz. (a) the auditorium and (b) the etage. The anditorinm was 48 ft. aquare, the front stage -12 by 24 ft. the back stoge 12 by 48 ft. and the green room 24 hy 48 ft. The front stage and the hack stage together formed the full stage. On hoth sides on the front stsge were wings facilitating the entry and exit of ths actors." The theatre ahould be properly decorated, says Bharata. "The front part of the stage ought to he hnilt of wood and abould be richly decorated with wooden carviogs of waterpots, flags and images of damsels. It should also be hnog with garlanda and turnished with ornamental arches. The lower end of the stage most be white, plastered and reodered smooth, ond the platform mast on no account he slippery. For the background of the stage, six wooden blocks were to he erected. The intermediate space was to be filled with very fine hlack earth, in the shape of the hack of o tortoise. This earth should have the lustre of a pure mirror and it should be stadded with emeralds, sapphires, corals and other . jewels arranged in varions designs on all the four sides. In the centre of this hack wall and on all the walls of the theatre, pictures of lions, elephants, caves, monutains, cities, flower-groves etc. were to be painted."

"The seats in the onditorinm were to he arranged in the maaner of a ladder, to ensure visibility. They were to be made of wood and bricks 11 ft. higher than the ground; on these seats people squotted."

On a stope of such dimensions and decorations performed actors who were corefully trained in the art of u smooth and melifinous verbal delivery occompanisd hy natural and appropriate gesturee. According to the Natyadarpana "the three elements of bodily gesture are the limbs, parts of the body and feotures. In angabhinaya the bood, honds, arm-pits, sides waist ond feet, these six, and some soy also the neck, are called the limbs. In thepratyangabhinaya the shoulders, shoulder-blades, urms, bock, stomach, thighs ond cnivse, some soy also three others, the wrists, knees and elbows, ore the parte of the body. In upangabhinaya, the eyes, eyelids, pupils, cheeks, nose, jow, the lips, teeth, tongue, chin, facs, these eleven ars the features. Beeides these are the occessoriee, such as the heel, ankls, fingers, and toes and polms." By an appropriats and claver employment of all these ports the artist strove to crents an atmosphere of intense suggestion and feeling.

A similor form of populor entertainment was the pappet show. The pappets were enreed out of wood, dressed in appropriate apparel and minimited with the help of strings. A norrator would simulate the voices of the characters and also narrote the bockground story of the incident. Many a time, hesides, porties of performers would represent historic incidents of bygone days or mythological tales of a heary antiquity at the fairs.

Gambling was a necessary adjunct to such festivals and was generally done with dice. The Payasi Sutta , of the Digha Nikaya tells us of a story of two gamesters. Once upon a time, so goes the story, "two gamesters were playing with dice. One gamester swallowed as it came each adverse dife. The other gamester suw him do this and said, "look here, friend, yon have won ontright; give me the dice; I will make a votive offering of them." "Good, friend" said the other, and handed over the dice. Then the second gamester smeared over the dice with poison, and proposed to the former: "Come along, triend, let's play". "Good, friend" replied the other. Again, therefore, they played, and again that gamester saw him doing so and said:

The man knows not the swallowed die

With sharpest barning is smeared o'er

Bitter the honr at hand for you'';

ķ

From this story it appears that the dice were made of some seeds. In the opinion of the late Prof. Luders the dice were made from seeds of a tree called Vibilitaks and when the gume was played they were thrown on a board. Same fell upright and others on their sides. Those that fell apright, only connted. The Dystaparca of the Makabharate gives a graphic description of the Istal game of dice indalged in by the Pandavas to their rain. Daryodhana, we are told grew jealons of the glory of the Faudarns and wanted to exterminute them. His ancle Shakani suggested In game of dice asying that Yudhisthira was fond of gambling bat did not have how to play. The game was arranged and with the help of Shakani the Kamaras and seesed in divesting the Pandavas of nil their earthly possessions.

Gambling seems to have been very much in vogue during the times of Kantilya for he advocates the appointment of a superintendent of gamhling. This superintendent, he asys, "schall be honest and supply dice at the rate of a Kakani of bire per pair. Substitution hy tricks of hand of dice other than thus supplied shall be punished with a fine of 12 panas. A false player shall not only be punished with the first amercement and fines leviable for theft and deceit, but also he made to forfeit the stakes he has won.

The superintendent shall take not only 5 per cent of the stakes won hy every winner; and the hire payable for supplying dice and other accessories of dice play, hut also the fee chargeable for emplying water and accommodation, begides the charge for license."

Imhihing liquors was another common practice on festive occasions. There were, it appears, three kinds of liquore. . The first variety was made from molasses, the second from powdered rice and the third from Madhura flowers. Hinen Tsiang says "with respect to the different kinds of wine end liquors, there are various sorts. The juice of the grape and sugarcane, these are used by the Kshatriyas as drink; the Vaishyas use strong fermented drink; the Sbramanas and Brahmanas drink a sort of syrap made from the grape or sugarcane, hat not of the nature of fermented wine." Kautilya strongly advocates government control of liquor and recommende the employment of "persons acquainted with the manufacture of lignor and ferments" as apperintendents of lignor. He, according to Kantilva. "should carry on liquor traffic, not only in forts and country parts, but also in camps. In accordance with the requirements of demand and supply he may either cent-" ralize or decentralize the sale of liquor. Liquor shall , not be taken out of villages, nor shall liquor shops be

## IN LIGHTER MOMENTS

close to each other. No freeh liquor, other than bad liquor, shah he sold helow its price. Liquor shops shall contain meny roome provided with heds and seats kept apert. The drinking room shall contain scents, garlands of flowers, water, and other comfortable things snithle to the varying seasons" are some of his injunctious.

Music and dancing wore the most important means in the pursuit of pleasure. "The lyre or lute was the most populer instrument and it appears to have been a 'rather lengthy how-like instrument, and almost belf of its downwards from ths top (being prohably of wood) was broad, while 'he lower halt, heing narrow had strings as is evidenced by the lyrist type of Samudragupta's coins. The scalptures of the Bhumara temple show three types of drums, ous short and the other longer, hoth of which tied to the ends, wers slung on the shoulders hy means of strings or firaps. These wars cylindrical, while the third type was loag, narrow in the centre, hat broad towards the end. Cymhals, conuches, timbrels and horus, tahor, flute, tamhorine and low goard lats were some of the other musical instruments.

The art of dancing had reached vsry higbly developed technique during Kalidasa'e time. In his Malavikagnimitra he speaks of a dancing tutor who conducted his practices in the music hall in the royal pelace. The dancing tutor says, in the lat act of the pley, is praise of the art of dancing, "Thus sages rogard this as an agreeable sacrificial feast to the eyes of the gods; it bas been divided into two different ways by Shiva in bis body which is blended with that of Uma, herein is essen the behaviour (life) of men arising, from the three prime qualities and distingnished by various sentiments; Natya (scenic art or dancing) is

festival they lashed the young folk with great wreathes of flowers, with tossing forehead marks and earrings they swayed like creepers of love's sandlo tree. Like waves of passion's floods, they gleanned, all resonant with the cries of anklets adding music fo their steps, while tho repid booming of the drums thrilled through their lithe fremes, they cast off flower pollen like *Ketakis*."

The days of festivity in the life of the people, according to Vatsyayana, the author of the Kamasulra were five, namely (1) Samaja (festival to celebrate the worship of different deities) (2) gosthis (social gatherings of men and women), (3) Abanakas (drinking parties), and (4) Udyanakas (pienies or garden parties) and (5) Samasya Krida (social festivities attended by a large concourse of people). The more important, however, were the spring and the autumn festivals and occasions of coronation and national victories. The Samaja was held "at the temple of Saraswati the goddess of learning and the five arts on a day fixed every fortnight, that is on the title or innar phase specially anspicious to the deity worshipped." The gosthi was the occasion for employing one's time in pleasant talk with persons of equal status, education and intelligonce. These involved discassions and debates on diverse topics and resulted in a brilliant display of knowledge and the power of rhetonic. These meetings were also attended by the ganikas (courtezans) who were treated with respect and constesy end in which they taok an active part. The Apanakas were beld to indugle in drinking different kinds of wines and liquors. To the garden parties went highly cultured citizens accompanied by ganika (curtezans) and whiled away their leisnre in pleasant talk and conversation. The Samasya Krida was more of a social festival which was enlivened with music and dancing.

· LOOKING BACK

towards an empire. with the Guptas we lived in the Augstan age of ancient India. We tried to understand the meaning of the Ashokan pillars, the sculptured reliefs of Barhnt and Sanchi, Mathura und Amravati, Karle and Ajanta, Badami and Ellora and Elephanta, We tried, to understand the subtlety of Bhasa, the gigantic imagination of Kalidasa the metaphorical sweep of Bana and the emotional intensity of Bhartrihari. We inquired about the people's dress and honses, customs and manners trade and inxury, in short, their joys and sorrows. Now, the time has come to ask, what does it all mean ? What is the significant content of this vast and persistent Indian stream of life which in its progress of centuries has thrown up and divonred back again mighty empires like those of the Mauryas and the Gaptas. We mast ask about the force that animates this life continuum that has built up the gigantic atupas, carved lofty cave temples and painted the most delicately heat if al frescoes that ever adorned the walls of nny hnildiags in the world. We must try to discern the dynamic strength pulsating in the veins of this social group of the ancient Indians that withstood so many attempts on lts personality and · iadividuality. In short we must endeavour while looking hack to descry the significance of the story of ancient India.

The first characteristic of the story of ancient India that strikes us most vividly is the presence of diverse racial strains in the social hody of the nation. Indeed India can be jastifiably described as the melting pot of some of the most important races of the world.

Racially man is divided into four major groups by anthropologists. These are Australoid, Negroid, Mon-

-231

#### STORY OF ANCIENT INDIA

1

goloid and Caucasian. The Australoid "has a very wide nose, with a marked depression of the root, chocolate skin colour, durk hair that may be early but never woolly, a long skall, and henvy bone ridges above the evebrows." In this group are jucladed certain groups in India and the Veddas of Oeylon. The Negroid has woolly or frizzy hair and no heavy brow ridges. His skin is durk, has a long skull and is wide nosed and thick lipped. The Audaman Jelanders belong to this group, The Mongoloid have straight and coarse hair on the head but sparse facical and bodily hair and oblique eyes. The skin is yellow, face wide and skull round. The Caucasian skin is fair in colour which differentiates them . more markedly from the othere. Within this race group there is a large variability and consequently can be subdivided into Noradic, Alpine and Mediterraneau to which some add a Dinaric.

In the racial history of India the Negritoes were the first comers "and real autochthous of the country", The Andaman Islanders and some members of the Kadars and Pulayane living In the interior of the hills of Cochin and Travancore as also the Irulas and primitive tribes of the Wynaad represent the Negrito racial stock in Indie. Besides these the Peninsular Indian aboriginal population contains unother primitive element is "the most dominant element at present in the tribal population of Southern and Central India as well as among cemibindnised tribes further north. The so-called "exterior castes" of Hinda society throughout the greater part of the country are also mainly constituted from this racial strain. We have no procise information as to when this race first came into Indin! It is found among the per-. . . skulls in the Tinevelly district, and from

232

۶X.

references in early Sanskrit literature to "Nishadas" where they are described as noseless (anasah) with dark akia colour and peculiar speech and habits, there can ho no doabt that the Prota-Anstralaid tribes were meant."

The Mougaloid group in India canists of three subdivisions "af which the Palae-Mongoloids are af a more primitive nature and da nat exhibit the churactera so conspicnously; , they are characterised hy medium. stature with a skin colour varying fram dark to light brown." The head of this group varies from a long to a medium shape with the occipital portions halging ontwards-a characteristic neonliar to lang headed races. This Pslae-Mongoloid strain is found in the sub-Himalayan region as the more ancient strainm of the population and farms a dominant element in the tribes living in Assam and the Inda-Burmese frontiers". The ather Palse-Mangoloid gronp is shart-broadheaded and darker in skia colanr and rounder in face. The third graup which shows Mougoloid characteristics in the most developed form is the Tibeto-Mongoloid clement. This is found in Sikkim and Bhutan and must have infiltrated . from Tihet in comparatively later times.

The mast important racial graup in the early population of India hawever was the Mediterranean graup, which "must be distinguished from mother closely akin to the European type, which entered this country later and whose remains have been fanud in large numbers in the Chalcolithic sites of the Indus valley and further east. It is probable that this was the rane responsible far the development of the Indua civilization and subsequently dispersed by the "Arynn" speaking Vedic invethe Gangetic basin and ta a amaller extent be, Yindhyas. It forms taday a dominant ele population of porthern India and an importont constituent of the upper section of the people of the rest of ths country."

Whot were the cultural contributions of all these racial stocke which constitute the racial make up of India? On this point we have little material of a definite character. But there is some ground for thinking. eays Dr. Guha, "that the cult of the ficus tree originated from the Negritoes. To the Proto-Aostraloid races may perhaps he uttributed a large ebare of totemistic rites, exorcism, food-tahoos and magical heliefs etill obtoining in Indian life. The bon on commensality and inter-marriage which forms the basis of the caste system must also owe its origin to them. The use of silk, tea, rice, paper, terraced cultivation, communal houses, head-hunting and hetal not culture may be mentioned as the contributions of the Mongoloid race. То one of its hranches, numely the oceanic we also owe the introduction of the ontrigger cance, the cocca- ' nut nod the pinenpple. The Palae-Mediterraneans probably hrought pottery, Megalithic culture, with its ussociated fertility rites and human sacrifice, and it eeems likely that they were responsible for introducing matriarchal institutions und the high position of women in peninsular India. The Mediterranean race proper, as far as con be judged developed the civilization of the Indus valley, and to it we owe the largest content of the present day Indian religion and culture most of the common domestic animals, river transport, garments, the etructure of the housen, the use of brick, painted pottery and the building of the towns are due to them. Astro-. nomy and the Indian script are also their contributions. particular share of the Alpo-Dinaric races we cannot

LOOKING BACK

assess hat if the contention of the late Ramprasad Chanda he right; then the development of the Bhakti cult and religious emotionaliem of Gujarat and Bengal must be attributed to them."

The Nordics brought hurses, probably iron and the hest variety of wheat, the use of milk, alcoholic drinks, dicing, chariot racing, and the tailored garmente were due to them. They introduced patriarchy in Indian social life, but their chief gift was undonhtedly the "Aryan language"-tho most delicate and flexiblo vehicle of . thought. They gave the shape into which contributions of other racee were fitted. Their chief contributions. however, were in the domain of thought rather than in material culture. Epic poetry, the concept of ensmic " nrder, Rita, lofty ethical ideas and philosophic thoughts, and nhstract natural sciences were their gifts in the hullding np of the Indian oivilization, and it would hehistorically wrong and scientifically inaccurate to deny that they have been directly ar indirectly responsible for most of the glories of Indian literature, philosophy and art."

Such, is the composite make up of the acient Indian nation and ite calinre. During its long journey through development it was involved in diverse proliminary racial conflicts which were ultimately resolved into a harmonionssynthesis. For this purpose it had to invent and adupt peculiar ideological patterns, artistic tendencies and social institutions which have become the enbjects of unqualified condemnation or vigorons defence.

The phenomenon nf castes in Hindu coolety is an instance in point. It has provoked a good deal of speculation among scholare, which in its wake has given hirth-

to s number of divergent theories and explenations. 'The very word "enste" is of a comparatively modern. origin, the usage being attributed to the Portuguese who intended to mean thersby a social arrangement ensaring the preservation of the parity of blood. The system in . its appearance is so bizarre and in its working so complex that any comprehensive definition is very difficult. .Sonart describes it as a "corporate group, exclusive and, in theory at least rigoronsly hereditory. It possesses a certaia traditional and independent organisation, a chief and a council, and as occasion demands it meets in assemblies endowed with more or less full anthority." According to the late Dr. Ketkar the salient characteristics of a caste-group are two, viz. (a) its membership is exclusively hereditery and (h) marriage is permitted only within the casts group.

Regarding the origin of "caste" there is no unanimity among scholars and a number of divergent hypotheses are proposed to solve the problem. Prof. C. V. Vaidva suggests that the "Indo-Aryans" came into India with the incubus of caste upon them". Senart points ont the similarities between the early social divisions in India and elsewhere and concludes that the salient features of the caste system were o part of a stock of usage and tradition common to all branches of the Arvan rece. Risley emphasises the racial divisions as the origin of caste. Ibbetson sees tribes of the root of it and Nesfield occupation. In the opinion of Datt "the most important factors in the development of essto were the raciel struggle between the fair skinned Aryans and the darkskinned non-Arvans; the division of labour leading to the formation of occupational classes, and the tribal differences especially among the non-Arvans which sur-

The division of society in the Vedic uge were occupational as hetween Aryans and Aryans while hereditary as Aryans against non-Aryans. As time passed, occupatione being mostly hereditary the "classes" assumed a hardened and rigid aspect, but the burriers separating them were, as yet, usither constant nor insurmonntable. By the time the laws of Manu csme on the scene, the reformistatiack on the privilege of the Brahmanas was repulsed and as a result thereof "classes" were transformed into "castes". The casts-system, however we may denounce it to day so having of lived is utility, it must he remembered—worked as a kind of a "defence-mechanism" for the preservation of rights, responsibilities and privileges of individuals, both within a social group and between groups and groups.

In the sphere of ideas the resultant Indian culturereveals a via inedia or hetter etill, a synthesis between two conflicting idsological tendencies. These two trends ars (1) Pravritti (or activiem) and (2) Nivritti' (passivism or renunciation).' In the Rigvedic times we do not comeacross as much as a suspicion of the ideal of renunciation in life, which plays such an important part in later Indian thought und consequently in life. The Rig vedic Aryans lived a life of straggle and progress, fall of fights and victories and territorisl acquisition and eetsblishment of kingdome. Under such conditinns no thought will he further from n man'e mind than that nf renunciation. Hence it is more than probable that renunciation and its associate ideal of asceticism nriginated in non-Aryan circles. At the confinence of two distinct thoughts and thought processes it was inevitable that they would influence each other's patterns. Thus, we find that renunciation was absorbed into Aryan thought. But

.

this absorption necessarily produced a conflict with its prodecessor in the form af *Pravritti* (activism). This conflict, it was devolved upon the *Gita* to resolve and synthesize. The tendency of Indian culture, hence, is neither wholly towards burly activism nor world retiring rennaciation. To describe it solsly as "to the devil with things material" as has been repeated ad nanscum by Westerners, hetrays not a technical inexactived only but fundamentally an error of comprehension.

What then are the solient characteristics of Indian a culture! Indian culture, to our mind, is overwhelmingly synthetic in nature, dynamic in tendency and diffusive in movement. Such a description violently outrages all our preconceived and borrowed ideas like the conserva-. tism of India, "India in aplendid isolation" and ao on and so forth. India, it is generally held in knowledgeable circles, to borrow a journalistic claptrap, is conservative. If ahe is conservativn she hardly changes etc. etc. then ale cannot aynthesize. But to synthesize, it can be pointed out, means to amalgamate the old and the new. The story of ancient India is an account of adjust. ments in har life ethnic and ideological; in this procesa of adjustment not all that was old was discarded nor all that was new was accepted. The tendency was to see how far the old and tha naw could be effectively harmonized towards general prograss.

Now 1st us examina the "diffusive" movement of Indian culture. The virility and exaberance of Indian cultural tendencies were anch that they could hardly be contained within the geographical houndaries of India. In the wake of extensive commercial activity Indian cultural influences penetrated all over the surrounding regions. The story of this cultural immigration is both interesting and instructive.

China: The onlineal contacts hetween India and China were firmly based on a common interest in the philosophy of Gantama, the Buddha. The sarliest costact of a historical nature was in 1st century A.D. when emperor Ming-Ti eeat an embassy consisting of 12 people led by an important officer to India to procure an image of the · Buddha. The first Indian pundit to go to China however, was Kashyapa Matanga, n native of central India who is . -credited with Chinese translation of some Hinayanist texts. Kashyapa was followed by several others and these visits were eventually reciprocated by the famona Chinese trio-Fa Hieu, Hiueu Teiaug and I Tsing Fa Hien started his travels, which eventually took him to Iadia, in 399 A. D. and returned to China fifteen years later. The book in which he has left his impression of the places he visited has once been translated into French and four times into Eaglish. It contains a very interestiag and valuable description of the government and accial conditions of the nerrod. Fa Hien was followed by Hiven Tsiang whose travels extended from 629 A. D. to 645 A. D. His unrative is a veritable treasura house of accurate information which has enabled us to know a great, deal about the times of Harsha and Pulakeshin II. It Tsiag who followed Hinen Taiang is the last quarter of tha 7th century A. D. has also laid the student of Indian history under a heavy deht of gratitude by his minute and valuable information which he has left for posterity. These exchanges of learned pundits between India and China continued almost right unto the downfall of ancient India and when this "cultural heritage of India was bronght into contact with the Chiness spirit, a new China .arose-a China which persists to this day."

in the country and built temples of Vishnu. How strong the Indian influence was could easily be seen from the otherwhelming Indian character of the ancient kingdom of Ayuthia (Ayodhyn). Even today through her national faith which is Buddhism, Siam shows her cultural affinity towards India in her art, society and language.

In Cambodia: the influence of Hinduism had begun to be felt very strongly as early as the 6th cent. A. D., Tho kings who ruled the hand wero Hindus and from their court proceeded Hindu traditions which permeated the entire life of Cauhodia. At about the same time Hindu culture had started exerting its influence in Java and Bali. Though Java is Moslemised to day, the thuy and romantic island of Bali is entirely Hindu in life and oatlook.

But the most important index of the effect of the Indian cultural infinences is shown by the art of Greater India. The Stupa of Borobuder described hy Dr. Vogel ss "the greatest and most renowned monument not only in Java but of the whole Buddhist world, is undoubtedly a remote descendant of those early Stopas of Central India-the "topes" of Barhut and Samchi." It is architecturally unique, rich in sculptural decoration and even aurpasses snything found in India proper. "It is not only due to the wonderful vastness and excellence of those hundreds of panels which adorn the walls and balnstrades of the four long pessages, through which the isithful rising from terrace to, terrace, performed the solemn preambaintion of the sacred monuments. It is above all, the spirit of supreme repose, of serene v uses pervading them in which the Buddhist . t ideal finds so eloquent an expression." Ano<sup>+1</sup>

## STORY OF ANCIENT INDIA

ful example of the art of Greater India is the Angkor Vat in Cambodia. It is mudelled on Dravidian architectural ideas and the galleries are adorned with beautiful representations from the Ramagana and the Malabharata.

Indian cultural influences were not restricted to South-east Asia only. Control Asia, and the countries bordering on it received and absorbed many an Indian onitural tradition. The parallelism found between many Jataka stories and fables from Assop like the Ass in the Lion's skin, The Wolf and the Lamb and the Fox and the Crow numistakably suggest Indian influences. Manv stories found in the Jakata collection, as well as Panchatantra and Hitobadesha travelled with Indian traders to an ds of the Middle East and found there a receptive oar. A notable instance in point is the famons story of Karataka and Damanaka from the Panchainntra which was translated into Pablavi and its closest roprosentatives oxist today in the form of Kalilah and Dimnah in Arnbio and Syrian and the Fables of Bidpai in English. From this brief sketch of the migration of Indian caltaral infinences both towards the west and the east. the diffasive nature of Indian culture could best be understood and its importance assessed.

Such then, is the burden of the story of Ancient India, natory of engrossing and instructive interest on its own merits and of special significance for a proper understanding of our nation.
